bot'a-nal'-o-ger, n. A botanist.  
bot'a-nal'-o-ger, n. Botany.

bot'a-no-man'cy, 1 böt'a-no-man'si; 2 böt'a-no-man'sy, n. Divination by plants. [*< Gr. botanē* (see BOTANY) + -MANCY.]

Bot'a-naph'a-ga, 1 böt'a-nēf'a-ga; 2 böt'a-nēf'a-ga, n. pl. Mam. A division of marsupials, comprising the herbivorous families. [*< Gr. botanē* (see BOTANY) + *phageta*, eat.]

bot'a-ny, 1 böt'a-ni; 2 böt'a-ni, n. [-NIZEN; -NIZ-ING.] pl. The science, or the branch of biology, that treats of plants with reference to their structure, functions, development, nomenclature, nomenclature, and classification.

The principal branches of botany are:—  
Morphology, which deals with external form.  
Histology, with the structure of tissues.  
Cytology, with the cell.  
Embryology, with the development of the egg-cell.  
Physiology, with the functions and vital action of organs.  
Phytopathology, with plant diseases.  
Ecology, with environmental influences.  
Phytogeography, with plant distribution.  
Taxonomy, with the classification of plants.  
Economic Botany, which includes Agriculture, Forestry, Horticulture, Pharmacognosy, Floriculture, and cognate subjects.  
Paleobotany, which treats of fossil plants.

Botanical nomenclature, long a subject of controversy, now follows certain rules adopted by the International Botanical Congress held in Vienna in 1895. Order names now end in -aceae, family names in -aceae, specific names in -a, the earliest published, proper adjectives are decapitalized. See NOMENCLATURE.

The Chaldeans, Egyptians, and Greeks were the early cultivators of this science, altho confusing its study with crude speculations as to the relations between animal and vegetable life. Aristotle, who devoted much attention to

the subject, divided plants into three classes—trees, shrubs, and herbs. Theophrastus wrote a history of plants describing about 500 species, and Dioscorides and the elder Pliny also wrote upon the subject. Otto Brunfels, a physician of Bern, in his *Herbarium* (Strassburg, 1530-1536) revived the science in Europe; he was followed by such writers as Leonhard Fuchs (*Historia Stirpium*, Basel, 1542), William Turner (*New Herbal*, 1551), and others. Systematic botany was inaugurated by John Ray (*Archeologia Plantarum*, 1686), and J. P. de Tournefort (1656-1708), who described 8,000 species. The science was greatly advanced by Linnaeus (1707-1778), A. L. de Jussieu (1748-1836), and A. P. de Candolle (1778-1841), since which time the researches of a large number of experts have contributed to a wider knowledge of the various divisions of botany and of its comparative biological relations.

# BOTANICAL SIGNS.

① An annual plant.	personal observation, or by the observation of the person to whose name the sign is attached.
② A biennial plant.	
③ A perennial herb.	
④ An evergreen.	?
⑤ A monocarpic plant.	Of doubtful or questionable authority.
⑥ A plant having a woody stem.	° or f Foot or feet.
⑦ An undershrub.	" Inch or inches.
⑧ A shrub.	" Line (1/2, 1/3, 1/4) or lines.
⑨ A large shrub.	[Sometimes European books give these as "feet," "inches," "lines,"]
⑩ A tree.	
⑪ or ⑫ A staminate (male) plant or flower.	( Twisting or winding to the right.
⑬ A pistillate (female) plant or flower.	) Twisting or winding to the left.
⑭ A climbing-plant.	In describing the <i>Cruciferae</i> the following are sometimes used:
⑮ A perfect or hermaphrodite flower; or, bearing perfect flowers.	○ = Cotyledons acuminate, and radicle lateral.
⑯ A naturalized plant.	○ = Cotyledons incurvate, and radicle dorsal.
⑰ A useful plant.	○ = Cotyledons folded twice (OJ) (I thrice), and radicle dorsal.
⑱ or ⑲ Monocleous.	
⑳ or ⑳ ? Diocleous.	
㉑ or ㉑ ? Polygamous.	
㉒ Jadeate as to number; numerous.	
㉓ Wanting as a part; none.	× Crossed with the sign of a hybrid.
㉔ Certainly known, as from

**SYN.** barrier, border, bound, bourn, bourne, confines, edge, enclosure, frontier, landmark, limit, line, marches, marge, margin, term, termination, verge. The boundary was originally the landmark, that which marked off one piece of territory from another. The bound is the limit, marked or unmarked. Now, however, the difference between the two words has come to be simply one of usage. As regards territory, we speak of the boundaries of a nation or of an estate; the bounds of a college, a halibound, etc. Bounds may be used for all within the limits, boundary for the limiting line only. Boundary looks to that which is without; bound only to that which is within. Hence we speak of the bounds, not the boundaries, of a subject, of the universe, etc.; as, the students were forbidden to go beyond the bounds. A barrier is something that bars ingress or egress. A barrier may be a boundary, as was the Great Wall of China. Bourn, or bourne, is a poetical expression for bound or boundary. A border is a strip of land along the boundary. Edge is a sharp terminal line, as where river or ocean meets the land. Limit is now used almost wholly in the figurative sense; as, the limit of discussion, of time, of jurisdiction. Line is a military term; as, within the lines or through the lines, of an army. Median Section of Human Brain.

cephalon or nose-brain, a comparatively large portion in many vertebrates, reduced in man to the inconspicuous olfactory bulb.

The average weight of the human brain is about 50 ounces avoirdupois for males and 44 ounces for females, being 2.16 per cent. of the weight of the body in males and 2.24 per cent. in females, surpassing, in this respect, that of all other animals, altho the gross weight of the brain in some bulky animals (whales, elephants) is greater than in man.

The essential active elements in the brain are the nerve-cells, which constitute the bulk of the gray matter, forming a layer on the exterior of the cerebrum and cerebellum and various ganglionic masses elsewhere. For the cavities of the interior of the brain, see under VENTRICLE.

In the brain of a great scholar, the furrows are very deep and crooked and hundreds of creases appear which are not found at all in the brains of ordinary men.

O judgement that art fled to brutish beasts.

SHAKESPEARE *Julius Caesar* act III, sc. 2, l. 109.

SYN: animal, base, bestial, bestial, brutal, carnal, coarse, ignorant, insensible, lascivious, sensual, stolid, stupid, swinish, vile. A brutish man simply follows his animal instincts, without special inclination to do harm; the brute has always a spirit of malice and cruelty. — *Brute* seems rather to imply consciousness or deficiency of feeling for other sentient beings; *brutish* refers more to coarseness or deficiency of intelligence, expressing itself in the form or manners. *Brute* has no special character, except as indicating what a brute might possess; much the same is true of *animal*, except that *animal* leans more to the side of sensuality, *brute* to that of force, as appears in the familiar phrase "brute force."

Hunger is an animal appetite; it is a brute impulse that inclines one to strike a blow in anger. *Brut*, in a broader sense, implies an intensified and degrading animalism.

Any supremacy of the animal or brute instincts over the intellectual and spiritual in man is base and vile. *Beastly* refers largely to the outward and visible consequences of excess; as, beastly drunkenness. — *Ant.* elevated, enlightened, exalted, grand, great, humane, intellectual, intelligent, noble, refined. — *brut'ish-ly*, adv. — *brut'ish-ness*, n.

 but<sup>5</sup>, n. [*LOCAL, ENG.*] A flounder.  
 but, *adv.* 1. Not otherwise than; no more than; only; merely; simply; as, there is but one God; we made but one trip; I left him but now.  
 Such lofty strains embellish what you teach;  
 Mean you to prophesy, or but to preach?  
 COWPER Table Talk l. 430.

But is sometimes used as a mere expletive; sometimes, perhaps, merely to add emphasis by repetition.  
 I conjure, only but to raise up him.  
 SHAKESPEARE *Romeo and Juliet* act ii, sc. 1.

2. [*SCOT.*] In or to the outer room or outer air; to the outside; out; without; as, bring it but; gae but.  
 — all but, almost; nearly; as, he was all but dead. — to be but and beu with, to live in close intimacy with.  
 but, *prep.* 1. Leaving out; with the exception of; except; in modern usage treated as a conjunction, an objective pronoun following being now considered colloquial; as, all but he agreed to it.  
 Since none puts by The curtain I have drawn for you, but I.

Brownlow *My Last Duchess* l. 9.  
 2. [*SCOT.*] Apart from; without; destitute of; as, a child but a gown; a man but skait or sear. 3. [*SCOT.*] Outside of; out of; without; as, to gang but the house.

but, *conj.* But has many and varied uses, so that it is often difficult or impossible to decide whether the word is a conjunction, a preposition, an adverb, or a particle having various offices. As the typical word used in the adversative coordination of sentences, but expresses fundamentally opposition, exception, or exclusion, but its meaning is often restricted to slight transition or simple continuance. The most important of these particles of adversative coordination is but, which rules the whole adversative field, and always stands at the commencement of the sentence or member. MATTHEW *Eng. Gram.* tr. by Greece, vol. iii, p. 358. [*n. BAOS*, 1874.]

1. Omitting or excluding the fact that; with the exception that; except; denoting simple omission, exception, or exclusion; as, the family went to church, but John stayed at home.  
 The waves do not rise but when the winds blow.  
 BANCROFT *United States* vol. ii, p. 527. [*L*, 1890.]

But for conscience, there would be no check to vice.  
 R. WATSON *Sermons* vol. ii, p. 238. [*m. & L*, 1836.]

2. Otherwise than (that); in every direction except (that); more than (that); denoting opposition with difference; as, it can not be but (that) the man is honest.  
 But often indicates exclusion through necessity, impossibility, inability, etc., being preceded by a negative.

We cannot but believe that there is an inward and essential truth in art. CANTLEY *Essays*, Goethe vol. i, p. 237. [*m. & c.* col.]  
 3. Still, on the contrary; yet, on the other hand; nevertheless; however; denoting opposition with contrast.  
 The cross their standard, but their faith the sword.  
 MONTGOMERY *The West Indies* pt. i, st. 11.

4. Tho it be true that; however that may be; notwithstanding; tho; even if; denoting opposition with concession; as, he is rich, but he might be richer; you must go now, but you may come again.  
 They prevented me in the day of my calamity; but the Lord was my stay.  
 Ps. xlviii, 18.

And, but she spoke it dying, I would not believe her lips.  
 SHAKESPEARE *Cymbeline* act v, sc. 5.  
 5. In addition to that; moreover; besides; again; denoting slight opposition, transition, or continuance, and approaching the meaning of and.

But where is she, the bridal flower?  
 TENNYSON *In Memoriam* con., st. 7.  
 6. From the fact that; that it is n fact that; furthering the explanation or ground of what precedes; often but that, either word being omitted at pleasure.  
 It must not be denied but I am a plain-dealing villain.  
 SHAKESPEARE *Much Ado About Nothing* act i, sc. 3.

7. When; before; than.  
 Scarce had I left my father, but I met him  
 Borne on the shields of his surviving soldiers.  
 AMYOT *Cato* act v, sc. 4.

8. Who . . . not; that . . . not; where an omitted pronoun is the object of a main sentence or the subject of n dependent one but becomes a negative relative, equivalent to the Latin *quin*; as, No man but felt the terror.  
 As for the birds, I do not believe there is one of them but does more good than harm. LOWELL *My Study Windows*, *Garden Acquaint*, p. 23. [*o. & c.*, 1871.]

9. [*ARCHAIC*] If not; unless; as, It is ten to one but Peter is among them. [*C* *AS*, *but*, except, without, orig. *adv.*, outside, < *be-* (see *BE-*) + *utan*, out.]  
 SINCE, and, barely, besides, except, however, just, merely, more, nevertheless, notwithstanding, only, provided, save, still, that, tho, unless, yet. But ranges from the faintest contrast to absolute negation; as, I am willing to go, but (on the other hand) content to stay; he is not an honest man, but (on the contrary) a villain. The contrast may be with a silent thought; as, but let us go (it being understood that we might stay longer). In restrictive use, except and excepting are slightly more emphatic than but; we say, no injury but a scratch; or, no injury except some painful bruises. Such expressions as "words are but breath" (nothing but) may be referred to the restrictive use by ellipsis. So may the use of but in the sense of unless; as, "it never rains but it pours." To the same head must be referred the conditional use; as, "you may go, but with your father's consent" (i. e., "provided you have," "except that you must have," etc.). "Doubt but" is now less used than the more logical "doubt that." But never becomes a full synonym for and; and adds something like, but adds something different; "have and tender" implies that tenderness is natural to the brave; "have but tender" implies that bravery and tenderness are rarely combined. For the concessive use, see NOTWITHSTANDING.

— but and [*SCOT.*], and also, he also. — but and if, but if; if — but that, I have said more than that; except for the fact that. But is in many cases redundant before that, but is

often in other cases required by the sense. In "Each by the other would have done the like but that they lacked the courage," but is essential, as introducing a reason or consideration to the contrary. The omission or insertion of but often reverses the meaning. "I have no fear that he will do it" and "I have no fear but that he will do it" have contrary senses, the former indicating the feeling of certainty that he will not do it, and the latter the feeling of certainty that he will do it. Where ambiguity or haziness results from the use of but that, it can ordinarily be avoided by changing the form of the sentence; as, "There is no certainty but that he will come" may be changed to "There is no certainty that he will not come." — but what, an incorrect expression for but that.

by, *prep.* 1. Expressing relations of place or direction: (1) Alongside of; next to; near; as, "I dwell by the Capitol." SHAKESPEARE *Julius Caesar* act iii, sc. 3. (2) Along the line of; beside; past; over (a course); as, they walked along by the river; the boat went by them.

The way to God is by the road of men.

EDWIN ARNOLD *Lost of the World* bk. v, p. 225, [c. a. d.]

2. Expressing the relation of agency, cause, means, or instrument: (1) Through the agency or means of; through; with; as, the rope banged by the agency; he crossed the river by the bridge; he died by poison.

For we walk by faith, not by sight. *2 Cor.* v, 7.

(2) Through the direct action of; through the help of; as, he was helped by his father.

The distinction of the two particles in the modern languages consists essentially in that *by* is referred to the object immediately operative as the independent bearer of the activity; with, on the other hand, to an object mediately operative, and participating in the activity. *MAERZBACH Eng. Gram.* tr. by Green, vol. II, p. 414, [n. *avon*, 1874.]

No one has ever yet made utterly miserable excepting by himself. *J. LUNCKO Pleasures of Life* ch. i, p. 13, [n. a. 1857.]

(3) In accordance with; according to, taking, or regarding as a standard; as, they work by the month.

It was one by the village clock.

LONGFELLOW *Wayside Inn*, *Poul Recter's Ride* et. 11.

(4) *Naut.* One point toward; as, to sail west by north.

3. Expressing relations of quantity: (1) To the extent, number, or amount of; as, they earned by hundreds; to reduce by half. (2) [North. Eng. & Scot.] More than; reaching beyond; in excess of. 4. Expressing relations of time; not later than; in the time of; during; as, come by ten o'clock; the moon shines by night. 5. Expressing possession; in possession of; with; as, he came honestly by it; there was no money by him. 6. Expressing order, arrangement, etc.: (1) In connection with; alongside of; arranged with or in. (2) Multiplied into; in connection or measurement with; as, six by eight. 7. Expressing the relation of an action to its object: (1) With regard to; for; to; as, to do well by one. (2) [Archaic.] Against; derogatory to.

I know nothing by myself [against, R. V.]. *1 Cor.* iv, 4.

This idiomatic use of *by*, as equivalent to "concerning," but with also a suggestion of "against," was not peculiar to our Translators. *FAIRBANK Select Glossary* p. 37, [k. r., a. eo. 1890.]

8. In the name, presence, or view of; as, to sail west by north; as, by the gods. [*AS. bi, big*] *byef*.

*Syn.* by means of, through, with. *By* refers to the agent; *through*, to the means, cause, or condition; *with*, to the instrument. *By* commonly refers to persons; *with*, to things; *through* may refer to either; hence *by* is properly used before the agent or doer, *with* before the instrument or means; as, "He was killed by the assassin with a dagger." But active forces are often thought of as agents, so that we properly say "The house was destroyed by fire." "His friends were displeased by the selection of another chairman" means that the action displeased them; "his friends were displeased with the selection," etc., means that the man selected was not their choice. The road having become impassable through long disease, a way was opened by pioneers with axes. *By* may, however, be applied to any object which is viewed as partaking of action and agency; as, the metal was corroded by the acid; skill is gained by practice. We speak of communicating with a person by letter. *Through* implies a more distant connection than *by* or *with*, and more intervening elements. Material objects are perceived by the mind through the senses. See *AT*.

—by all means, certainly; on every account.—by north, south, east, northeast, etc. (*Noult*), with direction toward the north, etc.; as, our course was northeast by east, i. e., between northeast and east; used in navigation (or boating) to compass.—by oneself, alone; apart; unassisted.

—by the cars, in disagreement; at variance; commonly in the phrase to set by the cars. See under *EAR*.—by the head or stern (*Noult*), drawing most water forward or aft: said of a vessel.—by the run (*Naut.*), entirely and at once; as, to let go by the run, by the way. 1. On or near a road. 2. Incidentally; by the way.—by trade, [*Colloq.*] in the exercise of, or professing, a trade.—by day, one, or day, one, or day, one, piece at a time, each day, one, or piece, as the case may be, individually and separately.—to come by, to acquire.—to set store by, to esteem; hold as valuable or of worth.—to stand by, to stand up for; support.

**Caes** 'al-plin 'l-a 'ce-a, 1 ses 'al-plin 'l-a; 2 çes 'al-plin 'l-a 'ce-a, n. pl. Bot. 1. A family of trees, shrubs, or herbs—the bractlet or seana family—formerly included in the family *Leguminosae*, but separated from it by modern botanists on account of its flowers, which have nearly regular corollas, with the upper petal enclosed by the others and the stamens distinct. It embraces about 90 genera and 1,000 species, mostly tropical. Four or five genera, including *Cercis*, *Gymnocladia*, and *Gleditsia*, are present in the eastern United States by the Judas-tree, the Maryland senna, the Kentucky coffee-tree, and the honeylocust, respectively. 2. Formerly a subfamily, tribe, or suborder of the *Leguminosae* according to many botanists, some of whom designated it variously as *Casalpiniaceae*, *Casalpiniaceae*, and *Casalpinioidae*. [*Andreas Casalpini*, Italian botanist.] —**caes** 'al-plin 'l-a 'ceous, a.

**cal'-cu-la-graph**, 1 *kal'k'iu-lá-gróf*; 2 *cal'ed-lá-gráf*, *n.* A mechanism consisting of a clock and levers for recording elapsed time, as of a call in a telephone exchange, or for dictating the time taken to perform a piece of work. [*L. calculo* (see CALCULATE), + *Gr. grapho*, write].

**cal'-cu-lar**, 1 *kal'k'iu-lér*; 2 *cal'ed-lár*, *a.* Of or pertaining to a calculus. **cal'-cu-lar-ry**.

**cal'-cu-lar-ry**, 1 *kal'k'iu-lér-ri*; 2 *cal'ed-lár-ri*, *n.* [*-RIS*, 1 -*ri-z*; 2 -*ri-j*, *pl.*] 1. *Bot.* An aggregation of stony knots or concretions found in the pulp of the pear and other fruits. 2. *Pathol.* A calculus. [*L. calcularius*, < *calculus*, pebble; see CALCULUS.]

**cal'-cu-late**, 1 *kal'k'iu-lét*; 2 *cal'ed-lát*, *v.* [*-LAT*; *-LAT* -*ING*.] 1. *t.* 1. To compute mathematically; ascertain by computation; find out beforehand the time or circumstances of, as an eclipse; reckon; as, to calculate expenses; to calculate the return of a comet.

People in Ashurst moved in orbits calculated before they were born. A. S. HARDY *Wind of Destiny* p. 42. [*fr. m. & co.* 1890.]

2. To think or study out; form an estimate of; as, to calculate the chances of success. 3. To plan or arrange; think out; devise; as, the room is not calculated for such uses; a calculated slowness of speech. Compare CALCULATED. 4. [*Local*, U. S.] To intend; purpose; as, do you calculate to ride?

We calculate to go down to the New Orleans Centennial. C. D. WARNER *Their Pilgrimage* p. 17. [*fr.* 1887.]

5. [*U. S.*] To think; guess; as, 1 calculate you are right.

**II. i.** 1. To form an estimate; perform calculations; reckon; count; as, 1 calculate on a good trade. 2. [*Colloq.*, U. S.] To think, suppose, or believe after consideration or deliberation; reckon.

Your aunt sets two tables, I calculate, don't she? SUSAN WARNER *Queechy* vol. i, p. 271. [*fr.* 1873.]

3*†*. To speculate as to the future. [*L. calculatus*, *pp.* of *calcolo*, < *calculus*, pebble; see CALCULUS.]

**Syn.**: account, compute, consider, count, deem, enumerate, estimate, number, rate, reckon, sum up. *Number* is the generic term. To *count* is to number one by one. To *calculate* is to use more complicated processes, as multiplication, division, etc., more rapid than the less exact *count*. Compute allows more of the element of probability, which is almost more strongly expressed by *estimate*. We compute the slain in a great war from the number known to have fallen; in certain great battles; *compute* refers to the present or the past, *estimate* more frequently to the future; as, to estimate the cost of a proposed building. To *enumerate* is to mention item by item; as, *enumerate* one's grievances. To *rate* is to estimate by comparison, as if the object were one of a series. We count upon a desired future; we do not count upon the undesired. As applied to the present, *was* and *will* contain the thing estimated as worthless. See ESTIMATE. — *Prep.* 1. *calculated* on or upon the result.

**cal'-cu-lat-ed**, 1 *kal'k'iu-lát-ed*; 2 *cal'ed-lát-ed*, *pa.* 1. Especially designed or adapted; planned. 2. Hence, adapted; suited; proper; fit; tending; the common modern meaning; as, he is well calculated for a lawyer. Compare CALCULATE, 3.

An immense metropolis like London is calculated to make men selfish and uninteresting. IRVING *Sketch-Book*, *Rural Life in Eng.* p. 82. [*fr. r.* 1803.]

3. Likely to have a certain result.

**cal'-cu-lat-ing**, 1 *kal'k'iu-lát-ing*; 2 *cal'ed-lát-ing*, *pa.* Inclined to reckon or estimate, especially one's own chances or interests; planning; scheming; as, a calculating politician. **Syn.**: businesslike, careful, cautious, circumspect, guarded, keen, mercenary, wary, watchful, wily. Compare synonyms for ASTUTE. — *Ant.*: careless, easy-going, free-and-easy, imprudent, impulsive, incautious, neglectful, negligent, rash, short-sighted, thrifless.

**cal'-cu-lat-ing-machine**, *n.* 1. A machine for performing arithmetic calculations, as a tide-predicting machine, an instrument for integrating differential equations, a machine for calculating eclipses, or a differential engine. See *illus.* under COMPUTOGRAPH. 2. One of various devices to aid computation, as the abacus, Napier's rods, planimeters, the celestial globe, etc.

— *cal'-cu-lat-ing-ly*, *adv.*

**cal'-cu-la-tion**, 1 *kal'k'iu-lá-shón*; 2 *cal'ed-lá-shón*, *n.* 1. The act, *nrt.*, manner, or practise of calculating, reckoning, or computing; as, calculation has to do with numbers.

Whenever we term arithmetic the science of 'calculation,' we . . . subsume that rudimentary period of the science of numbers, which calculations were used . . . to facilitate the practice of counting. TRENNIS *On the Study of Words* lect. iv, p. 123. [*fr. r.* w.]

2. An arithmetical computation and its result; as, the first calculation was erroneous. 3. An estimate of probability; a forecast; as, my calculations failed.

The fate of the Triennial Bill confounded all the calculations of the best informed politicians of that time. MACAULAY *England* vol. iv, ch. 20, p. 382. [*fr. s. & co.* 1856.]

4. A planning, scheming, or politic habit of mind; as, a man of cool calculation.

Whether death or slavery should be inflicted on the conquered enemy was, in fact, not a question of morality or mercy, but . . . of calculation. STOW *Ice-Bergs* p. 149. [*fr. an.* 1871.]

[*Fr.* < *L. calculatio* (*n.*) < *calculus*, *pp.*; see CALCULUS.]

**cal'-cu-la-tion-al**, *a.* Pertaining to or used in calculation.

**cal'-cu-la-tive**, 1 *kal'k'iu-lá-tív*; 2 *cal'ed-lá-tív*, *a.* Of *cal'-cu-la-tiv*, or pertaining to calculation; given to calculation.

England, the most calculative, is the least meditative, of all civilised countries. CARLYLE *Essay, Characteristics* in vol. iii, p. 39. [*fr. m. & co.*] 1. One who computes or reckons. 2. One who schemes or forecasts. 3. *Metaph.* (1) A calculating-machine. (2) Set of slides, or *sliding*, for reasoning — *but* calculator, a calculating-machine actuated by movable bars, used for addition and subtraction. — *single-cal'cu-lá-tiv*, *a.* a calculating-apparatus in which the slide-rules turn on a single axis.

**cal'-cu-la-to-ry**, 1 *kal'k'iu-lá-to-ri*; 2 *cal'ed-lá-to-ry*, *a.* Of or pertaining to calculation.

**cal'-cu-li**, 1 *kal'k'iu-ló*; 2 *cal'ed-ló*, *n.* Plural of CALCULUS.

**cal'-cu-li-form**, 1 *kal'k'iu-lí-form*; 2 *cal'ed-lí-form*, *a.* Shaped like a pebble. [*L. calculus* + *form*.]

**cal'-cu-li-trage**, 1 *kal'k'iu-lí-tréj*; 2 *cal'ed-lí-tráj*, *n.* An instrument for reducing calculus, or stone in the bladder, by crushing it; a lithotrite. [*L. calculus* + *tr.* *frangere*, break; *tr.* *cal'cu-lí-trá-gous*, *o.* Emaciated in reducing calculus; lithotritic.]

**cal'-cu-list**, 1 *kal'k'iu-líst*; 2 *cal'ed-líst*, *n.* One who calculates; a mathematician.

**cal'-cu-lous**, 1 *kal'k'iu-lús*; 2 *cal'ed-lús*, *a.* 1. Hard like stone; stony; gritty; *n.* a calculus deposit. 2. *Metaph.* Resembling, pertaining to, or affected with calculus.

n. The cabbage-hug. — c. bush, n. The mountain-laurel (*Kalmia latifolia*). — c. flower; c. tree; — c. horse. [W. U.S.] a. pled horse; plant; paint-horse; jacket, n. Same as CALICOBACK. 1. c. marble, see MARBLE. — c. salmon, the dog-salmon (genus *Oncorhynchus*). — c. wood, n. The light, soft, close-grained light-brown wood of the silver-bell-tree (*Mohrodendron corollinum*), or the tree itself.

Syn. bawl, hellow, clamor, cry, cry out, ejaculate, exclaim, roar, scream, shout, shriek, vociferate, yell. To call is to send out the voice in order to attract another's attention, either by word or by inarticulate utterance. Animals call their mates, or their young; a man calls his dog, his horse, etc. The sense is extended to include summons by bell or by signal. To cry is to call loudly or eagerly, in alarm, distress, or excitement. In the most common usage, however, to cry is simply to express grief or pain by weeping or sobbing. To shout is to call with the fullest volume of sustained voice; to scream is to utter a shriller cry; to shriek or to yell refers to that which is louder and wilder still. We shout words; in screaming, shrieking, or yelling there is often no attempt at articulation. To bawl is to utter senseless, noisy cries, as of a child in pain or anger. Bellow and roar are applied to the utterances of animals, and only contemptuously to those of persons. To clamor is to utter with noisy iteration; it applies also to the confused cries of a multitude. To vociferate is commonly applied to loud and excited speech where there is little besides the exertion of voice. In exclaiming, the utterance may not be strikingly, though somewhat, above the ordinary tone and pitch; we may exclaim by mere interjections, or by connected words, but always by some articulate utterance. To ejaculate is to throw out brief, disconnected, but coherent utterances of joy, regret, and especially of appeal, petition, prayer; the use of such devotional utterances has received the special name of "ejaculatory prayer." To cry out is to give forth a louder and more excited utterance than in exclaiming or calling; one often exclaims with sudden joy as well as sorrow; if he cries out, it is often in grief or agony. In the most common colloquial usage, to cry is to express grief or pain by weeping or sobbing. One may exclaim, cry out, or ejaculate with no thought of others' presence; when he calls, it is to attract another's attention. See CHOOSE; CONVOKE; EXCLAIM; INVITE. Prep. call to a passer-by; call after one who is departing or fleeing; call on or upon a friend, or at his house; call on or upon one for aid or service; call upon the country for troops; he is called by the name of Lincoln, after the great emancipator; his integrity has never been called in question.

heller that they exhibit evidence of a system of calcareous polygonal plates identical with that of a stalked crinoid.

**cal'y-cle**, 1 kal'-kl; 2 cal'y-cl, n. 1. Bot. An accessory calyx outside of the true calyx. 2. Zool. A calicle. [*L. calyculus*, dim. of *calyx*]. — *cal-le-u-lat*; — *cal-lye-u-lat*; — *cal-lye-u-late*, a. Having calyces. *cal'y-cled*; — *cal-lye-u-lat-ed*.

**cal'y-cold**, a. Like a calyx. *cal'y-cold-e-lust*. — *Cal'y-co-neet'at*, n. pl. Zooph. An order of siphonophorous siphonophores without a float, but with swimming-bells. — *cal'y-co-neet'at*, a. & n. — *cal'y-co-neet'at*, a. — *Cal-yconet'at*, n. pl. Zooph. A genus of siphonophores having a stem represented by a single cormidium with a single siphon. — *C. polygastrea*, *Cal-yconet'at* having a cormus represented by a long tubular stem with numerous cormidia, each with a siphon. — *Cal'y-coph-o-ra*, n. pl. Zooph. A suborder of siphonophores without an air-sac and with modified persons or appendages retractile into cavities of swimming-bells. *Cal'y-coph-o-rat*; — *Cal'y-co-phor'at*; — *Cal'y-coph-o-ran*, a. & n. — *cal'y-co-phore*, *cal'y-coph-o-rld*, n. — *cal'y-coph-o-rus*, a. — *Cal'y-co-zo'a*, n. pl. Zooph. An order of *Scyphomedusae* without tentaculocysts and with the atheral pole extended into an adhesive disk and the easterly cavity divided into four perradial chambers; lucernarians. — *cal'y-co-zo'an*, a. & n. — *cal'y-co-zo'ic*, a. — *cal'y-co-zo'on*, n.

**cal'y-cule**, 1 kal'-kül; 2 cal'y-cul, n. Same as *CALYCLE*.

**Cal'y-don**, 1 kal'-dōn; 2 cal'y-dōn, n. In Arturian legend, a forest believed to have formerly existed in the north of England.

**Cal'y-don't**, n. An ancient city in Attolia.

**Cal'y-do'u-lan**, 1 kal'-dō'u-lan; 2 cal'y-dō'u-lan, a. Of or pertaining to the ancient city of Calydon, Attolia, Greece. — *Calydonian hoar-hunt* (*Myth.*), the hunt in which Meleager slew the boar sent by Artemis to ravage Calydon because its king, Eneus, had neglected her in sacrifice.

**cal-ym'e-ne**, 1 ka-lim'-nē; 2 ca-lym'e-nē, n. A fossil Silurian trilobite (genus *Calymenes*). [Representing *Gr. kalyptomenē*, f. pp. pass. of *kalyptō*, conceal.]

**Cal'y-men't-dē**, 1 kal'-men't-dē; 2 cal'y-men't-dē, n. pl. Crust. A Silurian family of trilobites. *Cal-ym'e-ne*, n. (t. s.). — *cal-ym'e-nld*, n. — *cal-ym'e-nold*, a.

**Cal-ym'ma-to-the'ca**, 1 ka-lim'-a-to-thē'ka; 2 ca-lym'-a-to-thē'ca, n. Bot. A genus of Paleozoic fossil plants allied to the sphenopterids, and belonging to the cycads, or "seed-bearing ferns" (*Pteridosperms*). [*Gr. kalyptoma* (f.), covering, + *thēkē*, case.]

can', 1 kan; 2 cān, *v.* [cōtūn.] [A defective auxiliary now having *n* infinitive and used only in the present and imperfect indicative and in forming the subjunctive. Compare MAT and WILL.] 1. To have physical, moral, or intellectual ability to; as, he can outdo every competitor. 2. To have the skill or knowledge to; as, can you tell me?

Can is a variety of ken, 'to know,' and means etymologically 'to know how.'

WHITNEY *Lang. and Study of Lang.* p. 111. [s. 1874.]

3. To be able under existing circumstances to; as, I could bear to see it. 4. To have capacity to; as, my cup can hold more. 5. To have the means to; as, when men can sail through the air. 6. To be competent or permitted to; as, you can come and go as you please. 7. To be possible to; as, could this but last forever. 8. To understand; be able to do; know; as, I can no Latin. [*AS. cann*, 1st and 3d per. sing. of *cunnan*, know.] Can is constantly misused for *may*. Can always refers to some form of possibility. An armed guard may say "You can not pass," since he has physical power to prevent; hence the question "Can I pass the guard?" is perfectly natural. But where simple permission is referred to *may* should be used. *May* 1 (not *can*) use your ruler? *Can* sometimes mean the term *can* but "can or but" are misused. They should be carefully distinguished. "I can but conclude" means that to the speaker no other conclusion is possible: "I can not but conclude" signifies that the speaker can not help drawing the conclusion.

Law)**, the various proceedings against the Tweed Ring in New York for municipal frauds, forming a mass of litigation. Principally decided

as to State control over county rights, questions of New York practice and, in criminal law, the effect of cumulative sentences. Tweed escaped to Spain, with which country the United States had no extradition treaty; Spain, however, as a matter of diplomatic courtesy surrendered Tweed in 1876.—*Twyne's c.* (*Eng. Law*), a case establishing the rule that conveyances of property for the purpose of defrauding creditors are void. (3 *Coke* p. 80.)—*Virginia coupon cases* (*U. S. Law*), a number of cases in the U. S. Supreme Court in 1884, determining that a State, having once by legislative act declared its bond coupons receivable for its taxes, could not alter their properties by revoking the act.—*Wheeling bridge c.* (*U. S. Law*), a case determining the right of Congress, under the commerce clauses of the Constitution, to decide what shall be deemed an obstruction to navigation and, by its action, to abrogate the effect of a judicial decision declaring a bridge unlawful.

**case<sup>2</sup>, n.** 1. Anything intended to enclose or contain something. 2. A box, sheath, bag, or other covering in which something is or may be kept; as, a packing-case; spectacle-case; pillow-case; show-case.

With how in hand, and arrows in a case.  
CHAUVER C. T., *Knight's Tale* l. 1,221.

3. A box and the quantity or number contained in it; a set; as, a case of wine, of glass, of knives, or the like. 4. An outer and enclosing part that protects what is within; as, the case of a watch or clock; the case of a seed-vessel or a pupa; also, the hardened coating of case-hardened steel or iron. 5. *Print.* A wooden tray dividing into compartments called boxes, for keeping separate the letters of a font of type.

Cases for body-type are commonly made in pairs, called

The Matrix-case of a Monotype Composing-machine.

[*CASEIN*.] **case<sup>6</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>7</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>8</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>9</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>10</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>11</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>12</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>13</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>14</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>15</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>16</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>17</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>18</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>19</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>20</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>21</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>22</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>23</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>24</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>25</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>26</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>27</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>28</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>29</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>30</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>31</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>32</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>33</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>34</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>35</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>36</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>37</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>38</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>39</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>40</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>41</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>42</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>43</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>44</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>45</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>46</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>47</sup>, n.** 1. *Chem.* A salt of caseic acid. **case<sup>48</sup>, n.** 1. *Chem.* A salt of caseic acid. 2. A member of any of the fair peoples of the Caucasus  
mountains, including: (1) Kartvelians (Georgians, Min-  
grelians, etc.); (2) Cherkessians (Circassians, Abkha-  
sians, Kabardians); (3) Chechenians; and (4) Lesghians.  
3. The group language spoken by the peoples of the  
Caucasus region; usually classified as (1) North Cauca-  
sian, comprising Circassian, Kistian, Lesghian, and num-  
erous subdialects, which are related geographically rather  
than linguistically, the possessing many points of resem-  
blance; and (2) South Caucasian, including Georgian,  
Armenian, and Persian, with other dialects, the relation-  
ship of which is distinctly recognizable.  
The Caucasian peoples fall into two groups. There is no  
sufficient proof that the several languages are derivable from a  
common parent. It is highly probable that the Caucasians dis-  
tributed here by pressure from the north and south. Th. G. Töcken  
*Intro. to Nat. Hist. of Language* p. 149. [Int. s. box 188.]

cau'-cus, n. I. [U. S.] A private meeting of members  
of a political party to select candidates or concert mea-  
sures for adoption by the party. 2. Specifically: (1) A  
meeting of local voters to nominate for local offices,  
elect delegates to a nominating convention, or the like;  
n. primary. (2) A meeting of representative members  
of a party, as in a legislative body, to determine on a  
policy or on special measures which shall be unitedly  
supported by the party membership in the deliberations  
or actions of the body. 3. Any meeting of similar  
character or for similar purposes, held by business men,  
as railroad officials. 4. [Eng.] A political committee or  
other body, in charge of the management of a canvass or election;  
often used in contempt or reproach; a misuse.  
It was to this supposed imitation of the American political  
'machine' that Lord Beaconsfield gave the name *caucus*, and  
the name came to be used, not in the American sense of a meet-  
ing, but of a closely disciplined system of party organization.

Dr. William Gordon, author of the *History of the American  
Revolution*, writing in 1774, said: "More than fifty years ago,  
Mr. Samuel Adams's father, and twenty others, one or two  
from the north end of the town, where all ship business is  
carried on, used to meet and make a caucus, and lay their  
plan for introducing certain persons into places of trust  
and power." John Pickering, in his *Vocabulary of Words  
Particular to the United States* (Boston, 1816), assumed that  
the word was a corruption of *calkers*, and that *calkers'*  
*meetings* was meant, and he found that old residents of  
Boston and Salem had the same impression. The existence  
of a caucus club in Boston before the Revolution is attested  
in the quotation from John Adams, and Dr. J. H. Trumbull  
suggested in 1872 that the word might be derived from the  
Algonkin *cau'-cau'-u*, one who advises, as Indian names were  
not infrequently adopted, in New England, for  
political societies and clubs.  
This day learned that the *Caucus Club* meets, at certain times  
in the garret of Tom Dawes, the Adjutant of the Boston Regiment.

istence of, or the changes in, some other thing; agent or agency producing a result; as, gravitation is the cause of the stone's falling; malice is a cause of crime. See phrases below.

One of these self-evident, necessary truths is that every change or new existence requires a cause.

MIVART *Nature and Thought* ch. 5, p. 180. [K. P. & Co. 1882.]

2. Any occasion or condition upon the occurrence of which an event takes place; an occasion; a condition; as, darkness was the cause of the man's losing his way; low water in the boiler was the cause of the explosion. See CONDITION; OCCASION.

May there not be more than one cause singly adequate to produce enhanced wages? *Westminster Review* Oct., 1891, p. 354.

3. Any rational ground for choice or action; reason; motive; as, there is cause for joy; cause for complaint. Say first, what cause

Moved our grand parents in that happy state? Milton P. L. h. k. i. l. 28.

4. In a comprehensive sense, all the circumstances (powers, occasions, actions, and conditions) necessary for an event and necessarily followed by it; the entire antecedent of an event; the fundamental and philosophical conception of cause; in general, whatever in reality stands in relations analogous to those between a necessitated conclusion and its antecedent grounds. See CAUSALITY.

The modern conceptions of the nature of cause have chiefly divided into two groups, either that which follows Kant, who regarded cause as an *a priori* form of the understanding, or that which agrees with Hume in denying all knowledge of causal efficiency and regarding the conception of cause as simply the impression made by a uniform sequence of phenomena.

It is generally assumed that when two things are spoken of as cause and effect that their relation is a necessary one, or, in other words, that given the cause the effect must follow. In so far as causation is regarded as necessary connexion, it can form no part of a purely empirical theory of existence. The senses can say only that in all observed cases B follows A and this does not establish necessary connexion.

Encyc. Brit. 11th ed., vol. v, p. 557.

5. A great enterprise or movement supported by moral reasons and motives; an aim or object that engages the special interest, discussion, or efforts of an individual, association, or party; an important principle or aim; as, the cause of charity; the temperance cause. Then conquer we must, when our cause it is just.

6. Law. (1) A ground of action. (2) An action or suit conducted in a court, or an entire judicial proceeding. 7. Civ. Law. The consideration of a contract; the motive of the party for entering into it. 8. [Archaic.] Behalf; interest; as, for his cause. 9. [Archaic.] The object or end toward which action is directed; purpose; aim. See FINAL CAUSE, under ARISTOTELIAN CAUSES, below. [F., < L. *causa*, cause.]

SPAN. action, agent, antecedent, author, causality, causation, condition, creator, designer, former, fountain, occasion, origin, originator, power, precedent, reason, source, spring. The efficient material, or substantial cause, that which makes anything to be or to become, is the common meaning of the word, as in the saying, "There is no effect without a cause."

Every man instinctively recognizes himself acting through will as the cause of his own actions. The Creator is the Great First Cause of all things. A condition is something that necessarily precedes a result, but does not produce it. An antecedent simply precedes a result, with or without any agency in producing it; as, Monday is the inevitable antecedent of Tuesday, but not the cause of it. The direct antecedent of a cause is effect, which is the antecedent of a consequent. A cause is sufficient to produce its effect, as Aristotle says, the four following forms, as given by Aristotle: (1) formal c., the conception or idea of that which is to be realized, whether this idea exists in the nature of things or in the mind; (2) material c., that which is to be wrought upon by the idea, or formal cause; (3) efficient c., the force or agent that does the work; (4) final c., the object or end to be reached by the process. This division is architectonic and may be illustrated by the process of building, which involves (a) a plan, (b) some kind of material, (c) workmen, and (d) a completed and serviceable structure.

centrifugal c. (Bot.), the interaction of one cell of a multicellular organism with the rest of the cells regarded as the determining factor of its differentiation and development. — centrifugal c. (Bot.), the physical environment in which a cell or an organism lives regarded as a causative factor in the cell-development. See CENTRIFUGAL CAUSE. — First C., God as uncaused and as the original source of all power, change, motion, and life: styled by Plato and Aristotle the Prime Mover. — for c., in law, for good and sufficient reason. — for one's c. [Archaic], for one's sake; for one's advantage; as, "I did it not for his cause." 2 Cor. vii. 12. — Immanent c., in Spinoza's philosophy, a cause which works within, and is intrinsic to, that which produces as its effect. — Independent c., in Spinoza's philosophy, a cause not clearly sufficient to produce its effect. — occasional c., in See OCCASIONAL. 2. Occasionalism. — proximate c., a cause directly producing a result; specif., in law, the direct, immediate cause to which a loss is to be attributed; distinguished from the remote cause. — second c. (Theol. & Philos.), a cause other than the First Cause and itself an effect of that cause. — short c. (Law), a case which the court will permit to be advanced for hearing upon proof that such case will take no more time than that allowed by the court's rules. — testimonial c. (Law), a case coming under the jurisdiction of probate courts, dealing with wills, testamentary documents, etc. — to make common c. with, to take the same side with; engage in anything with. — transient c., in Spinoza's philosophy, a cause producing an effect differing from itself.

Collectively, troops trained primarily to maneuver and fight on horseback; that arm of the military service consisting of mounted soldiers; distinguished from mounted infantry by the fact that the horse to expedite transportation instead of for direct attack.  
In European countries mounted troops are usually divided into heavy cavalry and light cavalry (variously designated as cuirassiers, dragoons, hussars, lancers, etc.), according to their weight and equipment, and are organized in troops, squadrons, and regiments.  
The views now current as to the tactical employment of cavalry contemplate the employment not only of divisions but of whole cavalry corps, forty to sixty squadrons strong, and these may be called on to fulfil the most various missions. The farthest and swiftest reconnaissances are the province of light cavalry, i. e., hussars, the most obstinate attack and defence of localities, the task of dragoons, and the more defensive charges on the battle-field essentially the duty of the heavy cavalry.

cles, in some of the lowest organisms, etc., as is the nucleus to certain unicellular organisms. The whole organism in certain lower animals and plants is composed of, and all forms of life originate in, a simple cell, and the tissues of the more developed structure are an aggregate of cells and their products. The cells of the human body are from 1/100 to 1/1000 of an inch in diameter.

These particles into which all primitive tissues break up are called cells.

4. A small chamber, enclosed space, or cavity, as those hounded by the veins or nerves on the wing-surface of an insect's wing, in the ethmoid bone, in a porous substance, honey-comb, etc.; an areola; a loculus. 5. One of the cases or cup-like cavities containing an individual zoid, as in polyzoans. 6. Elec. A single element of a voltaic battery, consisting usually of a jar containing a liquid in which two metals are immersed. For the different varieties, see BATTERY. 7. Optics. A frame or shallow box, hold a microscopic object during examination. 8. One of the ventricular cavities in the brain, formerly supposed to be the seat of special mental faculties. 9. A link in a chain of periods. 10. A space within a primitive paralogram of periods. 11. Aero. Any part of a cellular construction. 12. Typog. (1) One of the series of small rectangular apertures in a braile guide through which are impressed the groups of embossed points representing letters, etc. (2) The rectangular space required for these points. 13. Archeol. The inner space found in megalithic structures which is enclosed by stones and roofed by a slab. 14. Spectroscopy. A glass vessel to hold liquids whose absorption of light is to be studied. absorption-cell. 15. A water-tight compartment between the inner and outer shell of a steamship. 16. Physics. In kinematics, a combination of links in symmetrical form. 17. Engin. A girder or truss compartment. 18. Musical Acoustics. A four-toned harmonic unit containing a fundamental tone, a fifth and a two-thirds. 19. A small monastery or nunnery dependent on a larger one. [C.] OF. cello, < L. cella, small room.] cellet, n. Syn.: prison, ndo-morphous cell, a central cell. See below. —adhesive c., a specialized cell present upon the tentacles of ctenophora and having a glandular character. —nlar c. (Cytol.), a cell at the basal angle of a moss-leaf. —aluminum c. (Elec.), a cell having aluminum electrodes in a mixture of sodium potassium tartrate, citric acid, and alum, serving to rectify an alternating current. —cadmium c., an electric cell having cadmium for its positive element; sometimes employed as a standard of electromotive force. —cal-nal'cell', n. Same as NECK-CELL. —capc., n. Bot. In angiosperms, one of the sister cells in the upper layer of the embryo-sac to the ovule which are compacted as the embryo-sac enlarges and for a time form an cap on its apex. —c. bridge, n. Bot. Any of the protoplasmic threads uniting the protuberant formation. —Same as CYTOGENESIS. —c. layer, n. Same as OERM-LAYER. —c. mass, n. A close, distinct aggregation of cells. —c. nestling, n. Med. The occurrence of pearly nodules or epithelial pearls in epithelioma. —c. parasite, n. A microscopic parasite that inhabits a single cell, as a coccidioid protozoan. —c. parasitism, n. —c. plate, n. A membranous formation appearing in direct cell-division and marking the last stage before final separation of two newly formed protoplasts. —c. sap, n. The hyaloplasm or watery fluid of a cell. It constitutes the bulk of the protoplasm. —cells of Corti, n. form of cells found upon the organ of Corti. —c. spot, n. A color-spot found in lepidoptera in the area of the wing-cells. —c. tester, n. Elec. An instrument for testing the condition of voltaic cells. —c. theory, the theory that the tissues of animals and plants consist of cells which are developed from preexisting cells. —central c. 1. Zool. One of the columnar cells lining the lumen of the gastric glands; believed to secrete pepsinogen. chief c.; peptic c. 2. Cytol. The archeogonium venter cell from which the oosphere (ovum) is formed. —Clark c. (Elec.), a cell adopted as a standard of electromotive force, consisting of mercury and zinc, with mercurous sulfate as the excitant and depolarizer. —columnar c. (Histol.), n. cell whose length is greater than its width, and which usually possesses a microscopic quadrilateral form. —c. (Bot.), any of the cells connected by elongated pores with the phloem sieve-tubes and originating from the same cells as the corresponding sieve-tube segments. Companion cells are filled with granular protoids and occur only in angiosperms. Each cell has a well-marked nucleus. —contractile c., one of the miter-wall cells which, by their sensitiveness to moisture, produce dehiscence of the anther. —contractile c., same as MYCETOPHYTES. —cuboid c. (Histol.), a cell which is distinguished from a polyhedral cell by having all its dimensions nearly equal. —Delters's cells. Anat. 1. Peculiar cell-structures between the outer hair-cells of the organ of Corti. 2. Nucleated cells found at the intersection of the fibers of the white substance of nerves. GOWD, Med. Dic. 3. Cells found in the skeleton-work of the brain and spinal cord, especially in diseased brain-tissue. —dendromorphous c., a parietal cell. —digestive cells, epithelial cells of hydromedusae performing the function of digestion and excretion as evidenced by the presence of particles of food and of excrementitious matter in them. Some of these are also vacuolated and possess amoeboid properties. —dry c. (Elec.), a voltaic cell with its electrolyte distributed in plaster or other porous substance. —dynelectron c. (Elec.), a primary cell so constructed that its action will not take place except at high temperature. —engraved c., a white blood-corpuscle which has moved from the interior of a capillary into the neighboring tissues. —ectomorphous cells (Anat.), spaces present in the ethmoid bone which are lined with mucous membrane. —false c., n. post-discoidal areola present upon the wings of lepidopterous insects. —ganglion c., see GANGLION. —germinal c., a large spherical cell of ectodermic origin which undergoes karyokinesis, giving rise to blastoderm or ganglion c. —giant c., any cell of unusual size. —glandular c. myeloplax or an osteoclast. —gland c. (Anat.), a secretory cell. —goblet c., one of the peculiar cells that occur on mucous membranes. It becomes enlarged at its free end, and finally ruptures, discharging mucus. —beaker c.; chalice c.; —granule c., n. Anat. A variety of

Typical Cell.

a, vacuole; b, protoplasmic membrane; c, colored granules; d, cytoplasm; e, attraction spheres enclosing the centrosomes; f, nucleolus; g, centriole; h, leucoblasts; i, plasma of nucleus; j, nuclear membrane.

pliment-cell characterized by pigment-granules distributed throughout its body and processes. —gravity c., n. Elec. A cell with a zinc electrode in dilute sulfuric acid and a copper electrode in concentrated sulfuric acid, the former solution floating on the latter because of its smaller specific gravity. Compare GRAVITY-BATTERY, under BATTERY. —grove c., no elementary galvanic cell consisting of platinum and zinc acids contained in a porous cup as one component, and zinc and dilute sulfuric acid as the other in which the cup is placed. Compare HARTLEY-HARTS c., a contrapolarisolegram formed of jointed links. —Hansen's supporting cells, cells on the outer side of the outermost of Delters's cells. —Interstitial c., a nearly spherical cell found in the ectoderm of hydroid polyps. —Jacques c. (Elec.), a cell in which the elements are carbon, iron, and fused sodium hydrate. —Lalande-Chapron c. (Elec.), a cell having zinc and copper-oxide electrodes in a caustic soda solution. —Lalande-Chapron c., n. A last-cell. —Meldinger c., a voltaic zinc-copper cell with mercurous sulfate and copper sulfate solutions; similar to the Daniell cell. —parietal cells (Anat.), secreting cells situated between the basement membrane and the central cells of the gastric glands. —pavement c. (Histol.), a flat, polygonal cell found in epithelium or endothelium. —Peaucellier c., a form of linkage, the first that accurately solved the problem of parallel motion; invented by Lieut. Peaucellier in 1864. —pericardial c. (Entom.), a cell associated with the hearts of insects and regarded as possessing blood-purifying functions. —polarization c. (Elec.), an electrolytic cell in which the electrodes are adapted to become polarized upon the passage of a current. —prickle c., one of the cells of the deeper layers of the epidermis, which is beset with peripheral extensions like spines. —provost c., n. Mil. A cell attached to a guard-room for the temporary confinement of military prisoners. —psychic cells, those cells of the brain that are thought to be connected with the higher mental functions. —Purkinje's cells, large flask-like cells found in the deep layers of the cortex of the cerebellum. —pyramidal c., see PYRAMIDAL. —royal c., a cell in which young queen bees are reared. —quaco-cell. —Ruhmer c., a vacuum bulb containing two conductors with a film of selenium between them by means of which electric conductivity is increased. In the presence of light-rays: used in giving light-signals. —scavenger cells, the lymph-cells present in the tissues and regarded as carriers of waste materials. —Schwann c., one of the cells in the sheath of Schwann. See SNAKE-CELL. —selenium c. 1. A photo-electric couple of selenium and other metal, usually copper, producing an electric current under the action of light. 2. A mass of crystalline vitreous selenium the resistance of which is reduced by placing it between the edges of broad brass conducting strips; a selenium resistance: used in the photophone. —sensory c., a cell entering into the formation and performing the function of peripheral sense-organs. —stellate c., a connective-tissue cell having projections from the body of the cytoplasm, as neuroglia cells of nervous tissue. —supporting cells, same as DELTERS'S CELLS. —sustentacular cells, epithelial cells serving as a support upon which other more specialized structures are superimposed. —tipping c. (Electrolysis), n. cell made to oscillate so as to displace a mercury electrode and then to make and break a current at stated intervals. —transition c. (Entom.), a form of cell in the trachea of locusts marking the transition from the tracheal to the tracheolar cells. —wandering c., see WANDERING.

cel, 1 sel'es; 2 cel'ar, n. [L. cel, 1; 2, cel, n. Arch. The enclosed interior of a temple. 2. Anat. A cavity; as, the cella media of the brain. [L., small room.] cel'lar-form, a. Same as CELLULAR.

cel'lar, 1 sel'es; 2 cel'ar, a. Of or pertaining to a cell.

cel'lar, n. 1. A room or enclosed space partly or wholly below the surface of the ground, and usually under a building: used as a place of storage.

Down in the cellar merry hoisted things  
Shoulder'd the epigeot, straddling on the butt.

2. A room for storing wines; by extension, the vines themselves; as, his cellar is famous. 3f. A case for bottles. 4f. A storehouse for provisions, above or below ground: extant [Dial., Eog.] in the word fish-cellar. [C.] F. cellar, < L. cellarium, pantry, < cella, cell.] cel'lar-er, 1 sel'es-er; 2 cel'ar-er, n. A cellar or system of cellars; accommodation in cellars; a place for storage in a cellar. cel'lar-er, a. Put in; in a cellar, as wine. —cel'lar-ing, n. 1. A system of cellars; cellarage. 2. The storing of goods in cellars. —cel'lar-ous, a. [Rare.] Belonging to or like a cellar. —cel'lar-way', n. A passage to or through a cellar.

cel'lar, pp. Cellared.

cel'lar-er, 1 sel'es-er; 2 cel'ar-er, n. 1. The official keeper of the cellar of a monastery or the like. 2. A server of wine; a butler, as in a monastery.

I shall remember — whoever I have the pleasure of entertaining you, that I am cellarer of the time.

Geo. Manwaring Epist ch. 20, p. 185, in 1860.

3. One who keeps a wine-cellar; a wine-merchan. [C.] F. cellierier, < L. cellarius, < cellarium; see CELLAR, n.] cel'lar-er; cel'lar-ist; cel'lar-er.

cel'lar-ess, n. [Rare.] A female cellarer.

cel'lar-et, 1 sel'es-et; 2 cel'ar-et, n. A case or small cabinet for bottles or decanters, glasses, etc. cel'lar-et-er, 1 sel'es-et-er; 2 cel'ar-et-er, n. pl. Hd-minth. A family of escharoiden polyzoons with the zoarium adnate and zoecia immersed.

having the head, arms, and body of a man from the waist up, united to the hind quarters of a horse are joined to a complete human body. See CHIRON, ICHON, LAPITHÉ, NESSUS.

2. Figuratively, a person or thing viewed as an incongruous union of diverse natures. 3. [*< Cen.*] Centaurus, centaur, perhaps *< kenté, goat*;—cen'taur-dom, n. The condition of centaurs.—cen'taur-esque, n. Having the style of a centaur.—cen'taur-ess, n.—cen'taur-ial, a. Of or pertaining to a centaur.—cen'taur-ian, a. Having the nature of a centaur.  
cen'taur-ist, n.—cen'taur-ize, v. [*< Rare.*] To behave as brutally as a centaur.—cen'taur-like, a.

Cen'tau-re-a, 1 sen-tá-ré; 2 cén'tá-ré-a, n. Bot. 1. A very large genus of Old World herbs of the aster family, chiefly perennial; the star-thistles. They have radical or alternate leaves and solitary or panicle heads of usually purplish tubular flowers. Several European species are roadside weeds in the United States or are cultivated in old gardens. See ILLUS. under BLUEBOTTLE. 2. [*< A*] A plant of this genus. [*< L. centaurum, < Gr. kentauron, < kentau-ros, centaur.*]

cen'tau-rin, cen'tau-ríle, 1 sen-tá-rín, -rít; 2 cén'tá-rín, -rít, n. Same as ERYTHROCENTAURIUM.

cen'tau-rom'a-ehy, 1 sen-tó-rom'-a-ehy; 2 cén'tá-rom'-n-ey, n. A battle between centaurs, or between centaurs and men; a subject treated in Greek mythology and art. [*< L. Centauromachia, a poem, < Gr. Kentauromachia, < kentauros, centaur, + maché, fight, < machomai, fight.*] cen'tau-ro-má-chi-at.

cen'tau-ry, 1 sen-tá-ry; 2 cén'tá-ry, n. [*< RIES, 1-riz; 2-ris, pl.*] 1. One of various herbs of the gentian family, as of the genera *Sabbatia* and *Erythraea*, and *Chlora perfoliata*; especially, *Erythraea centaurium*. 2. A centaurea. 3. A milkwort (*Polygala polygama*). [*< L. centaurum; see CENTAUREA.*] cen'tau-ry, n.—American centaur, any species of *Sabbatia*, especially the rose-pink (*S. angulata*). American red centaur;—lesser centaur, the European garden annual *Erythraea centaurium*. cen'tá-ry, 1 cén-tá-ry; 2 cén-tá-ry, n. 1. [*< Sp. & Am.*] A small sick or copper coin of Central and South America, in value from six-tenths of a cent (actual) to one cent (nominal); the hundredth part of a peso. cen'tá-ry, cen'té-ry, cen'tes-í-m-ot. 2. A Portuguese coin. [*< RIES, 1-riz; 2-ris, pl.*] 3. A Spanish coin. See cen'té-na-ri-al, 1 sen-té-ná-ri-al; 2 cén'té-na-ri-al, a. [*< Rare.*] Of or pertaining to a centenary or centennial.

cen'té-na-ri-an, 1 sen-té-ná-ri-an; 2 cén'té-na-ri-an, n. Of or pertaining to the age of a hundred years, or to a centenary. [*< L. centenarius; see CENTENARY, a.*]

cen'té-na-ri-an, n. One who has reached the age of a hundred years.—cen'té-na-ri-an-ism, n. The state of being a centenarian.

cen'té-na-ri-us, 1 sen-té-ná-ri-us; 2 cén'té-na-ri-ús, n. [*< 1-ni; 2-i, pl.*] [*< L.*] *Salic Lnw.* The chief of a hundred, probably chosen by the people.

cen'tén-a-ríze, 1 sen-tén-a-ríz; 2 cén'tén-a-ríz, et. [*< RIZEN; -rízing.*] To honor with a centenary celebration.

cen'té-na-ry, 1 sen-té-ná-ry; 2 cén'té-ná-ry, a. 1. Of or pertaining to a hundred or a period of a hundred years. Careful writers often make the adjective *centenary* refer to 100 and *centennial* to 100 years; as, a *centenary* (or hundredth) celebration; a *centennial* celebration on the hundredth anniversary. A centenary may be a period of a hundred years; a *centennial* is the close of that period or its commemoration.

2. Of or pertaining to a county subdivision, the hundred of a shire or pagus, as in England; as, *centenary* deputies. [*< L. centenarius, < centeni, a hundred each, < centum, hundred.*] cen'té-na-ri-ous.

cen'té-na-ry, n. [*< RIES, 1-riz; 2-ris, pl.*] 1. A hundredth anniversary or its celebration; centennial occasion. 2. A hundred years in the life of a person or institution; a period of a hundred years; centennium. 3. [*< Rare.*] A centenarian. 4. A hundredweight.

cen'tence, n. A sentence.

cen'té-nier, 1 sen-té-ní-er; 2 cén'té-nér, n. [*< F.*] 1. In the Channel Islands, a constable. 2. A centurion.

cen'tén-ní-al, 1 sen-tén-ní-al; 2 cén'tén-ní-al, a. Of or pertaining to a hundredth anniversary; a hundred years old or more; completing a century; as, a centennial celebration. [*< L. centum, hundred, + annus, year.*]

Under this ancient olive-tree, that spreads its broad centennial branches like a tent, Let us lie down and rest.

—Centennial State (*U. S. Hist.*), Colorado, because admitted into the Union in 1876, the hundredth year of American independence.—cen'tén-ní-al-ly, adv.

cen'tén-ní-al, n. The hundredth anniversary of an event, or its commemoration; a centenary: first applied to the United States Centennial Exhibition of 1876.—cen'tén-ní-al-ly, r.

cen'tén-ní-um, 1 sen-tén-ní-um; 2 cén'tén-ní-um, n. A century.

cen'tér, 1 sen'tér; 2 cén'tér, v. [*< CEN'TERED or CEN'TRE, < F. cen'trer; < CEN'TRE, < CEN'TER-INO or CEN'TRING.*]

1. 1. To place in the center; fix on a center; supply with a center.

2. To draw to a center; concentrate. 3. To determine the center of; shape (a lens) so as to have it thickest in the center.

II. 1. To be in the center. 2. To gather or converge in a center.

Mani know thyself. All wisdom centres there. *Young Night Thoughts* iv, l. 484.

cen'tér, } the extremities, or from the different sides of anything; the middle; os, the center of the town; the center of the throng.

Had earth been then, all earth Had to her centre shook. *Milton P. L. bk. vi, l. 217.*

2. The point, object, or place about which things cluster or to which they converge; a fixed point or line about which a thing or things revolve; point of attraction or convergence; focal point; as, the center of interest.

Athena was the intellectual centre of Greece, and of ancient Europe. *T. E. Mac Democracy in Europe* vol. i, p. 70. L. & S. 1889.

3. The point of divergence, emanation, or radiation; nucleus; origin; as, the center of corruption. 4. *Geom.* The middle point of a closed curve or surface; properly, a point such that any straight line drawn through it will meet the curve or surface at equal distances on each side of the point. 5. The part of a target next the bull's-eye, or a shot striking this part. 6. *Anat.* (1) A region of special activity; as, a center of ossification. (2) An aggregation of nerve-cells related to some special physiological function; as, the respiratory center. 7. [*< C.*] In Continental legislatures, the members sitting on the middle benches and holding usually intermediate views between the Left, or Radicals and Liberals, and the Right, or Conservatives; in Germany, the Clerical or Ultramontane party. The Moderate Conservatives and the Moderate Liberals are often called respectively the *Right* and the *Left Center*, whether acting with or independently of the Ministry. 8. A leader, as among the Fenians, the chief one being the *head center*. 9. *Mil.* (1) The middle part of an army in order of battle, occupying the front between the wings. (2) The middle soldier in a line. 10. *Naut.* In the order of sailing of a fleet, the division between the weather and the lee; in line of battle, that between the van and the rear. 11. *Arch.* The support, usually a timber framework, of an arch, or of a concrete lintel, floor, roof, or dome, while building; centering. 12. *Steam-engine.* One of the two points in the rotation of a crank at which the middle points of the crank-pin, the crosshead-pin, and the main shaft are in line. 13. *Physics.* The point in which the entire mass of a body or system of bodies could be concentrated without affecting some particular result; as, the center of gravity; center of oscillation. See phrases. 14. *Mech.* One of two conical points, as in a lathe, between which an object is held and rotated on an axial line. The one at the end from which the object is rotated is the *live-center*, the other the *dead-center*. 15. The person who takes the middle position of the forward line in many athletic games, as football, basketball, etc. 16. Same as *CENTER FIELD*, *CENTER-PIECE*. 17. One of the standard openings in the game of checkers. 18. A thin piece of celluloid or similar material used as a foundation for the sharp point of compasses. [*< F., < L. centrum, < Gr. kentron, < kenté, prick.*]

SEN: middle, midst. We speak of the center of a circle, the middle of a room, the middle of the street, the midst of a forest. The center is equally distant from every point of the circumference of a circle, or from the opposite boundaries on each axis of a parallelogram, etc., the middle is more general and less definite. The center is a point; the middle may be a line or a space. We say at the center in the middle. Midst commonly implies a group or multitude of surrounding objects. Compare synonyms for AMID.

ANT: circumference, perimeter, rim.

—accelerating center, the nerve-center situated in the medulla oblongata whose stimulation produces increased cardiac action.—apperception c., any cortical center to which are hypothetically assigned the functions connected with the mental process of clear perception.—association c., any cortical area whose function is to associate the functions of neighboring or more distant areas.—auditory c., the center for the auditory nerve. See under AUDITORY.

Broca's c., same as *SPERKEN-CENTER*.—cen'tér-bar, n. The arbor of a drill-press or some similar machine.—c. bil, n. See *BIT—c. chisel*, n. A sharp-pointed cold-chisel for marking a starting-point, as for a drill.—c. chuck, n. *Mech.* A lathe-chuck with a hardened cone field and a projecting driver, screwed on the mandrel.—c. field (*Baseball & Cricket*), the middle portion of the outfield.—c. felder, n. *Baseball*. The player at center field.—c. fire, n. Having the fulminate in the center, instead of about the edge of the head of the cartridge.—c. race, n. 1. An outside angle-gage for lathe-center points. 2. In car-building, a gage for fixing the center of length of an axle.—c. lathe, n. *Mech.* 1. A lathe in which the work is carried in centers: the ordinary form. 2. A pole-lathe.—c. of action (*Meteor.*), a term applied to each of certain large areas of high or low barometric pressure that are more or less permanent through a season of the year. Variations in their intensity or position are associated with wide-spread weather changes.—c. of a focus, a point bisecting all chords of the focus drawn through it.—c. of area, 1. In an area of regular shape, the geometrical center. 2. In any area, the center of gravity.—c. of a sheaf (*Math.*), a point through which all its lines or planes pass.—c. of attraction, a point toward which attracting forces are directed; figuratively, a person or object that attracts the regard of all.—c. of Budge, a nerve-center located in the lumbar region of the spinal cord, whose stimulation causes penile erection in males and uterine contractions in females.—c. of buoyancy, the center of mass of the volume of water that a floating body displaces.—c. of cavity, a metacenter.—c. of collection, the joint in the same straight line with each pair of corresponding points of two perspective figures.—c. of compression, in a body under stress, the point at which the resultant of the compressive forces acts; the compressional center of gravity.—c. of contact, the intersection point of two lines drawn tangent at two contact points of two plane curves or conics.—c. of conversion, the point about which a body turns under the force of an impact.—c. of curvature, the center of the osculating circle of any point of a curve.—c. of effort, that

theoretical point at which the force of the wind, if it could be applied there, would impel a vessel in the same way as if uniformly distributed among all the sails.—c. of figure (*Math.*), a point which is at the mean distance of all points of the figure from any plane of the figure.—c. of flotation, the geometrical center of a section produced by the intersection of a plane, represented by the surface of the water, with a body floating in the water. Compare METACENTER.—c. of form, the geometrical center as opposed to mechanical centers such as those of gravity or oscillation.—c. of friction, n. point in the base of a body which is revolving around a vertical axis, the base acting as a bearing, upon which the whole weight of the body could be concentrated without changing its present frictional resistance to rotary motion.—c. of gravity, see CENTER OF MASS.—c. of gyration, a point in which the whole mass of a body might be concentrated without altering its moment of inertia.—c. of homology, the intersection of the junction-lines of corresponding points in two homologous figures.—c. of homothety, same as CENTER OF SIMILITUDE.—c. of immersion, same as CENTER OF BUOYANCY.—c. of inertia, same as CENTER OF GRAVITY.—c. of inversion, c. of involution, see under INVERSION, etc.—c. of lateral resistance (*Naval Arch.*), the resultant center of the water-pressures which act in an opposite direction to the sidewise pressure caused by the action of the wind on the sail.—c. of mass, the point in which a body acted on by gravity or other parallel forces is balanced in all positions: commonly but incorrectly called the center of gravity.—c. of mean distances (*Math.*), a point in a line of which the algebraic sum of its distances from a series of other points on the same line is equal to zero.—c. of motion, that point in a body which remains at rest while all the other parts of such body continue to revolve around it.—c. of oscillation, the point in which the whole mass of a pendulum were concentrated if it would oscillate in the same time that it actually does.—c. of ossification, the point from which the ossification of a bone starts.—c. of percussion, that point in which a body rotating round an axis might be struck without causing any pressure on the axis.—c. of perspective, same as CENTER OF COLLINATION.—c. of population, the point in a country on which its map would balance were it made of sheet metal and varied in thickness proportionately to population. Thus, in calculating the center, the distance of a region as well as the number of its inhabitants must be taken into account. The center of population in the United States was in 1790 23 miles east of Baltimore, Md.; in 1890 it had moved to a point 20 miles east of Columbus, Ind., and in 1910 it was located in the western part of Bloomington, Monroe county, Ind.—c. of pressure. 1. *Physics.* A point in a body at which the application of a given force will produce the same result as the same pressure when distributed over the body. 2. *Specif.* (1) The point of a body that must receive support in order to retain equilibrium when a wind is blowing upon its surface. (2) the point in a surface immersed in a fluid at which a pressure equal to that of the fluid, if exerted in a contrary direction, will balance or counteract the pressure of the fluid. 3. The point at which an aeroplane surface is intersected by the resultant of all the pressures acting on the surface. ORVILLE WRIGHT.—c. of projection, 1. Any one of several motor and sensory areas or centers in the brain-cortex. 2. A point from which straight lines are drawn to all the points, and planes to all the lines, in a geometric figure.—c. of resistance, in a joint, the intersection of the resultant stress with the joint.—c. of similitude (*Math.*), the point in which all the straight lines connecting corresponding points in two similar geometric figures which are similarly or oppositely placed.—c. of spherical curvature, the geometrical center of an osculating sphere.—c. of symmetry, the center of a symmetrical figure.—c. of tension, in a body under tension, the point at which the resultant of the tensile forces may be assumed to act.—c. of vision. 1. The point of keenest vision upon the retina of the eye; the yellow spot or macula lutea. 2. Same as POINT OF VIEW.—cen'tér-plece, n. An ornament in the center of a ceiling, table, etc., or between other ornaments.—c. pin, n. *Mech.* A pin which is at the center of rotation of the object which it supports.—c. plate, n. *Mech.* Any plate serving as a central support, etc.—c. prop. 1. *Mech.* A center-punch. 2. A mark made by a center-punch in a piece of metal to be drilled.—c. saw, n. A sawing-machine that rips logs radially toward their center, as for spokes, ax-handles, etc.—c. seal, n. Same as CENTER-VALVE.—c. second, a. Having the second hand mounted on the same arbor as the other hands.—c. square, n. An instrument which, when adjusted, finds the center of a circle.—c. table, n. A table for the center of a room.—c. tester, n. An apparatus serving to locate accurately the center of a piece of work in a lathe and also for verifying the exactness of the center of a lathe.—c. valve, n. In gas-making a large four-way valve allowing the gas to separate into the producer, c. vent, n. Same as CENTER OF EFFORT.—c. dead c., same as CENTER.—c. diaphetic c., the nerve-center in the floor of the fourth ventricle of the brain, that controls carbohydrate digestion and assimilation, and that when diseased or injured gives rise to diabetes.—direct c. of similitude, a center of similitude which has the perspective seats, which correspond to each other, occurring on the same side of it.—eruptive c. (*Geol.*), the locality in a volcanic region where the eruptive activity is the greatest; a place whence volcanic rocks issue.—genital or genitospinal c., same as CENTER OF BUNGE.—gustatory c., same as CENTER OF TASTE.—c. of the gyri, the nucleus in the brain, which receives the sensory impressions of taste.—heat c., n. *Physiol.* A nerve-center that controls or regulates the heat of the body. A center for the production of heat (thermogenic c.) is thought to exist in the optic thalamus or corpus striatum of the brain, and one for lowering heat (thermolytic c.) in the medulla oblongata.—instantaneous c. 1. *Mech.* A point about which a moving part in a mechanism is supposed to rotate at a given instant. 2. *Kinematics.* The intersection of the instantaneous axis with the guide plane in motion of two dimensions.—killing c. (*Embryol.*) the centrosomes or centrospheres at the poles of the nucleus of the fertilized ovum.—motor c., any nerve-center that controls muscular action; often used specifically for the centers along the fissure of Rolando of the brain that, through the spinal cord, induce muscular contraction.—olfactory c., the nerve-center in the brain which receives the impressions of smell, thought to be situated in the cortex of the hippocampal gyrus.—oval c., the white matter of the cerebrum when the upper parts of the cerebral hemispheres are removed.—pneumatic c., the central tegmentum of the diaphragm.—psychical c., one of those aggregations of nerve-cells in the brain that are not motor, sensory, or sensory-motor, but which deal with higher mental functions.—speech c., the cortical area specially concerned with the movements necessary for articulate speech.—thermogenic c., thermolytic c., see under HEAT CENTER.—virtual c., same as INSTANTANEOUS CENTER.—visual c., the center in the brain that controls the faculty of sight; apparently situated in the cuneus.

en'tring, n. See CENTERINO.  
en'tri-olc, 1 sen'tri-öl; 2 cên'tri-öl. n. Embryol. A granule  
in the center of an attraction-sphere, regarded variously as  
the center.

**cer'a-sitc**, 1 ser'o-soit; 2 cër'a-sit, n. *Mfneral.* 1. A variety of ilolite from Japan characterized by symmetrically arranged inclusions. 2. A cherry-shaped fossil. [*L. cerasus*; see CHERRY, n.] **ker'a-sifctc**.  
**ce-ras'tes**, 1 si-ra's-tiz; 2 ce-ras'te-as, n. [L.] A bormed viper.  
**Ce-ras'ti-um**, 1 si-ra's-ti-um; 2 ce-ras'ti-um, n. *Bot.* A large genus of slender pubescent herbs of the plack family — large gnouss-eat chiekweeds — bearing terminal cyms of white flowers which are fragrant or bilid petals.  
**Cer'a-u-sis**, 1 ser'o-us; 2 cër'a-us, n. *Zool.* Same as PRINUS.  
**cerat**, abbr. See ABBREVIATION.  
**cer'a-ta**, 1 ser'a-to; 2 cër'a-ta, n. *pl.* *Zool.* Literally, horns; the papillae on the backs of *Ceratobranchia*. [*< Gr. keras*, born.].  
**ce'rate**, 1 s'rët; 2 cër'at, n. *Ornith.* Having a cere. [*< L. cero, pop. ceratus, wax, < cera, wax*].  
**ce'ratec**, 1 s'rë't; 2 cër'at, n. *Pharm.* A compound of oil or lard with wax, spermaceti, or resin, to which medications are often added: used for blisters, wounds, etc. Cerates are intermediate between ointments and plasters, and their consistence should be such that whea spread upon leather or cloth at ordinary temperatures they will not be melted by the heat of the skin.—blistering cerate, a cerate made of spermaceti and cantharides.—Goulard's e., a cerate mixed with lead subacetate.—Hufeland's e., a cerate mixed with zinc oxid.—simple e., 30 parts of white wax, 60 of lard.—spermaceti e., a cerate of white wax, olive oil, and spermaceti.  
**ce'ratec**, 1 ser'b; 2 cër'at, n. Same as CERATOTITE.  
**ce'ra-tec-ta-si-a**, 1 ser'a-tek-të'-p-o or si-a; 2 cër'a-tek-të'-zhi-a or si-a, n. *Pathol.* Protrusion of the cornea.  
**ce'ra-tec-to-my**, 1 ser'e-tek'to-m; 2 cër'a-tek'to-my, n. *Surg.* Excision of the cornea, either wholly or in part.  
**ce-reec-to-my**. [*< Gr. kera(t)s*, horn, + ekton, cutting].  
**ce'rat-ed**, 1 s'rët-ed; 2 cër'at-ed, a. Covered or coated with wax.  
**ce'ra-ten'chy-ma**, 1 ser'a-ten'ky-me; 2 cër'a-tëg'y-me, n. *Bot.* A tissue of horny texture composed of worn-out sieve-cells. [*< Gr. kera(t)s*, horn, + enchymo, infusion].  
**Ce'ra-ter'pe-tum**, 1 ser'a-tër-pi-tum; 2 cër'a-tër-pe-tum, n. Genus of fossil salamander-like microscuran amphi-blans, characterized by wanting horns growing on the posterior cranial bones, occurring in the coal regions of Ohio and Ireland. [*< Gr. kera(t)s*, horn, + herpeton, reptile].  
**ce'ra-ti'a-sis**, n. Same as KERATIASIS.  
**Ce'ra-ti'i-de**, 1 ser'a-ti'i-dë; 2 cër'a-ti-i-dë, n. *pl.* Ich. A family of pediculate fishes without ventral fins, represented by many deep-sea species. Ce-ra-ti'i-as, n. (t.g.) [*< L. < Gr. keratias*, < keras, horn.].—ce-ra-ti'i-d, a. & n.  
**Ce'ra-tin**, ce-ra'ti-nize, etc. Same as KERATIN, etc.  
**ce'ra-ti-na**, 1 si-ra'ti-ne; 2 ce-rät-i-na, n. The horn-layer or epidermis.  
**ce'ra-tin**, 1 ser'a-tin; 2 cër'a-tin-a, I. Of or pertaining to ceratin; epidermal; horny. —ce'ra-tin-oust, a. [Rare.] Sophistical; in allusion to the old fallacy that one who has not lost horns has them yet.  
**ce'rat'i-old**, 1 si-ra'ti-old; 2 ce-rät-i'öld. I. a. Of or pertaining to the *Ceratidae*. II. n. One of the *Ceratida*. [*< L. ceratius (< Gr. keratias*, a fish, < keras, horn) + -oid].  
**ce'ra-tiont**, n. 1. The operation of waxing. 2. The softening of any hard substance not fusible.  
**ce'ra-tite**, 1 ser'a-tait; 2 cër'a-it, n. An ammonite of the genus *Ceratites*. [CERATITIS].  
**Ce'ra-ti'ti-da**, 1 ser'a-ti'ti-da; 2 cër'a-ti'ti-dë, n. *pl.* See *Ce'ra-ti'ti-dre*, 1 ser'e-ti'ti-di; 2 cër'a-ti'ti-dë, n. *pl.* *Conch.* A Perman and Triassic family of latisselate ammonites with the habitation-chamber short and sutural saddles more or less simple. Ce-ra-ti'tis, n. (t.g.) [*< Gr. keras*, born.] —ce-ra-ti'ti-d, n.—ce-ra-ti'ti-ga, a.  
**ce'ra-ti'tis**, n. Same as KERATITIS.  
**ce'ra-ti'd-um**, 1 si-rë-shi-um; 2 ce-rä's-shi-lm, n. *Bot.* [Tri-A.] A siliculiform capsule such as in *Cleome* or *Corydalis*. [L., < *Gr. keration*, dim. of keras, born.]  
**ce'ra-to**, 1 ser'a-to; 2 cër'a-to, n. From Greek *keras* (*kerat*), a horn: a combining form.—ce'ra-to-an'gl'o-ma, n. See ANGIOKERATOMA.—ce'ra-to-blast, n. *Spong.* A spongeblast.—Ce'ra-to-a-bran'chi-a, n. *pl.* *Conch.* A group of nudibranchians having club-shaped branchiae: *Ceratophallus*, *Cera-bran'chi-a*, n.—ce'ra-to-bran'chi-atë, a.—ce'ra-to-bran'chi-al, I. a. Of or pertaining to the bone or cartilage between the ephranchial and hypobranchial le branchial arch. II. n. A ceratobranchial bone or cartilage.—ce'ra-to-co'nous, a. A conical protrusion of the conical cornea.—ce'ra-to-eri'al'd. I. a. Of or pertaining to the lower horn of the thyroid cartilage and the eroid ring. II. n. The ceratocleid muscle.—Ce'ra-to'da, n. *pl.* *Spong.* The *Cerasata*.—ce'ra-to-dæ, n. Same as CERATODÆ.—ce'ra-to-der'ma, n. 1. The cornea. 2. A skin-disease characterized by thickened horn and loss of hair of the epidermis.—ce'ra-to-der'mi'al, a.—ce'ra-to-do'ndi'de, n. *pl.* Ich. A family of monopneumonous dipnoan fishes with an eel-like body, large series, flat head, and acutely lobate paired fins, living from the Triassic to the present period: the so-called mudfishes, now confined to Australia. Ce'ra-tad'i-dre, ce'ra-to-dant, a. & n.—ce'ra-to-dan'ti'd, n.—ce'ra-to-dan'töf, a. & n.—ce'ra-to-daus, a. Composed of horny fibers or ceratose.—ce'ra-to-fusus; ce'ra-to-fus, n. A genus of ceratodonta.—ce'ra-to-fus, a. & n. 1. A ceratodontoid fish as the harmandua. 2. [-C] Ich. A genus typical of *Ceratodontidae*.—ce'ra-to-fog'u-nous, a. Horn-producing.—ce'ra-to-glo'fus, n. See NUPHTALIA.—ce'ra-to-glas'fal. I. a. Of or pertaining to the tongue and the greater horn of the hyoid bone. II. n. The ceratoglossus.—ce'ra-to-glas'fus, n. (-si, pl.) Anat. The fibers of the hyoglossus muscle of the tongue that arise from the greater horn of the hyoid bone.—ce'ra-to-hyal, a. Of or pertaining to the greater horn of the hyoid bone or its representative. II. n. That part of the hyoid arch lying between the epiphyll and basihyal, represented in man by the lesser horn of the hyoid bone.—ce'ra-to-hy'a-lin, n. The granular material of the stratum granulosum of the skin.—ce'ra-to-hy'a-line, a. Having a horny consistency and glassy appearance, as the cells in the stratum granulosum.—ce'ra-to-hy'a'id, I. a. Of, pertaining to, or arising from the horns of the hyoid bone. II. n. A ceratohyd muscle.—ce'ra-to-id, a.—ce'ra-to-i'd, n. Horny 2. Of or pertaining to the *Ceratoida*. II. n. Same as CERNEA.—Ce'ra-tal'de-a n. *pl.* *Spong.* The *Cerasata*.—ce'ra-to-lol'dits, n. Same as KERATITIS.—ce'ra-ta-li'ti-da-c'cl'i'tis, n. An inflammatory condition involving the ephranchial body, iris and cornea.—ce'ra-ta-li-r'i'tis, n. An inflammatory condition of the cornea and iris.—ce'ra-to-lu'ary, n. A shedding of the skin; also, atrophy of the horny layer of the epidermis.—ce'ra-to-man'ib'u-lar, a. Hard, thickened space of the skin caused by more than normal accumulation of the horny layers. 2. Congenital lechthisis; the existence of scaly plates upon the skin which have their origin in fetal life.—ce'ra-to-ma-man'ic-la, n. A softening of the cornea.—ce'ra-to-man-dib'u-lar, a. Hyman-

Same as CEREBRAL.—cer'e-brip'e-tal, o. Transmittng impulses toward the brain: said of certain nerve-fibers and their action.—cer'e-brif'tis, n. *Pathol.* Inflammation of the brain; cephalitis.—cer'e-brize, vt. To cerebrate.—cer'e-briz'a-tion, n.

cer'e-bro-1 ser'i-bro: 2 cër'e-bro-1. Same as CEREBRI-1 a combining form.—cer'e-bro-buc'al, o. Of or relating to cerebral and to buccal ganglia.—cer'e-bro-car'di-ac, a.—cer'e-bro-gan'g-i-o-se, n. A galactose containing cerebroses.—cer'e-bro-gan'g-ion, n. *Zool.* In invertebrate animals, the cerebral ganglion.—cer'e-bro-gan'g-ion'le, a.—cer'e-bro-id, a. Resembling the cerebrum or halo.—cer'e-brol, n. A red oily liquid obtained from brain-tissue: probably a mixture.—cer'e-brol'o-gy, n. The science or doctrine of the brain and its functions.—cer'e-bro-ma-la'e-l-a, n. Softening of the brain-tissue.—cer'e-bro-med'u-lu-lar'y, a. Same as CEREBROSPINAL.—cer'e-bro-me-nin'ge-al, a. Of or pertaining to the cerebrum and its meningeal coverings.—cer'e-bro-men'in'ge-al'tis, n. *Pathol.* An inflammatory condition of the cerebral hemispheres and their meningeal coverings.—cer'e-brom'e-ter, n. An instrument by means of which changes in brain volume under certain conditions may be determined.

Other words beginning with this prefix will be found in alphabetical place either singly or in groups.

cer'e-bron, 1 ser'i-bron; 2 cër'e-bron, n. A crystalline cerebrosid.

One of the squares or spots in a checker-board or other checked surface; as square in mosaic or architectural design. 3. pl. The game of draughts; the more familiar name in the United States. It is played with 24 pieces, 12 on each side, arranged and moved upon a board divided into 64 squares. The object of the game and the aim of each player are to capture all his opponent's pieces by moving over each with an adjacent one of his own into an opposite vacant square, or so to block them with his own that they can not be moved. If a player neglects to take an opposing piece when in a position to do so, his adversary has the option of compelling him to take it, or removing from the board the piece that should have jumped, or of allowing the play to stand. When a piece reaches the last row on the opponent's side of the board, it becomes a king, and can be moved either forward or backward. The position of the board and pieces at the commencement of the game is shown in the illustration. The black squares, on which the plays are made, are numbered from 1 to 32, as indicated, the numbers always commencing at the side of the board occupied by the black men. These moves are indicated as follows: 14-18, a move from square 14 to square 18; 9-18, a jump from square 9 to square 18, involving the capture of an opposing piece; 16-30, a double jump, with the capture of two opposing pieces, etc.

Having a cheek: in composition: as, *rosy cheek*—*check<sup>2</sup>-fesh*, a. Somewhat checky.—*check<sup>2</sup>-fesh*, a. Having no cheek.

check<sup>2</sup>-er, 1 Chik<sup>2</sup>-er; 2 Chik<sup>2</sup>-er, n. One who faces impudently. *check<sup>2</sup>*, pp. Checked.

check<sup>2</sup>-y, 1 Chik<sup>2</sup>-y; 2 Chik<sup>2</sup>-y, n. [Slang.] Characterized by cheek; as, a cheeky rascal. See CHECK, 3.—*check<sup>2</sup>-ly*, adv.—*check<sup>2</sup>-liness*, n. [leagle (*Splinter*)] *cheek<sup>2</sup>*.

chee<sup>2</sup>-ta, 1 Chē<sup>2</sup>-ta; 2 Chē<sup>2</sup>-ta, n. [E. Ind.] The crested serpent.—chee<sup>2</sup>-nar, 1 Chē<sup>2</sup>-nar; 2 Chē<sup>2</sup>-nar, n. Chinhar.

cheep<sup>2</sup>, 1 Chēp<sup>2</sup>; 2 Chēp<sup>2</sup>, n. 1. I. To utter in an acute, faint tone. II. t. To make the faint, shrill sound of a young bird or mouse, or a hat; peep; squeak. [Imitative.] *cheep<sup>2</sup>*.

cheep<sup>2</sup>, n. [Local, U. S.] To tell secrets; blab.

cheep<sup>2</sup>, n. A weak chirp or squeak, as of a bird or mouse.—*cheep<sup>2</sup>-y*, a. Given to cheeping.

cheep<sup>2</sup>-er, 1 Chēp<sup>2</sup>-er; 2 Chēp<sup>2</sup>-er, n. 1. One that cheeps or peeps, as a young pheasant, grouse, or partridge; a house-cricket. 2. [Local, Eng.] The common European titlark.

chem'osed, 1 kem'ost; 2 cēm'ost, a. Having marks at chemosis.

Chem'mosh, 1 k'mosh; 2 cēm'mosh, n. Btd. The god of the Moabites to whom living persons were sacrificed. Num. xxi, 29.

chem'o'sis, 1 ka-mō'sis; 2 ce-mō'sis, n. Pathol. Inflammation of the conjunctiva of the eye, with infiltration of fluid into the underlying tissue, whereby the conjunctiva is raised above the cornea. [*Gr. chemōsis, < chemē, cockle-shell.*] chy-mō'sis.

chem'os-mo'sis, 1 kem'os-mō'sis; 2 cem'os-mō'sis, n. Chemical action transmitted through a membrane, such as parchment; chemical osmosis. [*Gr. chemic + osmosis.*] -chem'os-mo'tic, a.

chem'o-syn'the-sis, 1 kem'ō-sin'th-sis; 2 cēm'ō-sin'the-sis, n. Plant-physiol. Synthesis of organic compounds from inorganic constituents without the aid of light. See SYNTHESIS. [*Gr. chemic + synthesis.*] -chem'o-syn'the'tic, a.

chem'o-tac'tism, 1 kem'ō-tak'tizm; 2 cēm'ō-täktizm, n. Same as CHEMOTAXIS.

chem'o-tax'ic, 1 kem'ō-taks'ik; 2 cēm'ō-täks'ic, a. Chemotactic; erroneous form.

chem'o-tax'is, 1 kem'ō-taks'is; 2 cēm'ō-täks'is, n. The property which certain motile living cells possess of approaching (positive chemotaxis) or moving away from (negative chemotaxis) chemical substances of various kinds. Chemotaxis seems to play an important part in some phases of inflammation. Thus it appears to be, in part at least, through the incitement of chemotaxis, by the chemical substances which they contain or eliminate, that bacteria act in inducing suppuration. [*Gr. taxis, order, < taxō, arrange.*] -chem'o-tac'tic, a. -chem'o-tac'tic-al, adj.

chem'o-thér-a-py, 1 kem'ō-thēr'ə-pi; 2 cēm'ō-thēr'a-py, n. The treatment of internal microbial diseases by injecting into the blood chemical substances that destroy the parasitic germs, but are not poisonous to the human tissues. The principle is the same as that of serum-therapy, but the material injected is a synthetic chemical compound, not a product of a living organism. Syphilis has been successfully treated by this method. See SALVANSAN.

chem'ot'ic, 1 ki-mat'ic; 2 ce-mō'tic, a. Relating to or indicating chemosis.

chem'otro-pism, 1 ki-mat'ro-pizm; 2 ce-mō'tro-pizm, n. Same as CHEMOTAXIS. [*Gr. chemic + Gr. tropos, turning.*] -chem'o-tro-pic, a. -chem'o-tro-pic-al, adj.

Chem'ul-po, 1 chu-mul'po; 2 che-mul'po, n. A town on the W. coast of Chosen; a treaty port. Ten-chuan.

Chem'ung, 1 shu-mung; 2 che-mung, n. 1. A river in Steuben county, N. Y.; 50 m. long to Susquehanna river. 2. A county in New York; 394 sq. m.; county-seat, Elmira. 3. Geol. Name of certain strata. See GEOLOGY.

che-na', 1 chi-nā; 2 che-nā, n. [Hind.] A large ophiophagous fish of India (*Ophiophagus striatus*). che-na', 1 chi-nā; 2 che-nā, n. [Hind.] Bot. Either of two kinds of millet, *Panicum pilosum* and *P. mitissimum*. chā-na', [vii, 10.]

che-na'-a-nah, 1 ki-nā'-a-nā; 2 ce-nā'-a-nā, n. Btd. 1 Chron. che-nab', 1 chi-nāb'; 2 che-nāb', n. A river in Kashmir and Punjab, India; 800 m. long to Indus river.

che-nam', 1 chi-nām; 2 che-nām, n. Same as CHUNAM.

che-na'ng'o, 1 shu-na'ng'o; 2 che-na'ng'o, n. 1. A river in Cheung and Broome counties, N. Y.; 100 m. long to Susquehanna river. 2. A county in New York; 847 sq. m.; county-seat, Norwich.

che-na'ni, 1 ki-nā'-ni; 2 ce-nā'-ni; 3 cē-nā'-ni, n. Btd. Neh. ix, 14. [xvi, 29.]

chen-a'-nā, 1 chen-a'-nā; 2 cēn-a'-nā, n. Btd. 1 Chron. che-nar', 1 chu-nār'; 2 che-nār', n. [Per.] The Oriental plane-tree (*Platanus orientalis*).

chē-ne, 1 shēn; 2 chēn, n. [F.] Literally, oak or oak-tree; in dress-goods, a printed or stamped design of an oak-leaf pattern, as on cloth.

chen'er-y, 1 chen'er-y; 2 chēn'er-y, Thomas (1826-1911). A British journalist and Orientalist; Old Testament scholar.

chen'er-vik-itē, 1 shēn'er-viks-itē; 2 chēn'er-viks-itē, n. Mineral. A massive, vitreous, dark-green hydrous arsenate (Cu<sub>2</sub>(FeO)<sub>2</sub>AS<sub>2</sub>O<sub>7</sub>·3H<sub>2</sub>O). [*Chen'er, Irish chemist.*]

cheng, 1 chēg; 2 chēng, n. The Chinese argan. See AARG.

Chen'gal-pat', n. Same as CHINGLETUP.

Cheng'ju', 1 chen'ju'; 2 chēng'ju', n. The capital of Chunchong, Fuku province, S. China.

Cheng'teh-fu', 1 chen'teh-fu'; 2 chēng'teh-fu', n. A city in Chihai province, China; 100 m. N. E. of Peking.

Cheng'ui', 1 chen'ui'; 2 chēng'ui', n. A walled city on the Min river; capital of Szechwan province, China. Ching'ui'.

Chē'nier', 1 shē'nier'; 2 chē'nier', n. 1. André Marie de (1732-1794), a French poet; guillotined; Poems, 1819. 2. Marie Joseph (1734-1811), a French poet and dramatist; brother of preceding Charles IX, etc.

che-nille', 1 shi-nill'; 2 che-nill', n. 1. A soft tufted or fluffy coat of cotton, wool, silk, or worsted, made by weaving four warp-threads or crossing three warp-threads about soft filling-threads, that are afterward cut; made into trimmings, fringes, etc., and woven into curtains, table-covers, and rugs. The warp is generally cotton, the filling of cotton, wool, etc. 2. A floridous alga (*Dasya elegans*). 3. [So. U. S.] The caterpillar of a noctuid moth (*Alabama* or *Aletia argillacea*) destructive to the cotton-plant. leaf'scat'er-pill'lar'. [*F., caterpillar, < L. canicula, dim. of canis, dog.*]

Chen'ju', 1 chen'ju'; 2 chēn'ju', n. The capital of Churura, Fuku province, S. W. Chosen.

che-no'a, 1 shi-nō'a; 2 che-nō'a, n. A city in McLean county, Ill.

chem'o-chol'ic, 1 kem'ō-chō'lik; 2 cēm'ō-chō'lic, a. Obtained or extracted from the bile of fescue. [*Gr. chēm, goose, + cholē, bile.*] chen'o-chol'al'ic -chenochollic acid (Chem.), a compound (C<sub>22</sub>H<sub>40</sub>O<sub>6</sub>) resulting from the action of harum hydroxyl on taurochenochollic acid. It is dibasic and is in powder form.

che-no-mor'pha, 1 ki-no-mō'fā; 2 cē-no-mō'fā, n. pl. Ornith. A division of desmognathus birds, including ducks, etc. [*Gr. chēm, goose, + morphē, form.*]

che-no-mor'phic, a. -che-no-mor'phic, a.

che-no-pō'di-a-ce-e, 1 ki-no-pō'di'ē-si; 2 cē-no-pō'di'ē-si, n. pl. Bot. A family of more or less succulent apetalous annual or perennial herbs - the goosefoot family - with usually alternate exstipulate leaves and minute greenish flowers. It embraces about 80 genera and over 500 species, among them being several garden vegetables and a number of weeds. [*Gr. chenopodium*] -che-no-pō'di-a-ceous, a.

che-no-pō'di-a'les, 1 ki-no-pō'di'ē-tis; 2 cē-no-pō'di'ē-tis, n. pl. Bot. An order of dicotyledonous herbs or small woody plants belonging to the subclass Archetiamydae and con-

taining 10 families, in which the goosefoot family (*Chenopodiaceae*), the amaranth family (*Amaranthaceae*), and the pink family (*Sileneaceae*) are the best-known. In all the ovary is one-celled and free from the calyx and the embryo is curved. Formerly called *Cenocarpus*. [*Gr. chenopodium*]

che-no-pō'di-a'ce-e, 1 ki-no-pō'di'ē-si; 2 cē-no-pō'di'ē-si, n. pl. Bot. Same as ARACHNIDACEAE. -che-no-pus, n. (t. g.)

che-no-pō'di-um, 1 ki-no-pō'di'um; 2 cē-no-pō'di'um, n. Bot. A large genus of herbs of the *Chenopodiaceae* family - goosefoot or pigweed - growing in temperate regions, being mostly weeds with usually a white meanness and dense spiked panicles of minute flowers. [*Gr. chēm, goose, + pous (pod-), foot.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

che-no-tau'ro-chol'ic, 1 ki-no-tō-ro'chō'lik; 2 cē-no-tō-ro'chō'lic, a. Chem. Pertaining to the bile of the ox and the goose: applied to taurocholic acid as found in goose-bile. [*Gr. chēm, goose, + tauros, bull, + cholē, bile.*]

 chess, 1 ches; 2 chŕs, n. A game played by two or more persons on a checkerboard divided into 64 squares alternately light and dark, with 16 men or pieces on each side, arranged at the beginning as shown in the illustration. The term *piece* in its restricted sense designates each of the eight men in the first row, namely, a *King*, a *queen*, two *bishops*, two *knight*s, and two *castles* or *rooks*, of which the king, queen, and castle are known as major pieces and the bishop and knight as minor pieces. The second row contains eight *pawns*. The opposing pieces

are distinguished by their color, those on one side being white and those on the other either black or red, now usually the former. The rows of squares running perpendicularly, or from one player toward the other as they sit at the board, are termed *files*, those running horizontally, *rows*. The squares are numbered from the players along the files, those in each file taking the name of the major piece occupying the first square; thus, the square on which the king stands is called the *king's square*, the next in front *king's 2*, the next *king's 3*, and so on. As the board is numbered from one side for one player and from the other side for the other, it will be noted that black *king's 6* will be the white *king's 4*, and so on. The values of the pieces are graded according to their mobility, which is the measure

The pieces (indicated by their respective equivalents in chess notation) are arranged as at the beginning of a game, the conventional symbol for each piece being set opposite the square it normally occupies, or, in the case of the pawns, at either end of the pawn row.  
 Chess-board.

of their power for attack or defense, the queen being the most powerful, the rook next, etc. The aim of each player is to checkmate the opponent's king.  
 At the beginning of a game each major piece has a pawn on the square immediately in front of it, as shown by the abbreviations in the illustration, such pawn being known by the name of that piece before which it is set, as *queen's rook's pawn*. The major pieces themselves, when in play, are known from the side of the board on which they originally stood, as *king's rook*, *queen's bishop*, etc. To commence a game the pieces must be moved alternately, white always moving first save when the odds of a pawn are given. Certain initiative moves and replies have been analyzed and classified. See list of openings below. For the moves, see the names of pieces in the vocabulary, also *CHECK*, *CHECKMATE*, and *KING'S TOUR*. Chess is one of the few games of pure skill. It is played in one form or another in all parts of the civilized world, and comes down from so great antiquity that its origin is lost in obscurity. It was known in the Orient for centuries before it penetrated to Europe.  
 They danced, and they play at chess and tables.  
*Chaucer's T. Franklin's Tale l. 172.*

The following system of notation is used for the purpose of recording games as played between experts and also for the setting forth and solution of chess problems. Compare *NOTATION*.

circle, n. 1. Geom. (1) A plano figure bounded by a curved line everywhere equally distant from the center. (2) The circumference of such a figure: the sense usual in higher geometry.

Our life is an apprenticeship to the truth, that around every circle another can be drawn. Emerson *Essays*, *Circles* in first series, p. 239. [r. r. & co. 1890.]

2. A circular object or arrangement of objects, or that included within it: a circumference; an enclosure; a ring; halo; as, a circle around the moon; a circle of stakes.

3. Loosely, a round or spherical body. 4. An association or fellowship of persons, especially of persons having the same interests or pursuits; a set; coterie; class.

5. A series ending of the starting-point; a repeated succession; hence, a completed series or system; as, the circle of the months; the circle of the sciences, or of the arts.

The hoary Grandfather, who has run life's circle and come back to childhood. Hawthorne *Mosses* p. 251. [r. r. & co. 1886.]

6. A circular path; course; circuit. 7. An indirect statement; a circumlocution. 8. Logic. A vicious form of argument in which the conclusion is virtually assumed to prove the premise, and then the premise made to prove the conclusion: *argument in a circle*; a form of *petitio principii*.

9. In some European and Asiatic countries, an administrative governmental district. 10. An astronomical or other instrument whose important parts are graduated circles. 11. A circus-ring. 12. A special gallery in a theater; as, the dress circle.

13. A diadem; crown. [-F. *cercler*, < L. *circulus*, dim. of *circus*, ring.] Syn: see CIRCUMFERENCE, CLASS, ad-dēn-dum, cir-cl'e, n. A circle touching the points of the teeth in a gear-wheel: distinguished from *pitch-circle*. -antarectic c. (Geom.), see ANTARCTIC. -arctic c., see ARCTIC. -argument in a c., see CIRCLE, n., 8.

-auxiliary c., the circle described on the major axis of an ellipse as a diameter. -about a path or of points, a circle of which the pair are the inverse points. -cir-cl'e-l'ron, n. The fifth wheel of a vehicle. -c. of altitude, see ALMUCANTAR. 1.-c. of Apollonius (Geom.), a circle that contains all the vertices of triangles on a given base, whose other two sides bear a given constant ratio to each other.

-c. of curvature, the osculating circle of a curve at any circle; o. primary great circle; A. point.-c. of declination, hour-circles, also vanishing circle. -DECLINATION-CIRCLE, c. cles'i, astronomical circle of latitude of Haller. 1. The circle touching the secondary circle at the vertex of the cone of the small circle; 2. plane of the nipple of the breast. 2. pl. ellipse.

Small anastomosing arteries arranged in a circle around the optic nerve, upon the sclerotic coat of the eye. 3. A throcatiliginous ring at the base of the outflowing ventricular valves of the heart. -c. of illumination (Astron.), the hemisphere dividing the illuminated from the unilluminated part of a planet or satellite. -c. of latitude, c. of lat'it'ude. 1. A great circle perpendicular to the ecliptic. -c. of longitude, a small circle parallel to the ecliptic. -c. of porade, a circular parry in fencing. -c. of position, in Sumner's method of determining the longitude of sea, a hypothetical circle of the globe, whose center lies immediately under the sun and whose diameter equals the sun's observed zenith distance. The true position of a ship at any time lies upon one of the two

points of intersection of two such circles, as determined by two successive observations. -c. of right ascension (Astron.), a great circle drawn through the two celestial poles. -c. of the gorge (Math.), on a surface of revolution, a median circle formed by the intersection of a plane perpendicular to the axis of c. of the sp'ere, a circle formed by the intersection of a plane with a sphere called a *great circle of the sphere* when its plane passes through the center of the sphere, otherwise a *small circle of the sphere*. -c. of Willis (Anat.), an arterial anastomosis at the base of the brain, between the terminal branches of the carotid and basilar arteries. -c. tomb, n. A tomb around which a belt of megaliths has been placed. -cosine c. (Math.), the circle on the circumference of which lie the six points of intersection of the sides of a triangle with three lines antiparallel to the sides drawn through the symmedian point. -declination-c., n. Astron. A circle on an equatorial telescope, perpendicular to the equator, that indicates the declination of an object in degree, or south of the equator. -dens'ity c. (Pathol.), a condition that occurs when a newly acquired disease serves to check the progress of an existing one. -Delezenne's c. (Elec.), an instrument used to demonstrate induction through the agency of the earth. It consists of a circle or ring of metal wound with a coil of insulated wire in circuit with a galvanometer and pivoted in a horizontal position. When it is suddenly turned through any angle in relation to the earth the galvanometer needle is deflected, showing the operation of induction. -dispersion-c., n. Optics. The area of the retina which receives light from a luminous point outside of the eye, but for which the lens is out of focus. -div'ided c., the apparent circle described by a heavenly body in the course of the rotation of the earth. -div'ided c., a graduated circle. -Druidical c., a circle of great stones, as those at Stonehenge and Avebury, England, once supposed to have been a Druidical place of worship. -fairy c., a circular growth of fungi in fields, formerly supposed to mark the dancing-places of fairies. -family c., a specified part of a theater, usually the upper balcony, where the seats are comparatively inexpensive. -finding c. 1. In an equatorial telescope, a circle attached to the mounting, and so divided as to indicate at a glance the declination and hour angle to which the telescope is pointing. -Compar'ed c., a circle of the same radius as the circle of the sphere, but in a transverse position, one of several circles on the tube, which read in connection with an attached level, indicate the altitude of the object under observation. -fundamental c. (Math.), a circle which under a Fuchsian or hyperfuchsian transformation returns into itself. -fundamental sphere, -generating c. (Math.), a circle acting as the generatrix of a roulette or glissette. -geodesic c., a curve on a surface, all points of which are at equal distances from a fixed point on the surface, as measured along geodesics. -great c., see CIRCLE OF THE SPHERE. -great c. of Hevelius, a circle visible half around the north pole, radiating from a star, and being half by the arc of a great circle. -Hart c. (Geom.), in a circular triangle, the circle which touches the inscribed circle and those of the associated triangles. -horary c., hour-c., a circle passing through the north and south poles of the celestial sphere, and conceived to turn with the earth. -law of the c., the law that the product of the distances from a given point to the two intersections of any line from that point with the circumference of any given circle is a constant. See EUCLID III. -Lemoiné c., either of two circles discovered by the French geometer Emile Lemoiné and called the first and second Lemoiné circles. The first is the circumscribed circle of the Lemoiné hexagon; the second is the cosine circle. -meridian c., n. See MERIDIAN. -Müller's c. (Optics), a circle which passes through the fixation-point and the optical centers of both eyes, and which lies in the plane of regard when the eyes are in the primary position of convergence. -mural c., an astronomical instrument for measuring declinations consisting of a telescope and graduated circle attached by an axis to the face of a north-and-south pier so as to turn in the plane of the meridian. -nodal c. (Acoustics), a circular nodal line on a vibrating disk. -optical c., a graduated circle used in illustrating the laws of refraction, measuring angles, etc. -osculating c., a circle tangent to a curve and having the same curvature as the curve at the point of tangency. -polar circles, the arctic and antarctic circles. -root c., the circle defined by the base of the teeth of a spur, worm, or helical gear. -sensation c., on one either upon the skin or the retina within which two separate impressions can not be recognized as distinct. -sensory c., a small c., see CIRCUM; or my surface. -stone c. (Archaeol.), a circular structure of upright megaliths. -to square the c., see SQUARE, v. -turning c. (Naut.), the circle made by a ship at a prescribed speed with full helm. It is expressed by its diameter. -Ullrich's c. 1. The colored ring of light surrounding the observer's shadow in the specter of the Brocken. See SPECTER. 2. Bouguer's halo: incorrect use. See HALO. -vanishing c., o. great circle of the celestial sphere in which several parallel planes meet or seem to meet. -vertical c., 1. A circle for measuring celestial altitudes. 2. A geodetic instrument for measuring angular elevations, consisting of a theodolite with a circle attached to its horizontal axis. -vicious c. 1. A chain of events of such a character that the effects react upon the cause. 2. Surg. The regurgitation of chyme from the intestine back into the stomach, as after gastro-enterostomy. 3. The accelerating effect of one disease upon another when the two are coexistent. -volute c., see CIRCUS. -w. c., a. Encircled; marked with a circle. -c. of latitude, c. of lat'it'ude. In the form or manner of a circle. -cir-cl'ine, n. A broad sash used as a cassock-girdle; a cincture. -cir-cl'oid, a. Having the shape of or resembling a circle. -cir-cl'y, o. [Rare.] Circle-shaped.

cir-cl'ar, 1 sū'si-klar; 2 cir-cl'er, n. 1. One who encircles or goes round. 2. A cyclic poet.

cir-cl'et, 1 sū'si-let; 2 cir-cl'et, n. [Rare.] To move in small circles; form circles.

cir-cl'et, 1 sū'si-let; 2 cir-cl'et, n. 1. A small ring, especially one used as a personal ornament, as a finger-ring or head-band.

Forms that wear The kindly circle rise amid the gloom, Br. *The Ages* st. 12.

2. A disk-shaped body; ns, the circle of the moon. [-F. *cercler*, dim. of *cercler*; see CIRCLE, n.] Syn: see CIRCUMFERENCE.

Cir-cl'e-ville, 1 sū'si-vil; 2 cir-cl'vī, n. A city, county-seat of Pickaway county, O.

Cir-co-cele, 1 sū'si-co-ale; 2 cir-co-cē, n. Same as CIRCOCLE.

Cir-co-ta-ri-an, 1 sū'si-co-tā-ri-an; 2 cir-co-tā-ri-an, o. Situated around an ovary, as oviducts in certain crinoids. [-L. *circus*, circle, & *ovarium*.]

cir-cl'it, 1 sū'si-rit; 2 cir-cl'it, n. [Rare.] I. t. To pass or travel round; move around in. II. t. To move in a circuit; circulate.

cir-cl'it, n. 1. A passing or traveling round; a revolution; specif., o. journey from place to place, as by a judge or clergyman, in the discharge of duties. 2. A

district or route within certain limits or boundaries; especially: (1) A division assigned to a peripatetic judge for the holding of courts at stated intervals.

In the United States the English circuit system still exists in some states, as in Massachusetts, where the judges sit in succession in the various counties of the state.

Br. 11th ed. vol. vi. p. 353.

(2) In the Methodist Church, and in the Evangelical Association, a district in charge of a itinerant minister.

3. The persons undertaking these peripatetic journeys, as the judges. 4. Distance around; compass; circumference. 5. The entire course traversed by an electric current. It consists usually of a source of electricity, as a battery or dynamo, the conductors for conveying the current, and the devices in which it is utilized, as lamps, motors, bells, etc.

When it is complete, so that the current will flow, it is said to be *made* or *closed*; when interrupted, so that the current stops, it is *broken* or *open*.

6. Same as CIRCUMCOURSE. 7. Logic. The extension of a term. 8. [Rare.] An indirect statement; a circumlocution. 9. A circuit; ring. 10. Circuit-breaker of [U. S.] Racing. A series of harness races, racing events held at different associated tracks, of which the principal meetings together constitute the grand circuit. 11. Math. A tion-c.

closed curve. [-L. *circulus*, < *circulus*, pp. of *circare*, go around, < *circum* (see CIRCUM) + *eo*, go.]

cer-cl'it; cir-cl'it. Syn: see CIRCUMFERENCE. -call' cir-cl'it, n. Teleph. 1. A circuit used for the transmission of signals as differentiated from speech. 2. A circuit between two telephone exchanges for ordering up connections: used exclusively by operators. -cir-cl'it-break'er, n. 1. A device for breaking or opening an electric circuit at regular intervals, commonly by the movement of a clock-wheel or the vibration of a spring. 2. A form of automatic switch used in power-plants, which opens a circuit when the current in it attains too high a value; when shut by hand it is kept closed by a latch, which is released by an electro-magnetic device when the current becomes too strong, allowing the switch to be forced open by a spring, thus breaking the circuit. -c. closer, n. An instrument or device for closing or completing an electric circuit. -c. key, n. Elec. A lever or key that, unless operated on by its pressure, holds a circuit closed. -closed c. key, -c. rider, n. A Methodist preacher who rides from station to station in his circuit. -close-coupled c. (Elec.), a compound circuit in which a closed and an open circuit are directly joined. -closed-c. operation (Elec.), a signal system in which the normally closed circuit is opened to give the signal: more reliable than the open circuit, since breaks at any point in the wire are immediately detected, but much less economical, as it continually consumes battery power. -closed magnetic c. (Elec.), a magnetic circuit in which there is no air-gap, the flux being an uninterrupted metallic path. -cogwheel c. (Auto.), a circuit in which the teeth of a gear-wheel set at intervals among other teeth of different metal, the latter falling to influence the circuit. -compound c. (Elec.), a circuit consisting of a closed circuit coupled with an open circuit. -derived c. (Elec.), n. circuit which contains no source of electrical energy, but in which currents are produced only by induction. -even c. of a curve (Math.), a circuit that is met an even number of times by a right line. -form c. (Elec.), a circuit used in multiplex telegraphy and telephony, established electrically, without the employment of additional wires, over portions of existing circuits. -Independent circuits (Math.), circuits of such a nature that continuous deformation will not render them identical. -Internal c. (Elec.), the portion of a circuit that is inside a generator. -loose-coupled c. (Elec.), a compound circuit in which a closed and an open circuit are joined inductively. -magnetic c. (Elec.), the total space in which magnetic flux occurs. -open-c. operation (Elec.), a signal system in which signals are given by closing the normally open circuit. See CROSS-ARM, OPERATING, or RELAYING c. (Elec.), a circuit in which inductance, or capacity, or both, are partly or wholly responsible for its impedance. -reducible c., in mathematics, a circuit that by continuous change can be reduced to a point. -resonant c. (Elec.), a circuit whose capacity and inductance are so arranged as to respond chiefly to electrical oscillations of a certain frequency. -to make the c., to take a roundabout course; go around; or to ride the c., to ride from place to place, ns, o. judge or itinerant preacher on his rounds. -vicious c., see def. 5. -circu'lar, o. Pertaining to or composed of a circuit or circuits. -cir-cl'it-er, n. [Rare.] To make or go on a circuit. -cir-cl'it-er, n. One who or that which makes or goes on a circuit; specif., a judge or barrister. -cir-cl'it-er, n. [Rare.] A going round; circumlocution. -cir-cl'it-er, n. One who goes his rounds; a traveling agent.

cir-cl'it-tous, 1 sar-kiū'ti-tis; 2 cir-cl'it-tis, o. Of the nature of a circuit; indirect; roundabout; as, a circuitous march.

There is some little additional expense... in settling debts in this circuitous manner. *Political Economy* vol. ii. p. 180. [r. 1859.]

[-LL. *circulosus*, < L. *circulus*; see CIRCUM, n.] Syn: devious, eccentric, erratic, indirect, roundabout, serpentine, sinuous, tortuous, winding. -Ant: direct, straight, straightforward, undeviating. -cir-cl'it-tous-ly, adv. -cir-cl'it-tous-ness, n.

cir-cl'it-ty, 1 sar-kiū'ti-ti; 2 cir-cl'it-ty, n. [-Ties, 1-tis; 2-tis, pl.] 1. Movement in a circuit; roundabout procedure. 2. Circular form or movement. 3. Area; compass.

cir-cl'it-ty, 1 sū'si-ty; 2 cir-cl'it-ty, n. That cir-cl'it-ty, 1 sū'si-ty; 2 cir-cl'it-ty, n. [Rare.] Some-

thing is circled. -cir-cl'it-ty, 1 sū'si-ty; 2 cir-cl'it-ty, n. Math. A determinant of which each row is formed from the preceding one by moving each constituent one place to the right, the last one taking the place of the first. [-L. *circulan* (-t), npr. of *circulo*; see CIRCULATE, v.]

cir-cl'it-ty, 1 sū'si-ty; 2 cir-cl'it-ty, n. 1. Forming a circle; bounded by a circle; round; ns, a circular shield. 2. Moving or occurring in a circle or round; coding at the point of beginning; constantly repeated in the same, or similar order; as, circular motion; a circular argument. 3. Of, pertaining to, or forming part of a circle; ns, a circular arc. 4. Intended for public circulation or among certain interested persons; ns, a circular note.

God gives every man a circular letter of credit for life, and says... take your letter to the Banker and the needed assistance

Circles of the Globe.

of *circumralla*, < *circum*, around, + *rallum*, wall.)

**circum-val-late**, *a.* Enclosed by or as by a rampart.  
**circum-val-lation**, 1 *sū* 'kum-val-šān; 2 *cī* 'cūm-val-šān, *n.* 1. The process of throwing a wall or rampart round a place. 2. An encircling line of military works.

**circum-val-lar**, *a.* Encircling lymphatics or blood-vessels.  
**circum-vent**, 1 *sū* 'kum-vent; 2 *cī* 'cūm-vent, *rt.* 1. To gain advantage over or get the better of, as by craft, artifice, or fraud; defeat artfully; deceive; delude; outwit. 2. [Rare.] To pass around in a circle; surround; as, to *circumvent* the town. 3. [Archaic.] To capture by entrapping; ensnare; as, to *circumvent* an enemy, or an opponent in chess. [*L. circumventus*, pp. of *circumvento*, < *circum* (see *circum-*) + *vento*, come.] Syn.: see CHEAT; NECEIVE. — *circum-vent* (iv), *a.* Designed or tending to circumvent. — *circum-ventor*, *n.* 1. One who circumvents. 2. A surveying-instrument having at the top a compass-box, used for laying out horizontal angles; circumferenter.

**circum-vent-ion**, 1 *sū* 'kum-ven-šān; 2 *cī* 'cūm-ven-šān, *n.* 1. The act or process of circumventing; a forestalling by artifice; stratagem. 2†. Preoccupation; prevention.

**circum-vest**, *rt.* To enwrap as with a garment.  
**circum-vo-lant**, 1 *sū* 'kum-vo-lant; 2 *cī* 'cūm-vo-lant, *a.* Flying round. [*L. circumvolans* (-is), pp. of *circumvolare*, fly around, < *circum*, around, + *volare*, fly.]

**circum-vo-late**, *rt.* [Rare.] To encircle while flying. — *circum-vo-lation*, *n.* [Rare.]

**circum-vo-lute**, 1 *sū* 'kum-vo-lūt; 2 *cī* 'cūm-vo-lūt, *rt.* [*LUT* + *ING*.] 1. To enwrap or enclose by winding or twisting something round. 2. To wind around; curl or roll. [*L. circumvolutus*, pp. of *circumvolare*, fly around, + *volare*, fly.]

**circum-vo-lution**, 1 *sū* 'kum-vo-lū-šān; 2 *cī* 'cūm-vo-lū-šān, *n.* 1. The act of winding; a fold or turn of something wound. 2. A turning round an axis or center; rotation; revolution. 3. A flat spiral or helix; convolution, as in the spiral of an Ionic volute; a single coil or complete turn of a spiral, as in a volute.

4. A winding; sinuosity; circumlocution.  
**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

**circum-volve**, 1 *sū* 'kum-volv; 2 *cī* 'cūm-volv, *rt.* [*LUT* + *ING*.] 1. To cause to revolve, as on an axis or in an orbit; rotate. 2. To fold or wind round; encompass; surround. — *circum-volve* (nce), *n.* S. S. Circumvolution.

associated with certain cases of diabetes mellitus. — *circum-* (circumfluent), *a.* Resembling or affected with cirrhosis.

**circum-**, 1 *sū* 'kum; 2 *cī* 'cūm, *n.* Plural of CIRCUUS.

**circum-**, 1 *sū* 'kum; 2 *cī* 'cūm, *n.* Plural of CIRCUUS.

**circum-**, 1 *sū* 'kum; 2 *cī* 'cūm, *n.* Plural of CIRCUUS.

**circum-**, 1 *sū* 'kum; 2 *cī* 'cūm, *n.* Plural of CIRCUUS.

**circum-**, 1 *sū* 'kum; 2 *cī* 'cūm, *n.* Plural of CIRCUUS.

A classic is properly a book . . . which can be simple without being vulgar, elevated without being distant, and which is something neither ancient nor modern, always new and incapable of growing old. *Lowell Among my Books, Spenser in second series*, p. 126. [H. M. & Co. 1886.]

2. Any author, ancient or modern, whose work is generally accepted as being a standard of excellence: distinguished from romantic.

And so Macaulay dwelt at ease in his pleasant retreat, a classic in his own life-time.

G. O. TREVELYAN *Macaulay* vol. ii, ch. 14, p. 380. [H. 1877.]  
 3. One who is familiar with classical literature. 4. *pl.* Specif., the literature that has descended from the Greeks and Romans, especially as studied in modern colleges.—*The Six Classics*, see *THE FIVE CLASSICS*, under *FIVE*.

**class-cal**, 1 klas'-kal; 2 clās'-cal, *n.* 1. Of or pertaining to the ancient Greeks and Romans, their history, literature, or art; specif., pertaining to Greek and Roman literature and art during the period of highest culture; as, classical mythology; the revival of classical learning.

The social life of Athens in the classical age was such that only very able men could take any pleasure in it.

JOSEPH COOK *Heredit* lect. iii, p. 12. [O. & Co. 1879.]

2. Having a thorough knowledge of Greek and Latin literature; as, a classical scholar. 3. Adhering to rules and forms of Greek and Roman masterpieces of literature; as, the classical drama; the classical school of literature, as opposed to the romantic. 4. Resembling or modeled after the highest forms of ancient art; as, classical features. 5. *Mus.* (1) Subordinating ideas to form. (2) Composed by the great masters.

It [classical] is used of works which have held their place in general estimation for a considerable time, and of new works . . . of the same type and style. Hence the name has come to be especially applied to works in the form which was adopted by the great masters of the letter part of the 18th century, as instrumental works in the sonata form, and operas constructed after the received traditions; and in this sense the term was used as the opposite of "romantic."

GEORGE DICK *Of Music and Musicians* vol. i, p. 547. [MACMILLAN, '08.]  
 6. Of or pertaining to a class. 7. *Ecd.* Of or pertaining to a classis. 8. *Classis*. 9. Relating to or naming the doctrines of Adam Smith and his adherents, Mill, Malthus, etc., who used, in general, the deductive method; as, the classical economists as distinguished from the historical economists. [*< L. classis*; see *CLASSIC*.]

*Syn.*: see *PURE*.

**class-cl-i-fi-ca-tion**, 1 klas'-fi-kā'-shon; 2 clās'-fi-kā'-shon, *n.* 1. The net or process of arranging by classes; a grouping into classes; the putting together of like objects or facts under a common designation; a process based on similarities of nature, attributes, or relations.

Classification may proceed by the gathering together of similar things into a class, or by the descent of differentiation from a more or less specific division. The special classifications in the various sciences, physical or mental, will be found under their particular names. See, for example, *BOTANY*, *MATHEMATICS*, *ZOOLOGY*, etc.

In order to reach the most valuable scientific results, classification should keep in view the most important properties. D. S. GAZDAR *Practical Logic* pt. i, ch. 1, p. 42. [E. & N. 1881.]

2. A system of objects, facts, or ideas considered as having been classified; specif. (*Biol.*), a series of combinations of organized beings into more or less comprehensive groups, as species, genera, families, orders, classes, branches (or subkingdoms), kingdoms, and various intermediate categories.

A natural and true classification, then, is a statement of near or remote relationships, actual or hypothetical, of differentiation the forms sought to be classified have undergone in their descent from a more or less remote ancestor.

NEW INTERNATIONAL ENCYCLOPEDIA, vol. iv, p. 816. [*< L. classis*, class, + *facio*, make.]

—*artificial* classification, classification based on superficial or accidental rather than on radical agreements and differences.—*expansive c.*, in library usage, any classification of books in which new subclasses may be easily and conveniently inserted at any point without interfering the notation; specif. climac-ter-i-an, 1 klōi-mak-tēr-i-an; 2 clī-māc-tēr-i-an. n. [Rare.] One who affects climax in writing or speaking.  
climac-ter-ic, 1 klōi-mak-tēr-ik or klōi-mak-tēr-ik; 2 clī-māc-tēr-ic or clī-māc-tēr-ic (xiii), n. 1. Of or pertaining to a climax.  
Had I been able, in the subsequent composition, to construct more vigorous stanzas, I should, by such a sample, have purposefully enfeebled them, so as not to interfere with the climactic effect. For Words, *Philos. of Composition* in vol. ii, p. 266. [w. J. W. 1863.]

2. Relating to a climactic period. See pbrases. 3. Hence, marking or marked by a crisis. [*L. climactericus*; < Gr. *klīmaktērikos* < *klīmaktēr*, round of a ladder; < *klīmaz*; see CLIMAZ, n.] clī-mac-tēr-i-cal, -clī-mac-tēr-ic, a disease occurring at a climactic period or arising from changes in the physical condition of the body at such period. c. period, one of several critical periods supposed to occur in the health or constitution in the course of human life, as those of puberty and of menopause. c. years, the years in which the climactic periods respectively terminate. These have been variously estimated, especially by the ancients, as being the years indicated by the multiples of 7, or by the multiples of 9, or by the multiplication of 7 by an odd number. The Greek physiologists recognized five climactic years—the 7th, 21st, 49th, 63d, and the 81st. Certain periods of marked change in man's physical constitution are now termed climactic, without regard to any exact number of years.

climac-tēr-ic, a climactic period. clī-mac-tēr-i-cal, -clī-mac-tēr-ic, a climactic year. clī-mac-tēr-i-cal, -clī-mac-tēr-ic, n. The construction and use of the climax. clī-mac-tēr-i-cal, 1 klōi-mak-tēr-ik; 2 clī-māc-tēr-ic, a. Of, pertaining to, or of the nature of a climax; ascending in thought or expression.

Climactic order itself expresses an idea—that of rise in thought. *Austin Phelps English Style* p. 264. [s. 1883.] clī-mac-tēr-i-cal, -clī-mac-tēr-i-cal, n. In the manner of or employing climax.

climac-tēr-i-cal, 1 klōi-mak-tēr-ik; 2 clī-māc-tēr-ic, n. Geol. A peculiar set of markings found on the surface of beds of Cambrian sandstone in the Lake Champlain region, supposed to be the trails of some extinct form of crustacean or mollusk, to which the generic name is tentatively assigned. [*< Gr. klīmaz*, ladder, + *technos*, track.] clī-mat, 1 klī-māt; 2 clī-māt, n. [F.] The portion of a grape-district producing wine of a given kind or quality; a term used in Burgundy; as, *climat* of Musigny, Chamberlain, etc.

clī-mat, 1 klī-māt; 2 clī-māt, n. [Poet.] To dwell; reside. clī-mat, n. 1. The sum total of the atmospheric conditions of a locality, esp. affecting health and comfort; the average weather of a place or region, as regards temperature, moisture, and prevailing winds; as, a hot climate; a rigorous climate. 2. A region of the earth, especially one considered in relation to its temperature, moisture, etc.; a climate; as, we live in a capricious or rigorous climate. 3. [Archaic.] In early geography, a zone of the earth's surface comprised between two specified parallels of latitude; the original meaning. The old geographers reckoned 7 climates; the later ones 24, from the equator to either of the polar circles, each representing an increase of half an hour in the length of the longest day. At the present day the earth is divided into various irregular regions, each differing as to temperature, rainfall, moisture, pressure, the inclination of the sun, and the amount of cloudiness. [*< F. climat*, < *L. clima* (c), < *Gr. klīmā* (c), region, < *klīmā*, slope.] clī-mat, -continental climate, the type of climate characteristic of the interior of a continent, beyond the influence of winds from the ocean. coal, *n.* 1. Mineral. An amorphous substance derived by the carbonization of vegetation of prehistoric ages, containing free carbon and different hydrocarbons and also complex substances carrying oxygen, sulfur, and nitrogen, contaminated with various amounts of mineral matter, such as pyrites, gypsum, lime, magnesia and silica, soda and potash; found in beds or veins in the earth and used as fuel.

It is brittle, compact, massive, and sometimes laminated, and varies in color from black to brown. Coal is classified into anthracite or hard coal, bituminous or soft coal, subbituminous or cannel, and lignite and peat, according to the amount of volatile matter it contains. Graphitic anthracite has from 1 to 3 per cent. of volatile matter; anthracite, 3 to 10 per cent.; semianthracite, 10 to 15 per cent.; bituminous, 15 to 25 per cent.; subbituminous, above 25 per cent. Bituminous coals that swell and cake when heated are called caking and are used for the production of coke; they are called cannel (or jet) when rich in gas with low heating power. Subbituminous coals include lignite or brown coal, which has over 50 per cent. of volatile matter; as also has peat coal. Anthracite coal in the American market is commonly graded into the following sizes: steamboat, broken grate, egg, stove, nut, pea, buckwheat, rice, barley (the latter being the smallest, and also known as No. 1, No. 2, and No. 3 buckwheat). The American coal deposits run from low to high volatility from east to west; thus anthracite is furthest east, the semibituminous and bituminous in the western Appalachian coal-field, and the cannel and lignite coal in the middle west and extreme west.

2. One of the pieces into which coal is broken for use; in Great Britain used in the plural equally with the singular in a collective sense.

## EXPLANATION OF THE PLATE OF COINS.

It is seldom possible to ascertain the exact date of an ancient coin. The dates here assigned represent approximately the periods within which the coins must have appeared.

### 1. Babylonian Stater, Lydia.

Electrum; 166.8 grains. About 700 B. C.  
Reverse: An oblong incuse between two incuse squares. This is the earliest coin known.

The Lydians are reputed to have been the first people to make stamped money. Electrum, consisting of three parts of gold and a native alloy of one part of silver, was used in the first period of the Lydian coinage. The weights of the coins conformed to the Babylonian silver standard. Afterward the Phœnician silver standard was used concurrently with the Babylonian, probably for the sea-trade with the western coast-towns. When Cræsus abandoned electrum, he produced, by reducing the Phœnician weight one fourth, a gold coin weighing exactly a gold stater, and by a similar reduction of the Babylonian weight he obtained the Greek gold stater of Eubœa.

### 2. Didrachm of Ægina.

Silver; 102 grains. 700-480 B. C.  
Obverse: A sea-tortoise (the symbol of Astarte, the Phœnician goddess of trade). Earliest known silver coin.  
Reverse: An incuse square, divided into eight compartments.

According to the Parian chronicle, Phidon, king of Argos, established the earliest Greek mint, in the island of Ægina. The Æginetan silver coinage is almost as ancient as the electrum coinage of Lydia. The Greeks introduced engraved dies in place of the rude punches of the Lydians.

### 3. Coin of Caulonia.

Silver; 128 grains. 700-480 B. C.  
Obverse: KAYA (Caulonia). Apollo naked, holding in his raised right hand a branch, on his outstretched left arm a small running figure with winged feet, and in the left hand a branch; in front, a stag looking back.  
Reverse: Same type of incuse, with small figure wanting. An incuse coin of very ancient date. Caulonia in Brutium was one of the earliest colonies established by the Greeks on the shores of southern Italy.

### 4. Stater of Halicarnassus.

Electrum; 216.3 grains. 700-480 B. C.  
Obverse: ΦΑΝΟΣ ΕΜΙ ΣΗΜΑ ("I am the sign of Phanes"). A stag feeding.  
Reverse: An oblong incuse between two incuse squares. The earliest known inscribed coin, struck probably about 500 B. C. by Phanes, a vassal of Egypt, who joined Cambyses, king of Persia, in his invasion of that country, or possibly at an earlier date by an ancestor of this Phanes.

### 5. Syracusan Medallion.

Silver; 263.6 grains. 485-478 B. C.  
Obverse: ΞΥΡΑΚΟΣΙΩΝ ("of the Syracusans"). Head of the nymph Arethusa surrounded by four dolphins.  
Reverse: A quadriga, with Nike alighting upon the yoke; commemorating the Olympian victory of King Gelon.

The coinage of Syracuse, while lacking the artistic vigor of the coins of Asia Minor and the noble simplicity of Greece, was the richest in design and the most delicately executed of the Greek money. Agonistic subjects were commonly chosen for this types. Gelon, tyrant of Gela, won the chariot race at Olympia in 488 B. C.

### 6. Lepton (?), Palestine.

Copper; the widow's mite. Luke xxi, 2.  
This coin has been termed *lepton* on the authority of Theophylact and of Mr. Du Bois, for many years director of the United States Mint, Philadelphia.

Obverse: יהונתן המלך ("Jonathan the king"). Within the intermediate spaces of the sun with eight rays.  
Reverse: ΒΑΣΙΛΕΥΣ ΑΛΕΞΑΝΔΡΟΥ ("of King Alexander"). Round an anchor.

This was the smallest Jewish coin in circulation in Jerusalem, worth intrinsically perhaps not more than a mill in United States money. The people were forbidden to bring into the temple coins that were not Jewish. Small bronze pieces were struck, many of them over other coins, by Alexander Jannæus, king of the Jews (104-78 B. C.).

### 7. Tetradrachm of Ephesus.

Silver; 234 grains. 400-336 B. C.  
Obverse: ΕΡ ("of the Ephesians").  
Reverse: ΑΡΙΣΤΟΔΗΜΟΣ ("Aristodemus"). The fore part of a stag and a date-palm.

This is an example of the Ephesian coinage between the peace of Antiochus and the time of Lysimachus. The only subjects treated on the rudely executed coins of Ephesus refer to the worship of the Ephesian Diana, an Asiatic goddess identified by the Greeks with Artemis, the essentially different. Both the stag and the bee are her symbols.

### 8. Stater of Amphipolis.

Silver; 220.5 grains. 400-336 B. C.  
Obverse: Head of Apollo, facing.  
Reverse: ΑΜΦΙΠΟΛΙΤΕΩΝ ("of the Amphipolitans"). A racing-torch.  
The silver coins of this Thracian city, founded as an Athenian colony in 437 B. C., are remarkable for intensity of expression of the face.

### 9. Coin of Argos.

Silver; 184 grains. 400-336 B. C.  
Obverse: Head of Hera, wearing stephanos adorned with flowers, earring, and necklace.  
Reverse: ΑΡΓΕΙΩΝ ("of the Argives"). A wolf between two dolphins.

This head of Hera is copied from the famous statue of that goddess by Polykleitos at Argos. The wolf is the emblem of the Lycian Apollo, symbolizing water slain by the god of warmth and light. The dolphins, emblems of the Delphic Apollo, symbolize the calming of the wintry sea and resumption of navigation.

### 10. Stater of Corinth.

Silver; 132.5 grains. 400-336 B. C.  
Obverse: Pegasus flying; hence, the letter Koppa (the initial of the city's name).  
Reverse: Head of Pallas; behind, an acanthus.  
The antique Koppa was retained as a distinguishing mark of the coinage of Corinth, which, in the 6th and 4th centuries B. C., had a circulation second only to that of Athens. The head of Athena on these coins is always represented with a Corinthian helmet.

### 11. Persian Daric.

Gold; 129 grains. 521-485 B. C.

Obverse: A crowned archer, holding bow and spear (the royal symbol of Persia).

The earliest form of this coin, struck in the reign of Darius I.

### 12. Rhodian Stater.

Gold; 132.6 grains. 400-336 B. C.  
Obverse: Head of Helias, facing, his hair arranged in locks suggestive of rays.

Reverse: ΡΩΔΙΩΝ ("of the Rhodians"). A rose with a bud and a spray of vine with grapes, the whole in an incuse square.

The rose borne on the coins of Rhodes is a speaking type, expressing the name of the city. This and the head of Helios are almost the only types used. The head has a peculiar grandeur on the Rhodian coins, especially on this, one of the finest of all Greek coins.

### 13. Macedonian Double Stater.

Gold; 264 grains. 336-323 B. C.  
Obverse: Head of Pallas.

Reverse: ΑΛΕΞΑΝΔΡΟΥ ("of Alexander"). Nike, holding a wreath and a trophy.  
This coin is probably from one of the European mints, and was struck during the lifetime of Alexander.

### 14. Tetradrachm of Thurium.

Silver; 244.1 grains. 400-336 B. C.  
Obverse: Head of Pallas, wearing a crested Athenian helmet, on which is Scylla, with dogs' heads springing from her waist; on the neck-piece, a griffin.

Reverse: ΘΟΥΡΙΩΝ ("of the Thurians"). A butting bull; in exergue, a fish (the tunny).

This is a magnificent specimen of the engraver's art. Thurium, founded by the Athenians near the site of Sybaris, may have borrowed the device of the bull from the coin of the more ancient town.

### 15. Decadrachm of Syracuse.

Silver; 660.0 grains. 400-336 B. C.  
Obverse: ΞΥΡΑΚΟΣΙΩΝ ("of the Syracusans"). Head of Persephone, wearing a wreath of grain and surrounded by dolphins; hence, EYAINÉ (standing for Euanthes, the name of the artist).

Reverse: A victorious quadriga; in exergue, armor and the word ΑΓΑΑ ("prizes").

These coins, issued by Dionysius, mark the acme of realistic art and artistic refinement in coin-engraving, of which Evæctetus was one of the greatest masters of all ages.

### 16. Carthaginian Stater.

Silver; 265 grains. 400-336 B. C.  
Obverse: Head of a female (perhaps Dido or the moon-goddess), wearing a tinnia of Phrygian form.

Reverse: A lion and a palm-tree; in exergue, a Punic inscription signifying "of the people of the camp."

This is the work of a Greek engraver, and excels all other Carthaginian coins that have been preserved. When the fugitive Phœnicians, shipwrecked on the African coast with their queen, Dido, were digging the foundations of the city that was to be their future home, they came upon a palm-tree branch and a horse's head, which were taken to be good omens and were subsequently adopted as monetary types.

### 17. Carthaginian Dodecadrachm.

Silver; 700 grains. 280-190 B. C.  
Obverse: Head of Persephone.

This type is executed in a debased and exaggerated style, very different from the purer art of the earlier period.

### 18. Roman Denarius.

Silver; 66.7 grains. 280-190 B. C.  
Obverse: Head of Roma, wearing the winged helmet; behind, X (signifying 10 asses).

Reverse: ROMA (Rome) (in incused letters). The Diæscurl, represented as charging at the battle of Lake Regillus.

This piece belongs to the earliest period of the Roman silver coinage, the first issue of which was struck in 269 B. C.

### 19. Coin of Selinus.

Silver; 269 grains. 480-400 B. C.  
Obverse: ΞΕΛΙΝΟΣ. Selinus, the tutelary river-god, sacrificing at an altar, before which is a cock; in his left hand, the lustral branch; behind, a selinon or parsley-leaf and a bull's image on a pedestal.

Reverse: ΞΕΛΙΝΟΝΤΙΩΝ ("of the Selinuntines"). Apollo and Artemis in a quadriga, Apollo shooting arrows. The river-god is engaged in an Esculapian libation, as is shown by the cock, and the design symbolizes the draining of a marsh, whereby the city was relieved of a plague sent by Apollo, which is referred to by the type of the reverse.

The selinon-leaf is a striking emblem of the town, which took its name from this plant, an abundant product of its fertile soil.

### 20. Egyptian Pentadrachm.

Gold; 228.2 grains. 306-284 B. C.  
Obverse: Head of Ptolemy I., diademed and with an eagle.

Reverse: ΠΤΟΛΕΜΑΙΟΥ ΒΑΣΙΛΕΥΣ ("of King Ptolemy"). An eagle on a thunderbolt.

Ptolemy Soter, who assumed the title of king in 306, struck coins in Cyprus, Cyrenæa, and other parts besides Egypt. He laid the foundation of the Alexandrian library.

### 21. Roman Veturatulus.

Silver; 44.5 grains. 280-190 B. C.  
Obverse: Head of Jupiter.

Reverse: ROMA. Victory crowning a trophy; between them, a sow (the moneyer's mark).

The veturatulus was at first a coin of Campania; but after the fall of Capua (211 B. C.) it was minted at Rome and became current in the provinces.

### 22. Tetradrachm of Lysimachus.

Silver; 262 grains. 336-280 B. C.  
Obverse: Head of the deified Alexander, with the horn of Ammon.

This is one of the coins struck by Lysimachus, king of Macedonia. The head of Alexander is probably copied from the bronze statue by Lysippus or from a gem-portrait by Pyrgoteles. Lysippus was the only sculptor permitted to make statues of Alexander. Pyrgoteles had the exclusive privilege of engraving him, and the conqueror himself said that Apelles alone should paint him.

### 23. Macedonian Coin.

Silver; 259.5 grains. 179-168 B. C.  
Obverse: Head of King Perseus; hence, ΖΗΔΙΟΥ ("of Zoius").

This is a striking portrait of the last Greek king of Macedonia. Zoius was probably director of mints.

### 24. Roman Sestertius.

Silver; 16.5 grains. 280-190 B. C.

Obverse: Head of Roma; behind, IIS (2 asses and a semis).

Reverse: The Dioscuri.

After the introduction of silver coinage at Rome (269 B. C.) the issue of gold and silver money was forbidden to all the subjected provinces of Italy.

### 25. Roman Quinarius.

Silver; 34.5 grains. 280-190 B. C.  
Obverse: Head of Roma, wearing the winged helmet; behind head, V (5 asses).

Reverse: ROMA (incuse letters). The Dioscuri charging.

The ideal head personifying the city gave place in a later period to actual portraits of historical personages.

### 26. Coin of Cnossus, Crete.

Silver; 257.5 grains. 190-100 B. C.  
Obverse: Head of Minos, with royal diadem.

Reverse: ΚΝΟΣΙΩΝ ("of the People of Cnossus"). A square labyrinth.

Minos was the reputed founder of the city, and on its coins the labyrinth is nearly always represented. The local types of the Cretan coinage were retained under the Macedonian empire and in this later coins of debased Attic style, of which this is an example.

### 27. Egyptian Octadrachm.

Gold; 429 grains. 285-247 B. C.  
Obverse: Head of Arsinoë II., sister and second wife of Ptolemy Philadelphus II.

Reverse: ΑΡΣΙΝΟΗΣ ΦΙΛΑΔΕΛΦΟΥ ("of Arsinoë, wife of Philadelphus"). Double carucopia.

This is one of a series of magnificent gold coins bearing authentic portraits of the reigning sovereigns, and not the traditional portrait of the founder of the dynasty represented on the silver money.

### 28. Tetradrachm of Smyrna.

Silver; 264 grains. 190-133 B. C.  
Obverse: Head with turreted crown.

Reverse: ΣΜΥΡΝΑΙΩΝ ("of the people of Smyrna"), in a wreath of oak-leaves.

The turreted head may be a personification of the town.

### 29. Tetradrachm of Athens.

Silver; 265 grains. 480-400 B. C.  
Obverse: Head of Athena.

Reverse: ΑΘΕ ("of Athens"). Owl and olive-branch. This is an archaic coin. This copy of the archaic style was maintained because any alteration in the appearance of the Athenian coins, which had a very wide circulation and covered a long period of time, might have damaged their credit.

The wreath of olives alludes to the widely celebrated excellence and value of the oil of the Athenian olive-groves.

### 30. Shekel of Jerusalem.

Silver; 220 grains. 143-135 B. C.  
Reverse: יהושע הריבון ("Jerusalem the holy").

A triple lily. "I will be as the dew unto Israel: he shall grow as the lily." Hosea xiv, 5.

The right to coin money was conferred by Antiochus VII. (138-129 B. C.) on Simon Maccabæus, the brother of Judas, high priest and prince of the Jews. The type on the reverse is supposed to represent either Aaron's rod budding or a native lily. The challice on the obverse of these coins is usually called the pot of manna. The shekel with which Abraham bought this cave of Machpelah was a weight, and in the book of John is called *kestia* (a lamb), the weight, perhaps, being so shaped.

### 31. Roman Coin.

Gold; 120 grains. 2 B. C.  
Obverse: CAESAR AVGVS TVS DIVI F. PATER PATRIAE ("Cæsar Augustus, son of the god, father of his country"). Head of Augustus, laureate.

Reverse: C. L. CAESARES. AVGVS TI F. COS. DESIG. PRINC. IVENT ("Caius and Lucius Cæsar, sons of Augustus, consuls elect, princes of the youth"). Caius and Lucius, each clad in toga and holding a shield and spear; in the field, a simpulum and an augur's staff.

Caius and Lucius, sons of his daughter Julia, were chosen by Augustus as his heirs, but both died before his own death.

### 32. Roman Aureus.

Gold; 123 grains. About 27 B. C.  
Obverse: CAESAR. Head of Augustus.

An aureus of Julius Cæsar weighed 123 grains, exactly the weight of an English sovereign. An aureus of Augustus that weighed 540 grains was found at Herculaneum. The fee of a lawyer was a hundred aurei. By the Justinian code it was allowed to risk only one aureus at dice.

### 33. Coin of Antioch (?).

Silver; 221 grains. 52-30 B. C.  
Obverse: ΒΑΣΙΛΕΥΣ ΚΛΕΟΠΑΤΡΑ ΘΕΑ ΝΕΩΤΕΡΑ ("Queen Cleopatra, a later goddess"). Bust of Cleopatra, diademed. This is the celebrated Cleopatra.

Reverse: ΑΝΤΩΝΙΟΥΣ ΑΥΤΟΚΡΑΤΟΡ ΤΡΙΤΟΝ ΤΡΙΩΝ ΑΝΑΡΩΝ ("Antonius Imperator for the third time, triumvir"). Head of Mark Antony.

### 34. Bactrian Coin.

Silver; 261.2 grains. About 180-150 B. C.  
Obverse: Bust of the king, with helmet of unusual shape. Reverse: ΕΛΙΑΕΩΣ ΜΕΤΑΛΟΥ ΕΥΚΡΑΤΙΔΟΥ ("of the great king, Eucratides"). The Dioscuri on horseback.

The coins of this king have been found in great abundance, an evidence of his vast wealth. He greatly extended the territory of the Greco-Bactrian princes, and from this fact was called "the lord of a thousand cities."

### 35. Tetradol of Pergamus.

Silver; 44 grains. 190-100 B. C.  
Obverse: Head of Pallas, wearing a crested helmet.

Reverse: A palladium.

### 36. Roman Coin.

Gold; 123 grains. About 43-42 B. C.  
Obverse: BRVTVS IMP. ("Brutus Imperator"). Head of Brutus, the whole in a laurel wreath.

Reverse: CASCA LONGVS. A trophy between the prows of two ships.

Casca Longus was another name of Publius Servilius Casca, who struck the first blow at Cæsar.

See what a rent the envious Casca made.

Шакспир Julius Cæsar act. iii, sc. 2.

This trophy commemorates a naval victory gained by the lieutenants of Brutus and Cassius over the fleet of the triumvirs, at the very time the conspirators themselves were being defeated on land.

col-leg-ia-ty, 1 ko-leg-ia-ty; 2 cō-lēg-ia-ty, n. A collegiate.

col-leg-ia, 1 kol'i; 2 cō-lēg, n. 1. [U. S., Canada, & Scot.] An incorporated institution in which advanced courses of instruction are given. Specifically: (1) A school for instruction in the liberal arts, having a course of study either fixed or partly fixed and partly elective, commonly requiring four years for completion. The regular course of the typical college consists of the English, Latin, and Greek languages, mathematics, the moral and mental sciences, physics and other departments of natural science, and in recent years French or German, or both. The college has a right to confer various degrees. See *UNIVERSITY*. Some American colleges include professional schools as departments. In others, where the corporation has the title of university, the term college is officially restricted to the academic department, called also the college proper. In some instances there is no sharp distinction between the university and the college. The entrance requirements vary from those of certain Western and Southern colleges, which closely resemble the modern high school, to those of the larger institutions, such as Columbia, Harvard, Princeton, and Yale, where a four-year classical high-school course is the necessary preparation. See *UNIVERSITY*. Formerly most colleges had a fixed classical curriculum which led to a Bachelor of Arts degree, but at present the elective system enables a student to take a non-classical or scientific course, and engage in postgraduate work in the senior year, while frequently the complete course may be taken in less than four years.

(2) A school for instruction preparatory to professional life; as, a theological college; a medical college. In the United States theological schools are often called seminaries. (3) A school for preparation for any technical or artistic pursuit; as, a college of music; a college of agriculture. 2. [Eng. & Ir.] (1) Any one of the educational institutions that together constitute a university; originally, a society of scholars, incorporated for study and instruction (compare def. 5); as, King's College, Cambridge, Magdalen College, Oxford.

About the middle of the thirteenth century . . . the universities began to assume a new form, by the erection of colleges for the residence of their members as separate communities. CHASE *Eng. Lit. and Lang., Universities* in vol. i, p. 168. [L. & C. 1864.]

(2) Any similar institution that may be affiliated under a university control, tho not in a university town; as, Hartley College, Southampton. Each of these colleges has buildings, foundation, and faculty of its own, but its students take university examinations and receive degrees from the university authority. In England also, as in the United States, technical and professional schools, and even the military and the naval schools, are sometimes called colleges.

(3) An institution of advanced preparatory rank; ns, Eton College; Winchester College. 3. In France, a public school of secondary instruction, similar to a lyceum, but differing from it in being supported by a municipality and not by the general government. 4. The buildings or collection of buildings owned and used by a college. 5. A body of associates or colleagues; as, the ancient college of augurs; the electoral college. 6. A course of lectures or studies. 7. [Slang.] A prison. 8. Any assemblage or gathering; as, a college of bees. 9. A charitable foundation, hospital, or asylum. 10. [Rare.] A clerical community living on a foundation. 1. *Bot.* Of, pertaining to, or like colenchyma. 2. Of, pertaining to, or containing colenchyme. col-le-m-i-a-ty, n.

cal-len-chyme, 1 ko-lēn-chim; 2 cō-lēn-chim, n. *Spong.* The gelatinous mesodermal matrix of certain sponges, containing colenchytes. 2. *Bot.* A colenchyma.

col-len-chyte, 1 kol'en-chyt; 2 cō-lēn-chyt, n. ing colenchyma; *chl.* *Spong.* One of the irregularly branched, stellate cells in colenchyme, parenchyma-cell. [*Gr. kolla*, glue, + *en*, in, + *kytos*, cavity, < *kyo*, hold.]—col-len-chy-tal, a.

Col'ler-y, 1 kol'er-y; 2 cō-lēr-y, n. [Fr. 1-iz; 2-iz, pl.] Cal'ler-y, [Anglo-Ind.] One of non-Aryan race of southern India; notorious thieves. Col'ly horn, a long brass horn used by the Colliers of India. [*Lat. collet*, 1 kol'et; 2 cō-lēc, n. To place in or furnish with

col'let, n. 1. *Mech.* A collar, clutch, or clamping-piece consisting of jaws that may be pressed together to hold a rod. 2. In a brilliant-cut gem, a culet. 3. The ring or rim in which a gem is set. 4. The part of a canson between the astragal and the mule. 5. In watchmaking, a small collar in which the inside end of a balance spring is fastened. 6. A collar neck-band. [*Fr.* < *LL. collatus*, dim. of *L. collum*, neck.]

col-le-ter, 1 ko-lē-ter; 2 cō-lē-ter, n. *Bot.* A glandular hair on certain leaf-buds, producing a gluey substance. [*Gr. kollō*, glue together, < *kolla*, glue.]

col-le-te-ri-um, 1 kol'tē-ri-um; 2 cō-lē-te-ri-um, n. [*Lat. A, pl.*] *Entom.* A glandular abdominal organ secreting the cement for gluing together the eggs. [*Gr. kollō*, glue together, < *kolla*, glue.]—col-le-te-ri-al, a.

col-let'te, 1 ko-let'te; 2 cō-lē-tē. I. a. Agglutinaat; gluey. II. n. A gluey substance. [*Gr. kollō*, glue, < *kolla*, glue.]

col-le-tin, 1 kol'tin; 2 cō-lē-tin, n. [Fr.] A piece of armor for the neck and upper part of the breast.

col-le-to-cys-to-phore, 1 ko-lē-to-sis-to-phōr; 2 cō-lē-to-cys-to-phōr, n. *Zooph.* One of the marginal bodies of lucernaria hydrozoa. [*Gr. kollō*, glue, one who glues, + *cyst* & *Gr. phērō*, bear.] col-le-to-cys-to-phor.

Col'le-ton, 1 kol'i-ton; 2 cō-lē-ton, n. A county in S. South Carolina. 1,351 sq. m.; county-seat, Waterboro.

col'le-to-ri-chose, 1 kol'tō-ri-chōs; 2 cō-lē-to-ri-chōs, n. *Phytopath.* A plant-disease caused by a parasitic melanconaceous fungus belonging to the form-genus *Colletotrichum*.

Col'le-to-ri-um, 1 kol'tō-ri-um; 2 cō-lē-to-ri-um, n. *Mycol.* A form-genus of microscopic parasitic fungi causing destructive diseases of beans, clover, cotton, citrus fruits and other plants.

col'ley, n. 1. Same as COLLE. 2. [Ir.] Same as COLLY. col'ly, 1 kol'i; 2 cō-lē. From Latin collum, neck; a combining form.—col'ly-cap'i-tal, o. [Rare.] Of or pertaining to both head and neck.

cal-le-u-lus, 1 ko-lē-yu-lus; 2 cō-lē-yu-lus, n. 1-iz, 1-lol; 2-iz, pl. *Anat.* A small elevation. [*LL.*, dim. of *L. collis*, hill.]—en-lē-u-late, a.

col-lide, 1 ko-lōid; 2 cō-lōid, v. [*Col-limē*; *col-limē*, *ing.*] I. t. To dash into each other, as two moving bodies; meet and strike violently, as trains or steamships; as, the "Floridan" collided with the "Republican" off Nantucket light, Jan. 23, 1909.

The flints that hide the seeds of fire, thus lose'd in air collide. DARWIN *Orid, Metamorphoses* bk. xv, l. 520.

2. Figuratively, to come into conflict; clash. Literary style has its place, and Latimer had his, and when they collided the old-fashioned homilist always won the day. T. W. HUNT in *Homiletic Review* May, 1889, p. 390.

II. t. [Rare.] To knock together; bring into collision. [*L. collido*, < *coll-* (< *cum*), together, + *lido*, strike.] Syn. compare COLLISION.—*Prep.* with.

col'li-din, 1 kol'i-din; 2 cō-lē-din, n. 1. A pleasant-smelling oily liquid compound (C<sub>15</sub>H<sub>11</sub>N) contained in coal-tar and Dippe's oil. 2. A poisonous ptomaine derived from the pancreas of the ox and from gelatin. [*Gr. kolla*, glue.]

col'li-c, 1 kol'i; 2 cō-lē, n. A Scottish sheep-dog of remarkable intelligence, with fox-like muzzle and shaggy neck and chest. See *noo*, n. [*Prob.* < Gael. *collain*, puppy.]

col'lier, 1 kol'yer; 2 cō-lē-er, n. 1. One who works in a coal-mine. 2. A vessel employed in coal-carrying; also, one of her crew. 3. The collier-aphis. 4. [*Prov. Eng.*] The swift. 5. A charcoal-burner; also, a dealer in coal. [*ME.* *colt*, < *col*, coal.]—col'lier-a-phis, n. The dolphindry.

col'lier, n. 1. Henry Watkins (1781-1855), an American lawyer, Governor of Alabama. 2. Jeremy (1750-1826), an English theologian and Jacobite. 3. John Payne (1759-1853), an English antiquary and critic. 4. *Life of Shakespeare*. 5. Peter Feunon (1846-1909), an American publisher; head of P. F. Collier & Son, publishers of *Collier's Weekly*.

col'lier-y, 1 kol'yer-y; 2 cō-lē-er-y, n. [*res*, 1-iz; 2-iz, pl.] 1. A coal-mine with its buildings and appurtenances. 2. The coal-trade. 3. A ship, or ships, used in the coal trade.

col'lie-shang'le, 1 kol'i-shang; 2 cō-lē-shang'le, n. [*Scot.*] A wrangle; brawl; hubbub.

col'li-form, 1 kol'i-form; 2 cō-lē-form, a. Having the form of a collar, as a pronotum; neck-shaped. [*L. collum*, a collar.]

col'li-gate, 1 kol'i-gāt; 2 cō-lē-gāt, rt. [*gāt*; *en*, -oat-*ing*.] 1. To tie, or fasten together. 2. *Logic.* To bind together (facts or groups of facts) by means of some suitable conception or explanation; as, certain phenomena of matter are colligated by the law of gravitation.

He had discovered and colligated a multitude of the most wonderful . . . phenomena. TRINDALL *Fragments of Science* lect. xii, n. 360. [L. 1871.]

[< *L. colligatus*, pp. of *colligo*, < *col-* (< *cum*), together, + *ligo*, bind.]

col'li-ga-tion, 1 kol'i-gā-shon; 2 cō-lē-gā-shon, n. 1. A binding or fastening together. 2. *Logic.* (1) The arranging of facts under a conception or hypothesis. (2) An imperfect form of definition in which the constituent individuals of a species, or the species of a genus, are gathered together, as in the statement "north, east, south, and west are the cardinal points": the reverse of division.

col'li-ga-tive, 1 kol'i-gā-tiv; 2 cō-lē-gā-tiv, o. *Chem.* Governed by the number of molecules; as, a colligative property.

col'li-mate, 1 kol'i-māt; 2 cō-lē-māt, rt. [*MAT*; *en*, -MAT-*ing*.] 1. To bring into line, as the axes of two lenses or of two telescopes; also, to make parallel, as refracted or reflected rays. 2. To determine or correct the direction of the line of sight of a telescope by the use of a collimator, or by vertical reflection from the surface of a basin of mercury.

An instrument with the cross-wires perfectly adjusted is said to be correctly collimated. J. N. LOCKYER *Elements of Astronomy* p. 241. [A. 1889.]

[< *L. collimatus*, for *collineatus*; see COLLINEATE.]

col'li-ma-tion, 1 kol'i-mā-shon; 2 cō-lē-mā-shon, n. 1. The act of collimating. 2. An error of collimation.—axis of collimation, same as LINE OF COLLIMATION.—error of c., the deviation of the line of sight of a telescope from a plane at right angles to the axis on which it turns.—line of c., the correct line of sight or optical axis, as of a telescope.

col'li-ma-tor, 1 kol'i-mā-tor or -tor; 2 cō-lē-mā-tor, n. 1. A fixed telescope with spider-lines in its focus, used to adjust a second telescope by looking through it the reverse direction with the latter, so that images of the spider-lines are formed in the focus of the second telescope, as if they originated in a distant point. 2. That tube of a spectroscopic which bears the slit and contains lenses for bringing into parallelism the rays that are to fall on the prism or grating; also, the lens itself.

The light of the spark or other discharge is made to fall on the slit of the collimator of the spectroscopic, and after being analyzed by the prisms is observed through the telescope. J. C. MAXWELL *Electricity* p. 121. [MACH, 1883.]

—floating collimator, a small telescope suspended in a mercury bath by means of a metal float.

Colophon of Nicolas Jenson (1451).

mental color. They are spoken of as *n. polir* or *stand of colors*; or, in the U. S. cavalry, as *standards*. In the British army each regiment or battalion has a *royal or King's color* (Union Jack) and a regimental color consisting of a silk flag of a color similar to that of the regiment's facings; it has the blue union in the corner and is embroidered with the number, title and honors of the regiment. In the U. S. army national and regimental colors vary in form and size. According to the *U. S. Infantry Drill Regulations*, "The word color implies the national color and includes the regimental color when both are present." The infantry regiments carry a national color embroidered in silver and a regimental color made of blue silk with an embroidered U. S. coat of arms containing the number and name of the regiment in white characters upon a red scroll. The battalions of engineers carry the national color, upon which is embroidered the title of the battalion, and the *battalion color*, which is made of scarlet silk and contains a castle in the center with the battalion number above and the words "U. S. Engineers" below. The *Caroly standards* are smaller than the infantry colors: the regimental standard being of yellow silk and containing an embroidered U. S. coat of arms in the center and the name and number of the regiment in white characters upon a red scroll. On parade the regimental is placed on the left of the national color. The colors of a war-ship are the national flag carried over the stern whenever the ship is in commission and a masthead flag denoting the rank of its commander when he is a flag-officer; those of a yacht or a merchant ship are the national ensign (in its appropriate form — see FLAG) and the flag of the vessel's owner or club. Lack of proper colors exposes a ship to arrest for piracy, hence the phrases to show one's colors, to sail under false colors, etc. Lowering and lifting, or dipping, the colors, is a form of salute or its acknowledgment, more common and less ceremonial at sea than on land. To strike one's colors is to indicate surrender; hence the opposite phrases: to stick to one's colors, to sail the colors to the mast, and the like.

(2) flag, badge, ribbon, or other device used as a distinction; as, college colors, colors of a race-horse, etc. (3) U. S. Army & Navy. The salute made to the national flag when it is hoisted in the morning and lowered in the evening. The ceremony is accompanied by special music. 9. Art. Coloring. 10. Mus. (1) Timbre; clang-tint. (2) The tone, or characteristic effect, of a composition as produced by specific rhythmic, harmonic, or melodic means. 11. (1) A semblance; appearance; as, having color of truth. (2) A prima-facie right. See COLOR OF OFFICE and COLOR OF TITLE, below. 12. Peculiar character; kind; variety; tone.

And of this great step, modifying profoundly the colour and character of the government.

Bartholomew, *Ann. Commonwealth* vol. i, p. 356. [MACC. 1833.] 13. Phren. The faculty of appreciating colors and their harmonious combinations. 14. Her. See TINCTURE, n. 15. Law. An apparent or prima-facie right of action, but insufficient in point of law: a plea formerly advanced with a view to having a case tried by the court as a question of law instead of by the jury as a question of fact. 16. A small particle or trace of gold in auriferous sand or gravel. 17. Liveliness or animation; vividness, especially in literary work. 18. In calico-printing, a coloring-matter or mordant which is thickened with gum or starch. 19. A dye or dyestuff.

The natural and artificial colors such as dyes and dyestuffs are divided into classes according to their properties and uses. The acid colors are those which are used in an acid bath for the dyeing of animal fibers; and the basic or tannic colors are mostly substituted ammonias, and are used in calico-printing and glogham-dyeing. The direct cotton or Kongo colors are dyes that may be used without mordants. Monogenetic colors are those from which only one hue can be produced, while poly-genetic colors are those from which different hues can be formed when different mordants are employed. Colors are also classed according to (1) the color. Any compounds which they resemble or from which they are derived and (2) the organic groups which they contain. Some of these classes are the acridine colors, alizarin c. (artificial mordant dyes allied to alizarin), anthracene c., azo c. (see AZO-NTR), benzidine c., diazo c., Janns c. (a class of dyes which contain the sulfonic acid, azo, and amido groups), monoazo c., nitroso c., oxazin c., oxytlen c., phthalic anhydride c. (such as the eosins), stilbene c., sulfid or sulfur c. (formed by fusing certain coal-tar products with sodium sulfid, thiosulfates, or sulfur), sulfone c., tetrakisazo c., thiazin c., triazo c., and azo theme c.

20. pl. Furo. A manner of playing by which the color of the card to be bet upon is determined by the color of the first winning or losing card. JOF = L. color tint; col'ort; col'ouret. SYN: hue, shade, stain, tinge, tint. See DISGUISE; PRETENSE. Ant: blackness, darkness, gloom, opacity.

— alburnen color, in textile-printing, any pigment which is mechanically held to the fiber through the agency of coagulated albumen. — alluring c. (*Blot.*), a color in an animal or plant serving as a beneficial attraction. — animal colors, in the Darwinian theory of natural selection, certain colors distinguishing or rendering recognizable various animals, insects, etc., for specific purposes, such as for concealment (see CAMOUFLAGE), ALLOCHRYTIC, ANTICRYTIC, PACHYCRYTIC, for recognition and warning (see SEMIATIC, ALLOSEMATIC, APOSEMATIC, EPISEMATIC, PSEUDOSEMATIC, for protection (see APATETIC), or during courtship (see EPICAMIC, ALLEPIGAMIC). — application colors, see SPIRIT-COLORS. — artists' colors, fine pigments used by artists as distinguished from coarse ones used by house-painters. — broken color, a color produced by mixing two or more pigments. — color-base, n. Chem. A substance which serves as a base for the color which is itself colorless. — c-beater. See COLOR-GUARD. — c-box, n. A box in which colors are kept. Specif.: (1) A box for artists' colors and implements. (2) The box supplying colors to the rollers in calico-printing. (3) An instrument for blending certain colors of the spectrum in given proportions. — c-chest, n. Now. A receptacle for flags used in signalling, etc. — c-chord, n. A harmonious combination or group of colors, as in a painting or a costume. — c-company, n. In a regiment, the company which has the custody of the colors. In the United States it is the left company of the right wing of a regiment. — c-constants, n. pl. Three attributes of any color, as: (1) hue, or tone, by which varying tints are distinguishable; (2) luminosity, by which tints differ in respect to "light" and "dark" values; (3) intensity, by which colors otherwise alike differ in limpid purity. — c-curve, n. A curve indicating the different focal lengths of telescopic object-

glasses for the rays of various wave lengths. — c-defective, n. One partially or totally color-blind. — c-dia-gram, n. A systematic arrangement of colors, generally in such manner that compound colors shall lie on the straight line joining their primaries. Called, according to its shape, c-circle, c-triangle, etc. — c-disk, n. A disk slit on one side from the periphery to the center for use in a color-wheel. — c-color-wheel, n. c-doctor, n. In calico-printing, a blade for wiping surplus color from the engraved roll. — c-filter, n. Same as c-SCREEN. — c-guard, n. [U. S. A.] A guard for the protection of the colors. In each regiment it consists of two color-sergeants who are the color-bearers (the senior color-sergeant carrying the national color; the junior color-sergeant, the regimental color), and two experienced soldiers are picked by the colonel. — c-hearing, n. Med. A condition in which color-sensations and acoustic sensations are habitually associated. — c-index, n. Hemat. A guide for determining the amount of hemoglobin present in a blood-corpuscle. — c-line, n. 1. The distinction drawn between white persons and those of negro blood. 2. Psychophysics. The outline of a plane figure, or any straight line joining two points in a solid figure, which is designed to give a diagrammatic representation of color-sensations and their interrelations. 3. pl. A series of fine parallel lines on any part of a heraldic device, denoting the tincture by their direction. — color-man, n. [Eng.] A maker or seller of paints or colors. — c-mixer, n. An apparatus for mixing colors by means of a color-wheel. See SPECTRUM. — c-mixture, n. Combination of fundamental colors into another color. — c. of office (*Law*), a pretense or false appearance of authority for an act done on the part of a de-facto officer. — c. of title (*Law*), an apparent, but not valid, title to property, especially under a written instrument. — c-pain, n. A shallow lined vessel in which colors are mixed for cotton-printing. — c-party, n. A party having charge of the colors of a British regiment. — c-photography, n. The photographic reproduction of things in their natural colors: (1) theoretically by the direct action of light upon a negative; (2) practically, thus far, by the combination of negatives made through complementary color-screens, the *three-color process*, or as a positive on glass by the screen-plate process, as lumiere, omnicolor, etc. — c-plate, n. Photo-engraving. One of a series of set of plates, each representing a certain portion of a picture, intended to be printed in different colors in combination: a stimulation of litho-graphic work. — c-screen, n. Photog. A sheet of glass, or other transparent material, absorbing a certain definite portion of the spectrum, through which only complementary rays pass to the negative. — c-slab, n. A piece of white porcelain on which the colors used in painting porcelain are burned: used as a guide, to indicate the effect of firing on colors. — c-strider, n. Colors standardized. See SPECTRUM. — c-striker, n. [Eng.] A color-maker. — c-tone, n. See TONE, 10, 11, 12. — c-top, n. A top painted with some or all the colors of the spectrum, showing the effect of their combination during its rotation. — c-variation, n. The range of variability in color within the limits of a species. — c-variety, n. Zool. A variety distinguished from the typical form of the species by some constant peculiarity of color. — c-wackiness, n. Inability to distinguish colors at a low degree of saturation or intensity. — c-wheel, n. A wheel designed to exhibit the proportion of primary colors in any shade of color. It consists of color-disks bearing primary colors and white and black, constructed so as to revolve within a graduated circle. The disks can be arranged to overlap to any desired extent, and when rapidly rotated convey the impression of the color of this combination. — complementary c., one of two colors which, when combined, produce white or nearly white light, as red and blue. — c-disk, n. A color that produces no reflections. — express c. (*Law*), the pleading of a feigned claim of right. — Fechner's colors (*Psychophysics*), the colors produced by the spectrum-top. — light of colors (*Psychophysics*), the series of colored after-images which follow gazing at an intensely bright light. — implied c. (*Law*), a claim of right arising from the pleadings of the defense. — Ingrain c., an insoluble color (usually an azo compound, but sometimes an inorganic compound) which has been produced directly in the fiber of the material by a chemical reaction. — Interference colors, iridescent colors resulting from the interference of light. See INTERFERENCE, 2, and COATING, mode, in text. — tinted, a subdued shade, such as drab. — Newton's scale of colors, a scale based upon Sir Isaac Newton's observations in color. Compare NEWTON'S RINGS, under RING. — opposite c. (*Psychophysics*), a complementary color. — oxidation c., n. color, as insoluble aniline black, which develops on the surface of calico by the oxidation of the material on which it has been impressed. — primary colors. 1. The principal colors into which white light is separated by a prism, once classified as red, orange, yellow, green, blue, indigo, and violet; the colors of the rainbow. 2. The colors by mixing which any other color may be obtained: given variously, now usually as red, green, and blue; violet, when they are mixed by the color-wheel, etc., and red (crimson), yellow, and blue, when they are mixed as pigments. — principal c. (*Psychophysics*), a psychological color of the fundamental type, such as red, blue, etc. — raised c., in calico-printing, a color that is brought out by some external agent, as a mordant. — reflection c.-mixer, a color-mixer provided with a glass put between two strips of colored paper. The reflection of one strip can be observed upon the image of the other through the glass. — saturated c., a color without admixture of black or white. — steam-c. A mordanted color produced and fixed upon various fabrics by means of steam. — to give c., to invest with the appearance of truth or reality; in law, in pleas in confession and avoidance, to admit an apparent right in the opposite party which is then avoided by new matter. — with the colors (*Id.*), serving with the regulars, and not with the reserves.

col'o-rä-ness, 1 kol'er-ä-ness; 2 col'er-ä-ness, a. Affected with color-blindness.

col'o-rä-ness, 1 kol'er-ä-ness; 2 col'er-ä-ness, n. A defect of vision, usually congenital, found in from three to five per cent. of males and a small portion of females. When total—cases of which are very rare—no distinction of color is possible, the spectrum appearing to differ from part to part only in brightness. In red-green blindness, the color-tones lying between red and green or between purple and greenish-blue are confused and appear as shades of a single color. In the few cases, mostly pathological, of yellow-blue blindness, the two colors whose distinction is retained are red and green. The vision of the color-blind may therefore be called dichromatic rather than polychromatic, as in normal vision (see under color). The importance of this in the case of railroad and maritime employees has led to recent great improvements in the tests for color-blindness. See DEUTERANOPIA; PROTANOPIA.

figurative and sometimes a half-humorous sense, as the title of an autobiographical sketch; as, the *Confessions of an Opium-Eater*; the *Confessions of a Fivulous Girl*.  
1. A literary confession, as it were, the confession which every generation, before it passed away, has had to posterity.

MAX MÜLLER *Chips* vol. iii, ch. 1, p. 3. (s. 1874.)  
2. An acknowledgment of belief (in another); recognition of a relation (to another); as, *confession of Christ*.  
3. *Lav.* A voluntary declaration or acknowledgment by a party against whom some misdeed or default is alleged in respect of such allegation. Judicial confessions are those made before a magistrate or court during actual legal proceedings. Such confessions influence the result of the trial, but can not cause conviction unless substantiated by proof. Extra-judicial confessions are those not made in open court before a magistrate.

4. A formula of faith; a body of doctrine put forth as the belief of a church or denomination, subscription to which is usually required of the ministers and sometimes of the members of a church; a creed. Some of the more notable confessions of the Christian church are as follows: *Baptist*—The London Confession of 1689, Philadelphia C. of 1742, and New Hampshire C. of 1833. *Congregationalists*—In Great Britain, the Savoy C., London, 1658, and the declarations of the Congregational Union of England and Wales, 1833; and in the United States, the Bury Declaration of Faith, adopted by the National Council of 1865, and the creed and form of admission into the church submitted by a committee of the National Council, 1883. *Church of England*—The Thirty-nine Articles, 1563-1571. *Dutch Church and Dutch Reformed*—The Belgic Confession, 1563, and Canons of the Synod of Dort, 1619. *Church of Ireland*—The Lambeth Articles, 1595. *Lutheran Church*—The Augsburg Confession, 1530. *Methodist Church*—Articles of Religion, 1784. *Presbyterian Church*—The Westminster Confession, 1647.

5. A formula of public worship embodying a general admission of common sinfulness, used in the Roman Catholic, Anglican, and other liturgies. 6. *R. C. & Gr. Chs.* The contrite acknowledgment to a priest of any mortal sins committed, accompanied with the firm purpose of reform; n part of the sacrament of penance and a condition of absolution. Called in full *sacramental or auricular confession*.

Confession is legally obligatory in Russia, a strict religious duty in the Roman Catholic Church, and a voluntary practise in the English Church.

In the court of her father she [Anne] had been deaf to all that could be urged in favor of transubstantiation and auricular confession. *MACAULAY England* ch. 15, p. 445. [P. s. & c. 1856.]

7. An organization, as a church or communion, using a confession of faith. 8. The tomb of a martyred Christian; also, an altar over such a tomb, or the basilica in which the altar stood; an altar-tomb confessionalary.

They call the crypts and shrines where saints and martyrs are buried the old cathedrals, *confessionals*. A. D. T. WHEAT *Sights and Insights* vol. ii, p. 498. [c. & c. 1876.]

That which is thoroughly proved is said to be established; so is that which is official and has adequate power behind it; as, the *established* government; the *established* church. The continents are *fixed*. A treaty is *ratified*; as appointment *confirmed*. An act is *sanctioned* by any person or authority that passes upon it approvingly. A statement is *substantiated*; a report *confirmed*; a controversy *settled*; the decision of a lower court *sustained* by a higher. Just government should be *upheld*. The beneficent results of Christianity *confirm* our faith in it as a divine revelation.

—*Ant.* abrogate, annul, cancel, destroy, overthrow, shake, unsettle, upset, weaken.—*PREP.*: *confirm* a statement by testimony; *confirm* a person in a belief.—*conf'li-rm-a-bl'*, a. Capable of being confirmed.—*conf'li-rm-ance*, n. The act of confirming, or the state of being confirmed.—*conf'li-rm-ant*, n. A candidate for confirmation; a faith or creed.

—*conf'li-rm-ant*, n. One who administers the rite of confirmation.—*conf'li-rm-a-tiv* (es), a. Tending to confirm; confirmatory.—*conf'li-rm-a-tiv-ly*, adv.—*conf'li-rm-a'tor*, n. Any person or thing that confirms.—*conf'li-rm-a'to-ry*, o.

1. Helping to confirm; giving new proof; proving substantively; making stronger or better-established, as evidence. 2. Relating to the rite of confirmation.—*conf'li-rm-ee*, n. 1. *Lav.* One to whom anything is confirmed. 2. *Eccl.* One who is confirmed.—*conf'li-rm'er*, n. A person or thing that confirms; a verifier; attester; corroborator.—*conf'li-rm-ing-ly*, adv. So as to confirm or corroborate.—*conf'li-rm-or*, n. *Lav.* The person who confirms anything, as a title, to a confirmee.

*conf'li-rm-a'tio*, 1 ken'fer-mā'shən; 2 cōn'fir-mā'shən, n. 1. The act of confirming or strengthening; especially, the establishment of a statement as true; ratification; settlement; added assurance; verification; as, the *confirmation* of the power of a king or of a rumor.

The character of Christ is a strong *confirmation* of the truth of his religion. *CHANNING Works* p. 302. [A. v. a. 1878.]

2. That which confirms or corroborates; proof; evidence; as, what they regarded as trifles he deemed *confirmation*.

3. An ecclesiastical rite in the Roman Catholic, Greek, Anglican, Lutheran, and other churches, consisting of the imposition of the hands of the officiating bishop, priest, or pastor with prayer, and implying the confirming or strengthening of the soul by the Holy Spirit.

It is a solemn act of full induction into the church. By the Roman Catholic and Greek churches it is held to be a sacrament and to leave in the soul a special seal or character. In the Anglican Church the rite is popularly regarded as a formal admission to communion. In the Lutheran churches *confirmation* is an individual ratification by the catechumen of the covenant made for him by his sponsors in baptism, and has no sacramental character.

4. *Lav.* An instrument that supplies some defect or omission in a former conveyance by confirming its purpose and intent, or making a defective title good, or a voidable estate valid. *Rhet.* That department of invention in which the object is to lead to a new belief or modify an old one, convincing the hearer. It effects this by the exhibition of proofs in arguments. [*F.*, < *L. confirmatio(n)*, < *confirmo* (pp. *confirmatus*); see *CONFIRM*.] SYN.: see *APPROBATION*; *PROOF*.

2. *Gram.* A word or part of speech that connects words, clauses, and sentences, or determines the relation between sentences, as *and* in "day and night."

Conjunctions are of two principal kinds:—coordinate (coordinating) and subordinate (subordinating)—according as they join coordinate clauses in compound sentences or subjoin subordinate clauses in complex sentences. (See COORDINATE and SUBORDINATE.) Conjunctions are called correlative when they appear commonly in pairs and each introduces an alternative or a correlative, as *either* and *or*.

Adverbial conjunctions, such as *only*, *unlike*, *thoughts*, but also express relations of place, time, causation, comparison, etc., as *where*, *when*, *because*, *as*, *than*, etc.

Conjunctions are of comparatively late growth, and are either of prenominal origin, or abbreviated forms of expression. R. MORRIS *Hist. Outlines Eng. Accidence* ch. 9, p. 81. [MACM. 1872.]

con-sti-tu-tion, 1 kon'stī-tū'shān; 2 cōn'stī-tū'shōn, n. 1. The act of constituting or establishing; as, at the time of the constitution of the courts. 2. Any established system of parts and their relations, determining the character of the whole; the composition or make-up of a thing; as, the constitution of salt.

Many of the most important questions relating to the constitution of the sun can be solved only during total eclipses.

New York Tribune Nov. 26, 1891, p. 3, col. 2.

3. The fundamental law of a civil state.

Constitutions may be formulated or not. The chief formal constitution is that of the United States of America, which is the fundamental organic law by which the national union of the States was formed, and under which the government is administered. It was framed and adopted by a convention called for that purpose (Sept. 17, 1787), ratified by each State separately, and went into operation March 4, 1789. It can be amended only in the manner prescribed by itself. Amendments I. to X. were added Aug. 20, 1789; Dec. 15, 1791; Amendment XI, Jan. 18, 1803; Amendment XII, Sept. 25, 1804; Amendment XIII, Dec. 18, 1865; Amendment XIV, July 20, 1868; Amendment XV, March 30, 1870; Amendment XVI, Feb. 25, 1913; Amendment XVII, May 30, 1913; Amendment XVIII, January 16, 1920; Amendment XIX, Aug. 26, 1920. Amendments proposed by Congress must be ratified by two-thirds of the States, acting through their legislatures. This kind of constitution is frequently known as a rigid constitution. The British constitution is the whole body of public law, written and unwritten, which has grown up during the ages, consisting of immemorial customs, precedents, judicial decisions, and parliamentary enactments, and is known as an unwritten or customary constitution.

The Constitution of 1789—after all deductions, . . . ranks above every other written constitution for the intrinsic excellence of its scheme, its adaptation to the circumstances of the people, the simplicity, brevity, and precision of its language.

Bryce *Am. Commonwealth* vol. i, p. 25. [Lanc. 1883.]

4. Any established law or custom.

It was an ancient constitution through all Arabia, to hold four months of the year ascribed to the dead was to cease.

Phidoux *Mohomet* p. 57. [Lanc. 1803.]

5. The organic law of any organized body or association of persons; as, the constitution of the American Bible Society. 6. *Civ. Law.* An imperial ordinance or rescript originating in the sole will of the emperor; as, the constitutions of Justinian. [*< L. constitutio* (n-), < constituō; see CONSTITUTE.] con-sti-tu-tion.

arterial constitution, the florid appearance in which the blood is rich in red blood-globules and fibrin.—Constitution of Clarendon (*Eng. Hist.*), a scheme of administrative reform drawn up in 1104, clearly defining the respective jurisdictions of the civil and ecclesiastical courts. Other provisions were; no bishop to be taken to Rome without the king's consent; a dispute between a layman and a cleric to be settled by twelve laymen and a judge; refusal to appear before an ecclesiastical court not to entail excommunication; all suits for debt to be tried in civil courts.—fundamental constitutions (*Amer. Hist.*), a plan for governing the colony of Carolina, drawn up in 1663, probably by Shaftesbury, and embracing a judicial system and a legislature so arranged as to dissolve upon nonagreement into four chambers, together with an elaborate system of feudal tenure.—Irish Constitution of 1752 (*Irish Hist.*), the constitution adopted under Grattan's Parliament, giving effect to resolutions adopted at Dungannon in 1781, declaring the right of Ireland to recognition as a separate nation under the British crown; of the country, to free trade;

of the Judiciary, to absolute independence; for the repeal of the penal laws against the Roman Catholics, and of the limitation of the Muddy Act to a single session.—provincial constitutions [Eng.], decrees issued from time to time by provincial synods under successive archbishops of Canterbury.

Con-sti-tu-tion, n. U. S. Hist. An American frigate of 44 guns, launched Sept. 20, 1797, which became renowned in the suppression of Barbary pirates and for her many victories in the War of 1812, and was the subject of O. W. Holmes's poem *Old Ironsides*, under the influence of which she was again retained in the navy and is now at the Boston Navy Yard. She captured the British frigate "Guerrilla" off Cape Race, Aug. 19, 1812, in an action which lasted 30 minutes.

con-sti-tu-tion-al, 1 kon'stī-tū'shān-al; 2 cōn'stī-tū'shōn-al, n. 1. Belonging to, inherent in, or due to the constitution or composition of a person or thing; as, constitutional weakness. 2. Consistent with, required by, or included in the constitution of a state; lawful; as, a constitutional provision; a constitutional amendment. 3. Existing or exerting power under the provisions of a constitution or recognized fundamental law; as, a constitutional government. 4. [Colloq.] For the benefit of one's constitution. 5. Upholding; loyal to the constitution. [*< L. constitutio* (n-); see CONSTITUTE.] con-sti-tu-tion-a-ry, n. SYN: see RADI-CAL.—Constitutional Church (*Fr. Hist.*), the church established July 12, 1790, by the Constituent Assembly, which provided for the election of bishops by the clergy without applying to Rome, and constituted all the clerics civil functionaries with an annual stipend; abolished by a concordat in 1801 which continued until the Separation Law of Dec. 1905, established the *Associations Cultuelles*—C. clergy, those who accepted the civil constitution of the church so established.—C. To take a constitutional. —con-sti-tu-tion-al-ize, n. con-sti-tu-tion-al-ism, 1 kon'stī-tū'shān-al-izm; 2 cōn'stī-tū'shōn-al-izm, n. 1. The theory or principle of constitutional government. 2. Adherence to that theory.

Constitutionalism, at once quelling Sansculottic riot at Vincennes and Royalist treachery in the Tuileries, is great, this day, and prevails. Carlyle *French Rev.* vol. ii, p. 114. [L. w. 1871.]

con-sti-tu-tion-al-ist, 1 kon'stī-tū'shān-al-ist; 2 cōn'stī-tū'shōn-al-ist, n. 1. One who adheres to the constitution of the country. 2. One who advocates constitutionalism in opposition to absolutism, etc. Specifically: (1) In France, an advocate of the Constitution of 1791. (2) [C.] In Pennsylvania, (a) formerly, one who would retain the State Constitution of 1776, and (b) one who opposed the "Constitutionalists" in 1804.

con-sti-tu-tion-al-ty, 1 kon'stī-tū'shān-al-ti; 2 cōn'stī-tū'shōn-al-ti, n. The state of being in accordance with the Constitution, as of the United States or of a State. con-sti-tu-tion-al-ly, 1 kon'stī-tū'shān-al-i; 2 cōn'stī-tū'shōn-al-i, adv. 1. In accordance with or in relation to the physical constitution; naturally. 2. In accordance with the constitution of the country.

con-sti-tu-tive, 1 kon'stī-tū-tiv; 2 cōn'stī-tū-tiv, a. con-sti-tu-tiv, 1. Helping to form or compose; forming; hence, essential; as, a constitutive enactment; a constitutive element. 2. Having power to enact, institute, or establish; instituting.—1, < L. constitutus, a. A quality or constituent part of anything; an element of a thing. con-sti-tu-tive, 1 kon'stī-tū-tiv; 2 cōn'stī-tū-tiv, n. 1. One who or that which constitutes. 2. Law. One who promises to pay the debt of another. constr., abbr. Construction; construed.

con-strain, 1 kon-strēn; 2 cōn-strēn, v. I. t. 1. To compel to action or to inaction, by either physical or moral means; urge; oblige; as, hunger constrained him to eat. 2. To confine or compress forcibly or unnaturally; as, the dress constrains her waist; a constrained position or voice. 3. *Mech.* To subject to constraint. See CONSTRAINT. 4. To violate; force. II. i. To compel; urge; oblige. [*< OF. constraindre*, < L. *constringo*; see CONSTRUCT.] con-strēn't, n. SYN: see COMPEL; MAKE.—con-strain-a-ble, a.—con-strain'er, n.—con-straining-ly, adv.—con-strainment, n.

con-strained, 1 kon-strēnd; 2 cōn-strēnd, pa. 1. con-strained, 1. Subjected to compulsion, or resulting from compulsion. 2. Unnaturally repressed; marked by constraint. 3. Confined and compressed.—con-strain-ed-ly, adv.—con-strain-ed-ness, n. con-straint, 1 kon-strēnt; 2 cōn-strēnt, n. 1. The operation of power, physical or moral, compelling or preventing action; coercion to or from. 2. The result of constraining; the state of being constrained. 3. Unnaturalness in manner resulting from distrust or diffidence, or from an attempt to repress one's feelings. 4. *Mech.* Anything that prevents a particle or body from moving except in some particular manner; the state of being thus hampered. Constraint is measured, in the case of a particle, by the force multiplied by the square of that velocity which it produces the actual velocity if free. [*< OF. constraindre*, orig. f. pp. of *constraindre*; see CONSTRAINT.] con-strict, 1 kon-strikt; 2 cōn-strikt, n. To compress or draw together at some point by external or internal force; cause to shrink in places; contract transversely; bind; cramp; generally the result of some physical growth; as, a cell or pod constricted into an hour-glass shape.

Large climbing plants . . . often do constrict the trees by which they rise, and, killing them, stand erect themselves.

Livingsstone *Expl. Africa* ch. 16, p. 164. [L. w. 1871.]

[< L. *constringo*, pp. of *constringo*, < con- (< cum), together, + *stringo*, draw tight.] —con-strict-ed, a. Constrained to a particular point or points. con-strict'ed.—con-strict'ive, a. Tending to constrict.

con-stric-tion, 1 kon-strik'shān; 2 cōn-stric'shōn, n. 1. The act of constricting; local or transverse contraction. 2. The state of being constricted; a constricted part. con-stric-tor, 1 kon-strik'tor or -tor; 2 cōn-stric'tor, n. 1. That which compresses as by a band. 2. A serpent that encircles and crushes its prey, as a boa or python. See *illus.* under ABOYA. 3. *Anat.* A muscle that constricts an organ or opening, as, constrictors of the pharynx, thin flat muscles which control its dilatation and contraction; a sphincter.

con-string'e, 1 kon-strin'g; 2 cōn-strin'g, n. [con-strin-gens; con-strin-gens.] To cause contraction in. [*< L. constringo*; see CONSTRUCT.]

con-strin-gent, 1 kon-strin-jent; 2 cōn-strin-jent, n. Tending to constrict; causing constriction; also, astringent.—con-strin-gent, n. con-strin-gent, n. con-strin-gent, 1 kon-strin-gent; 2 cōn-strin-gent, n. Capable of being constricted.—con-strin-gent, n. con-strin-gent, n. con-strin-gent, 1 kon-strin-gent; 2 cōn-strin-gent, n. 1. To adjust and join the materials or parts of so as to form a permanent whole; build; as, to construct a ship. 2. To form mentally by putting ideas together; fabricate; fashion; devise; as, to construct a theory. 3. *Math.* To exhibit (an algebraic value) geometrically. 4. To construe, as a sentence. [*< L. constructus*, pp. of *construo*, < con- (< cum), together, + *struo*, pile up.]

SYN: build, compose, erect, fabricate, form, frame, put together, put up, set up. See MAKE.—Ant: break, demolish, destroy, overthrow.—con-struc-tor, n. A constructor. con-struc-tor, 1 kon-strukt; 2 cōn-strukt, a. Relating to or expressing construction.—construct state, in Hebrew grammar, same as ANNEXION.

con-struc-tor, n. 1. Any constructed object; specif. (*Psychol.*), any form of mental representation regarded as a result of external stimulation. 2. *Gram.* A phrasal group of words used in regular grammatical construction. The distinction between co-ordinate and constructs is a delicate one, so much so that two persons of like birth and education may be found to differ upon it. EARLE *Philol. Eng. Tongue* p. 573. [cl. p. 1873.] —con-struc-tor, n. 1. Any constructed object; specif. (*Psychol.*), any form of mental representation regarded as a result of external stimulation. 2. *Gram.* A phrasal group of words used in regular grammatical construction. The distinction between co-ordinate and constructs is a delicate one, so much so that two persons of like birth and education may be found to differ upon it.

3. *Math.* A surface or outline.

—con-struc-tor, n. 1. Any constructed object; specif. (*Psychol.*), any form of mental representation regarded as a result of external stimulation. 2. *Gram.* A phrasal group of words used in regular grammatical construction. The distinction between co-ordinate and constructs is a delicate one, so much so that two persons of like birth and education may be found to differ upon it.

con-struc-tion, 1 kon-struk'shān; 2 cōn-struc'shōn, n. 1. The act of constructing; also, that which is constructed; a structure; as, its construction took a long time; those old cromlech constructions. 2. The peculiarities, collectively, in which one structure may differ from another; style of building or composing; as, a building of steel or iron construction.

Steel or iron-construction. The process of building bridges, cars, ships, houses, and towers with the aid of a skeleton framework of beams, plates, and columns of prepared steel or iron, has been brought to great perfection within recent years. The first cast-iron bridge was built in 1779 at Colchookdale, England; improved methods of steel-making have led to a more widespread use of steel for building purposes. The steel used for these structural purposes is chiefly in the form of plates or shapes, the more important being the I bar, the angle, the channel and the Z bar; joining is done by rivets and screws, and as a rule the construction is welded or cellular. The demand for fire-proof construction brought about the use of steel framework for flooring, and in time steel columns were introduced to carry the floorloads and walls; hence, owing to the tensile strength of steel, arose the possibility of the very tall buildings known as "skyscrapers," where each tier consists of a rectangular group of steel-beam flooring and wall-columns, braced against wind pressure. See SKELTON BUILDING CONSTRUCTION. In structural steel this tensile strength varies from 52,000 to 70,000 pounds to the square inch, but in building work not more than 20,000 pounds to the square inch is calculated on. Steel enters into every field of construction, as caissons, sheet-piling, mine-strutting, etc., and but for the corrosive action of the elements such constructions would be impracticable.

3. The act of construing, or the interpretation thereby arrived at; as, the construction put upon his behavior. Love's "thinks not evil," imputes no motive, sees the bright side, puts the best construction on every action.

DANIELSON *Great Truths* ch. 3, p. 37. [f. 1890.]

4. Law. The interpretation of an instrument or statute so as to ascertain its true meaning and legal effect. 5. *Gram.* (1) The putting together of words so as to form sentences, or the arrangement and union of words so produced; syntactical arrangement.

We find in every page words used in wrong senses, and constructions which violate the plainest rules of grammar. We have the low language of "mutual friend" for "common friend."

MACAULAY *Boswell's Johnson* p. 139. [f. s. & c. 1854.]

(2) The determination of the syntactical relations (of a word or sentence).

Errors in grammatical construction (embracing connection and arrangement) are solecisms. A solecism may be: (1) A violation of grammatical concord; as, "Whom (properly, who) do they suppose will be appointed?" "Each of the four living writers had their (properly his) writings recited." (2) A violation of grammatical arrangement; as, "A good man not only deserves the respect but the love of his fellow beings" (rather, "A good man deserves not only the respect of his fellow beings, but also their love"). "He could see that the room had been swept with half an eye." (3) A violation of grammatical propriety; as, "This is a very different case than (should be, from) that of the 'Vices in community' (properly, in the community)." "The governor attended with (correctly by) his staff." "She wrote better than any (properly any other) pupil in her class." In the following statement the error is double: "This paper has the ablest staff of any of its contemporaries." Not only do we have *ablest* of any, but "this paper" is included among its own contemporaries; the statement should have been "an able staff than, etc." (4) A violation of grammatical precision; as, "The rich and the poor (not the rich and poor) are alike mortals." "The government has factors with supreme (not the most supreme) contempt." "Had he laid low (correctly had he lain low) he would not have been wounded." "When he was (properly had) retired to his tent, they sat silent a long time." For errors of rhetorical construction, see RHETORICAL.

6. *Psychol.* The power of forming new combinations or systems of knowledge or thought out of elements already in the mind; mental constructiveness; also, the exercise and the products of this power. See PHRASES below. See CONSTRUCTIVE FACULTY.

The Abstractions, Inductions, Deductions, and Experimental processes of science, afford the basis of constructiveness.

BAIN *Senses and Intellect* bk. ii, p. 591. [L. 1874.]

7. *Math.* The preparation with instruments of a geometric design embodying certain fixed conditions and

relations; also, the design so made. [F. < L. construction(n-), < constructus; see CONSTRUCT.]

—artistic construction, or esthetic art, that constructive power or process by which forms, facts, or ideas regarded as beautiful are grouped and organized according to esthetic principles. —construction-train, n. A train for carrying construction-materials for a railway. —c-survey, n. A temporary road or way over which to haul materials for a permanent road. —Henri Chiquet, c., reinforced concrete construction first perfected by the French builder François Hennebique. —Huygens's c., a geometrical figure reproducing the structure of the front of a light-wave. —Mascheroni constructions, constructions in geometry in which no other instrument than the compass is employed. —mill c. (Arch.), a system of building with brick walls and floors of thick planking carried by heavy wooden girders resting on posts of wood or iron; used especially for factories. —practical c., that constructive power or process by which ideas, elements, or forces, regarded as good or as means to ends, are grouped and organized in systems according to the law of practical utility. —scientific c., that constructive power or process by which knowledge regarded as truth or fact are grouped and organized in systems according to the law of the true or in agreement with reality. —skeleton building-c., a method of construction in which the main support is an internal framework of iron or steel, erected more or less completely before the outer walls are put up, the weight of which is carried, story by story, by external members and projections of the frame—steel construction. See PLANT.

con-struc-tion-al, 1 ken-struk-'shon-al; 2 cōn-strūc-'shon-al, o. 1. Pertaining to construction; building. 2. Geol. (1) Having courses and grades determined by the original structure of the land through which it is flowing: said of a watercourse, or of natural drainage. Compare CONSEQUENT, a. 3. (2).

The various streams that are led by the form of the new land to unite on the way to the sea form a single constructional river system. W. M. DAVIS Johnson's *Universal Cyclopedia* vol. vii, p. 119. [1895.]

(2) Formed by or resultant from consequent drainage; as, a constructional divide or valley. 3. Deduced by construing the language of a law or document. —con-struc-tion-al-ly, adv.

con-struc-tion-ist, 1 ken-struk-'shan-ist; 2 cōn-strūc-'shon-ist, n. One who construes laws or documents, etc., and who advocates some mode of construction. —strict constructionist, specifically, one who construes the Constitution of the United States so as to limit the powers of the federal government to those expressly granted by the Constitution.

con-struc-tive, 1 ken-struk-'tiv; 2 cōn-strūc-'tiv, a. 1. con-struc-'tiv, Involving the act or possessing the power of constructing; as, constructive art or work. 2. Law. Assumed or inferred as being included within the intent or application of a law or a legal document.

The problem before them was to convert the ecclesiastical charge of constructive iniquity into a civil charge of constructive treason. FARBAR *Life of Christ* vol. ii, p. 354. [c. p. 1874.]

3. Tending toward or resulting in positive conclusions; affirmative; as, constructive reasoning. —constructive faculty, or c. imagination, the mental activity by which the elements or single objects of perception and self-consciousness are grouped into systems, scientific, artistic, and practical. In such activity both intellect and imagination take part. See phrases under CONSTRUCTION. —c. malice, c. crime, malicious criminal intent, or commission of crime, imputed by law when an act is unlawful and necessarily injurious or criminal, although proof be lacking. —c. mileage, a mileage allowance for railroad travel supposedly accomplished. —c. notice, knowledge of some particular thing imputed to one, whether he knew it or not, because it was his duty to know it, as the knowledge of a legally published order of court. —c. theft, larceny when the taking, tho not apparently felonious, is subsequently shown to have been so, as by obtaining the delivery of goods and then feloniously appropriating them. —c. ly, adv.

con-struc-tive-ness, n. The faculty of and tendency to constructive; productive ingenuity; especially mechanical ability; mentioned especially in phrenology. See CONSTRUCTION, n., 6.

Constructiveness is as genuine and irresistible an instinct in man as in the bee or the beaver.

W. JAMES *Psychology* vol. ii, p. 420. [N. Y. & c. 1890.]

con-struc-tor, 1 ken-struk-'tor or -ter; 2 cōn-strūc-'tor, n. 1. One who constructs; a builder; specif. (U. S. navy), an officer having in charge the construction and repairs of vessels. 2. One who construes. SYN: see ARCHITECT. —con-struc-tor-ship, n.

con-struc-ture, 1 ken-struk-'chur or -tiur; 2 cōn-strūc-'chur or -tiur, n. 1. *See* CONSTRUCT. The right to materials of another which have been used in one's house, on compensation of the former owner. 2. Construction, or a construction.

con-struc-ture, 1 ken-strū or kon-strū; 2 cōn-strū or cōn-strū (XIII), v. [STRUEN, -stru(X)no.] I. t. 1. Gram. (1) To determine or state the syntax of words in; specifically, to translate (sentences) from a writer in a foreign language by giving each word separately, followed by its English equivalent, in the English order; as, to construe a Latin sentence. (2) To determine or state the syntax of; parse; as, to construe a verb. —construe more commonly relates to sentences; parse to single words. 2. To determine the meaning of; interpret; explain; as, to construe a foreign language (into English); to construe one's conduct; to construe a clause or a law.

II. i. Gram. To determine syntax; translate.

con'sue-tu'di-na-ry, n. [-RIES, 1 -riz; 2 -rig, pl.] A manual for monastic devotions.

con'sul, 1 ken-sul; 2 cōn-sul, v. Com. To submit, as an invoice, for consular inspection and stamp of approval.

con'sul, n. 1. An officer appointed to reside in a foreign port or city, chiefly as the representative of his country's commercial interests. The consul is the prototype of the ancient Greek *proktores*, by which name the consular representative of Greece is still known. The duties of a consul include the protection of the person and property of his fellow countrymen within his consular jurisdiction, as well as acting as their legal adviser, if so required. In some Oriental and African countries the consul is also invested, in both civil and criminal cases, with judicial powers which are exercised jointly with representatives either of his own country or of that to which he is accredited. The consuls of both Great Britain and the United States, as a rule, are prohibited from engaging in any business. Before a foreign consul can take up office in the United States he must receive his exequatur from the President.

For more than a hundred years the Government of the United States failed to appreciate fully the Consul as a factor in the great work of protecting and enlarging the commerce of the country. W. H. HUNT in *Proc. A. A. S.* vol. xxxi, p. 511. (1801.)

2. Rom. Hist. One of the two highest republican magistrates at Rome, elected by the *comitia centuriata* (after the expulsion of the kings) for the term of one year.

Until 366 B. C. patricians only were eligible; after that plebeians also were elected. The power of the consuls was for many years nearly that of the kings whom they supplanted; but under the empire it faded to a mere presidency of the senate, of public games, etc., and it died out in the 6th century A. D. The year was often indicated by naming the consuls (abbreviated *con.*) of that year; but the consular year usually coincided only partly with the calendar year.

3. The chief magistrate of a medieval city with municipal government, having varying functions. 4. F. Hist. The title given to Napoleon Bonaparte, Cambacérès, and Lebrun from December, 1799, to May, 1804, as supreme magistrates of the French republic, Bonaparte being known as the First Consul; the others, the Second and Third respectively. Lebrun and Cambacérès had consultative voices only. The First Consul became emperor in 1804. 5. The representative of a cyclists' touring club in a certain locality. 6. A counselor. [L., < consulo, consider.] con'sul-ger-en'al, n. [CONSULS-GENERAL, pl.] A consul having supervision of the other consulates in the country of his residence. —con'sul-ger-en'al-ty, n. See *BASS*. — *c*. fever, a fever that runs its course without intermission. — *c*. fraction (*Math*), a fraction whose numerator is a whole number and whose denominator is a whole number plus a fraction whose numerator is a whole number and whose denominator is a whole number plus a fraction, etc. — *c*. proportion (*Math*), a series of three or more quantities in which the ratio is the same between each two adjacent terms; as, 2, 4, 8, 16, where 2:4 is as 4:8 is as 8:16. — *ly*, *adv.* — *ness*, n.

*con-tin-u-er*, 1 *con-tin-yu-er*; 2 *cñn-tin-yu-er*, n. One who perseveres or continues; especially, one who takes up and carries on what has been left unfinished; a continuator.

*con-tin-u-ist*, 1 *con-tin-yu-ist*; 2 *cñn-tin-yu-ist*, n. One who adheres to or maintains a theory of continuity or continuance. — *con-tin-u-ist-ic*, a.

*con-tin-u-ity*, 1 *con-tin-yu-ity*; 2 *cñn-tin-yu-ity*, n. [-TES, 1-tiz; 2-tiz, pl.] 1. The state or quality of being continuous, extended, or prolonged; uninterrupted connection in space, time, operation, or development.

The life of a nation is a continuous series of generations. G. B. CHAPMAN *God's Hand in America* p. 51. [W. & P. 1841.]

2. *Math*. The property of having all parts or elements absolutely contiguous, so that in passing from one to another all intervening parts and no others are traversed. Space and time have absolute continuity; the series of rational numbers has not continuity, because in passing from one to another irrational values must be traversed. 3. *Phren*. The faculty by which thought and feeling are held to a continuous line of action, so as to finish what is begun. 4. A part, as of a whole, between the ends. [*F. continué*, < *L. continuatus* (s), < *continuo*; see *CONTINUOUS*.] — *doctrine* of continuity, the doctrine, particularly as advocated by Leibnitz, that all real variations are continuous, or made by small increments of change, and that nature makes no leaps or sudden and great alterations in her products and processes. — *germinal c.* (*Biol*), the unbroken transmission from parent to offspring of some part of its physical substance by means of germ-cells, for generation after generation, the method of which is variously explained. — *principle* or *law* of c. 1. An ambiguous expression meaning either (1) the assumed principle that nature breaks none of her own laws, does nothing suddenly, or that her changes are preceded by a preparation, or (2) the law of conservation.

Assuming the existence of a Supreme Being, the principle of continuity may be said to be the definite expression in our words of trust that He will not put us to permanent intellectual confusion.

STEWART AND TAIT *Unseen Universe* ch. 2, p. 83. [MACM. 1876.] 2. *Math*. (1) The law that in passing from one state to another all the intervening states must be traversed. (2) The assumption that certain states are continuous with the rest, among which there are to be classed and considered, and that common relations which hold for an indeterminate state hold for all specific states that may be derived

therefrom by repeated variation, notwithstanding that in extreme cases the statement presents apparent absurdity. Called also *geometric continuity*. — *protoplasmic c.* (*Biol*), the connection of adjacent cells by means of protoplasmic strands. — *solution* of c. (*Surg*), separation or division of tissue or of continuous surfaces or parts, as the skin, bone, etc., by rupture, fracture, laceration, or the like. — *synthesis* of c. (*Surg*), the direct union of the ends of a fractured bone or of the edges of a wound.

*con-tin-u-o*, 1 *con-tin-yu-o*; 2 *cñn-tin-yu-o*, n. [It.] *Mus*. Continued or figured bass. See *BASS*.

*con-tin-u-ous*, 1 *con-tin-yu-us*; 2 *cñn-tin-yu-us*, a. 1. Connected, extended, or prolonged without separation or interruption of sequence; unbroken; uninterrupted; unintermittent.

Space and time are *continuous*. MCCOSH *Intuitions* p. 178. [c. & 2nos. 1869.]

2. *Bot*. Without joints or articulations. 3. *Math*. Having continuity. 4. Having but one direction, as distinguished from alternating: said of an electric current. [*L. continuus*, < *continere*; see *CONTAIN*.] *SYN*: see *CONTINGUAL*; *GRADUAL*; *PERPETUAL*. — *continuous action* (*Mech*), action without reversal. The action of a continuous current is *continuous*, that of an ordinary hand-saw is *alternating*. — *c*. consonant, a consonant of continuous sound, as *v*, *r*. — *c*. function, a function which in passing from one value to another goes through an unbroken series of intermediate values. — *c*. service certificate (*U. S. Navy*), a certificate granting extra pay and privileges to a continuous-service man who reenlists. — *c*. service man (*U. S. Navy*), one who within four months from the time of discharge reenlists the service. — *ly*, *adv.* — *ness*, n.

*con-tin-u-um*, 1 *con-tin-yu-um*; 2 *cñn-tin-yu-um*, n. [-U-A, pl.] 1. A total that is continuous and uninterrupted; that which has perfect continuity; as, the *continuum* of space. A universal continuum appears in space where progression is uninterrupted in all directions. Time is a one-dimensional continuum capable of geometrical representation by a line. Sense qualities, such as those of color, tone, and taste, are capable of arrangement in systems or qualitative continua. The whole of individual conscious life has been described as a continuum. UNITED EDITS *Encyc. vol. ix*, article *Continuum*.

2. That of which the only variation predicable is temporal or spatial. 3. A basic common character underlying a series or aggregation of indefinite variations. 4. *Math*. The entire system of positive and negative integral, fractional, and irrational numbers. [L., neut. sing. of *continuu*; see *CONTINUOUS*.]

*con-tin-u-ine*, 1 *con-tin-yu-ine*; 2 *cñn-tin-yu-ine*, n. *Nout*. 1. The space between casks stowed alongside of each other so that their hilges touch. 2. The space between adjacent strands on the outside of a rope. [*L. canis*, n., + *LINE*, cord.]

*con-to*, 1 *con-tō*; 2 *cñn-tō*, n. [Port.] A Portuguese money of account, 1,000,000 reis; in full, a *conto* of reis.

*con-tor-ni-ate*, 1 *con-tor-ni-ate*; 2 *cñn-tor-ni-ate*, *Rom*. Antiq. I. n. A bronze medal bordered on obverse and reverse by a circular wreath.

II. n. A medal or token, having on one side a head and on the other, sometimes, emblems of the public games; probably struck during the imperial period, to be given to successful competitors. II. a. Bordered with a circular wreath. [*It. contornato*, pp. of *contornare*, make a circuit, with a lion's skin; reverse, *contorno*, contour.]

*con-tor-ni-ate*, 1 *con-tor-ni-ate*; 2 *cñn-tor-ni-ate*, *Rom*. Antiq. I. n. A bronze medal bordered on obverse and reverse by a circular wreath.

II. a. Bordered with a circular wreath. [*It. contornato*, pp. of *contornare*, make a circuit, with a lion's skin; reverse, *contorno*, contour.]

*con-tor-sile*, 1 *con-tor-sile*; 2 *cñn-tor-sile*, a. Characterized by contortions; *ly*, *adv.* having the quality of contortion; of contorting tendency.

*con-tor-ti*, 1 *con-tor-ti*; 2 *cñn-tor-ti*, *vt*. To twist violently; especially, to twist into a misshapen form; wrench out of shape or place; as, to *contort* a limb. [*L. contortus*, pp. of *contorqueo*, < *con* (< *com*), with, + *torqueo*, twist.]

*con-tor-ti-ate*, 1 *con-tor-ti-ate*; 2 *cñn-tor-ti-ate*, n. *pl*. *Bot*. Same as *GENTIANALES*.

*con-tor-ti-ed*, 1 *con-tor-ti-ed*; 2 *cñn-tor-ti-ed*, *pa*. 1. Twisted out of shape; distorted. 2. *Bot*. Rolled or wound together; twisted; in estivation; convolute. — *ly*, *adv.*

*con-tor-tion*, 1 *con-tor-shan*; 2 *cñn-tor-shon*, n. 1. The act of contorting, or the state of being contorted; unnatural or spasmodic writhing or wryness; distortion. 2. *Bot*. An irregular twisting of the stem or branches of plants: from interruption of growth. [*L. contortio* (n), < *contortus*; see *CONTOUR*.] — *con-tor-tion-ist*, *con-tor-tion-ist*, n. 1. An acrobat who is trained to distort his limbs and assume unnatural postures. — *con-tor-tion-ist-ic*, a.

2. One who contorts; *specif.*, one who twists the meanings of words. — *con-tor-tious*, a. [*It. contorsione*, n., < *contor* (v), < *contorere*, to contort or to twist.]

*con-tor-tiv-ty*, n. [Rare] The state of being intricately twisted together.

*con-tor-tiv-pu-ate*, 1 *con-tor-tiv-pu-ate*; 2 *cñn-tor-tiv-pu-ate*, a. 1. *Ethnol*. Crinkled, as the hair of negroid peoples. 2. *Bot*. Turned back on itself; twisted and plaited or folded. [*L. contortuplicatus*, < *contortus* (see *CONTOUR*) + *plicatus*, pp. of *plico*, fold.]

*con-tour*, 1 *con-tūr*; 2 *cñn-tūr*, *vt*. To make or draw in outline or contour; make contour-lines on or determine the contour-lines of. — *con-tour-ing*, n.

*con-tour*, 1 *con-tūr* or *con-tūr*; 2 *cñn-tūr* or *cñn-tūr*, n. The line bounding a figure or body; in fortification, the outline of a horizontal section of a system of works. [*F. contourner*, < *LL. contornio*, < *L. com* (< *cum*) intens., and see *TURN*, r.] — *encompass contour* (*Math*), any contour made up of many curves. — *con-tour-feath-ers*, n. *pl*. *Ornith*. The outer feathers that determine the contour of a bird; *genom*. — *c*. line, n. The line, or series of lines, connecting the boundary of a plane in surveying; the intersection of a horizontal plane with the surface of a country at any height, as at the sea-level. On topographical maps contour-lines are drawn for equal differences of elevation, and hence indicate steepness or the reverse, according as they are crowded together or spread apart. — *simple c.* (*Math*), a closed curve forming a contour and not intersecting with any other curve.

*con-tour-ed*, *pp*. Contoured.

*con-tour-er*, 1 *con-tūr-er*; 2 *cñn-tūr-er*, a. [*F. It*] *Her*. Turned toward the sinister side: said of an animal as a charge. See *ILLUS* in next column.

*con-tr*, *abbr*. Contract; contracted; contraction; contrary.

*contra*, *prefz*. Against; opposite; contrary; as, *contradiction*; *contraposition*. In music it signifies an octave lower than some other instrument; as, *contrabass*. [*L. contra*, < *contra*, against, < *cum*; see *CON*.] — *con-tra-a-r* *ly* *met* *cal*, o. *Math*. Having, as a series, each term after the second equal to the sum of the two terms preceding.

*con-tra-band*, *vt*. To import illegally; prohibit officially.

*con-tra-band*, 1 *con-tra-band*; 2 *cñn-tra-band*, a. 1. *Inter. Law*. Falling under a public edict, treaty, or ban of prohibition or exclusion; forbidden.

Nothing can justly be regarded as *contraband* unless so regarded by the laws of nations or by express convention between certain parties.

*Voices Inter. Law* p. 324. [s. 1891.]

2. Contrary to or outside of the law; as, a *contraband* distillery; < *L. contrabando*, < *L. contra* (see *CONTRA*) + *L. bandum*, bonum, see *BAND*, n. 1 — *contraband* goods, goods smuggled into a country.

*con-tra-band*, n. 1. Goods that a neutral is prohibited by the laws of war to furnish to either belligerent, as arms, ammunition, and military or naval supplies, which are classed as absolute *contraband* in contradistinction to *occasional c.*, which consists of articles not necessarily intended for use in war, as grain, horses, etc., more fully said to be *contraband of war*. 2. Trade forbidden by law or treaty. 3. *U. S. Hist*. Any fugitive slave who escaped from his master in the civil war and took refuge within the Union lines.

Gen. B. F. Butler in 1861 declared such fugitive, if a chattel by local law, to be "contraband of war" according to the laws of nations, and that therefore he should be protected from reclamation by his former master.

— *con-tra-band-ism*, n. The act or work of trafficking in *contraband*; smuggling. *con-tra-band-age*; *con-tra-band-ary*; 1 *con-tra-band-ist*, n.

*con-tra-bass*, 1 *con-tra-bass*; 2 *cñn-tra-bass*, *Mus*. I. a. An octave lower in pitch or range than another instrument of the same class; of deep range; as, a *contrabass* horn.

II. n. A contrabass viol. [*It. contrabasso*, < *contra* (< *L. contra*, see *CONTRA*) + *basso* (< *LL. bassus*) low.] — *con-tra-bass-ist*, n. One who performs on the contrabass. — *con-tra-bass-ist*, n. A contrabass.

*con-tra-bour-don*, 1 *con-tra-bur-don*; 2 *cñn-tra-bur-don*, n. *Mus*. An organ-stop which produces tones an octave lower than the bourdon proper. [*It. CONTRA + BOURDON*.]

*con-tra-cep-tion*, 1 *con-tra-cep-shan*; 2 *cñn-tra-cep-shon*, n. The prevention of conception or fecundation. — *con-tra-cep-tive*, *l*, *adj*. Preventing conception; as, a *contraceptive* agent. II. n. An agent or device to prevent conception.

*con-tra-clock-wise*, 1 *con-tra-ckle-wis*; 2 *cñn-tra-ckle-wis*, o. Same as *COUNTER-CLOCKWISE*.

*Con-tra-Cos* *ta*, 1 *con-tra-kes*; 2 *cñn-tra-cos* *ta*. A country in W. Colombia; 728 sq. m.; county-seat, Martinez.

*con-tra-coup*, 1 *con-tra-cup*; 2 *cñn-tra-cup*, n. 1. Counter-coup. 2. Counter-stroke. [*L. CONTRA + COUP*, n.]

*con-trac-t*, 1 *con-trakt*; 2 *cñn-tract*, *v*. I. t. 1. To draw together the parts of; shorten; or render less extensive by drawing in; abridge in compass or duration; hence, to wrinkle; condense; opposed to *expand*; as, cold *contracts* metals. 2. *Gram*. To shorten, as a word, by omitting a vowel or compounding two, or by omission of a letter or a syllable. 3. To take to oneself; become affected with; acquire; as, to *contract* a debt; to *contract* a disease. 4. To settle or establish by contract or covenant; as, to *contract* an alliance or a marriage. 5. To betroth.

Your niece, is she? . . . My son, sir. They are *contracted* to each other. GOLDSMITH *She Stoops to Conquer* act II.

II. i. 1. To be drawn close together; he brought within narrower compass; shrink. 2. To make a contract; bargain to do or furnish something. 3. To give a promise of marriage. [*L. contractus*, pp. of *contrahere*, < *con* (< *com*), with, + *trahere*, draw.] *SYN*: see *ARRANGE*. — *con-trac-tant*, n. *Law*. A contracting party.

*con-trac-tion*, n. The act of contracting or trading. — *con-trac-tive*, n. — *con-trac-t-ibil-ity*, n. — *con-trac-t-ibil-ty* or *-a-ble* (e), a. — *con-trac-t-ibil-ty* or *-a-ble* (e), a. Contracted; as, *contract* verbs.

*con-trac-t*, 1 *con-trakt*; 2 *cñn-tract*, n. 1. A formal agreement between two or more parties; also, a writing setting forth and evidencing the agreement, and signed by the parties.

Before the invention of writing contracts, testaments, sales, marriages, and the like were transacted in public.

TYLDESLEY *Elements Gen. Hist* p. 12. [n. a. c. 1850.]

2. *Law*. An agreement recognized by law as constituting an obligation to do or not to do a particular thing; also, the department of law dealing with such agreements.

The obligation of *contract* is an obligation created and determined by the will of the parties. Herein is the characteristic difference of *contract* from all other branches of law. The business of the law, therefore, is to give effect so far as possible to the intention of the parties, and all the rules of interpreting *contracts* go back to this fundamental principle and are controlled by it. *Encyc. Brit.* 11th ed., vol. vii, p. 35.

3. A piece of work to be done according to such agreement; the execution of or right to execute such work; as, the *contract* was awarded to me. 4. A betrothal.

5. Marriage. 6. *Gram*. A contracted form. 7†. Mutual attraction; drawing together. [*L. contractus*, < *contrahere*, *pp*. of *contrahere*, see *CONTRA*, covenant, engagement, promise, stipulation. All these words involve at least two parties, though an *engagement* or *promise* may be the act of but one. Mutual *promises* may have the force of a *contract*. A consideration, or compensation, is essential to convert an *agreement* into a *contract*. A *contract* may be oral or written. A *covenant* in law is a written *contract* under seal. *Covenant* is frequent in religious usage, as *contract* is in business and civil life. A *contract* is essentially the same as *contract*, but is applied to international agreements, treaties, etc. A *bargain* is a mutual agreement for an exchange of values, without the formality of a *contract*. A *stipulation* is a single item in an *agreement* or *contract*. A *cardel* is a military agreement for the exchange of prisoners or the like.

— *accessory contract* (*Eng. Law*), a contract entered into for the purpose of obtaining by surety, mortgage, etc., the fulfillment of the provisions of a prior contract. — *avio c.* [*Mex*], a contract between the owner of a mine and an *aviso* who supplies money for working a mine. Compare *AVISO*. — *certain c.* (*Law*), a contract in which the thing to be done depends by reasonable supposition upon the will of the party, or when, in the regular course of events, it must happen in the manner that was agreed upon. — *c*. note, see

A Lion passant guardant with head contourné.

It is said that absence conquers all things, love included; but it has a contrary effect on a garden.

C. D. WABSTER *Summer in a Garden* p. 123. [H. M. & Co. 1887.]

2. Characterized or swayed by contrariness; inclined to opposition or contradiction; capricious; perverse.

These hearts of ours are curious and contrary things.

LOUISA M. ALCOCK *Little Women* p. 505. [L. BROS. 1880.]

3. Logic. Having opposite or mutually restrictive qualities; conflictingly opposed; distinguished from contradiction. 4. Bot. Opposite in direction to the part compared with; as, the silicle of the shepherd's purse is compressed contrary to the disperm. [*< F. contraire, < L. contrarius, see CONTRA- >*]

Syn. antagonistic, conflicting, contradictory, contrasted, different, discordant, dissimilar, incompatible, incongruous, inconsistent, opposed, opposite, unlike. Things may be different which present no striking points of contrast. Things are contradictory which mutually exclude each other, so that both can not exist in the same object at the same time, as life and death. Things are contrary when the highest degree of both can not exist in the same object at the same time, but where a middle term is possible, partaking of the qualities of both. Thus, wisdom and folly are contrary, for the perfection of either excludes any trace of the other; yet most human acts and statements partake of both. Demonstration and absurdity are contradictory, for that which contains any absurdity can not be demonstrated, and that which is demonstrated can contain no absurdity. Things are inconsistent between which there is some inherent disagreement, as a Christian profession and a worldly life. Opposite refers to position, tendency, etc.; opposed, chiefly to feeling and intent; the two sides of a street are opposite; those who inhabit them may chance to be opposed. Things are incompatible which can not exist in harmonious relations, and whose action when associated tends to the extinction of one by the other; as, slavery and freedom are incompatible. See ALLEN, a.; DIFFERENT; INCONGRUOUS; INHARMONIOUS; PERVERSE.—Ant. see SYNONYMS for ACCORDANT.—Freq. to.

con'tra-ry-mind-ed, a. Having the contrary opinion.—a. motion (Mus.). the opposition in melodic motion of parts when one pursues an ascending and the other a descending course at the same time.—c. terms (Logic), terms expressive of the opposite limits of divergence in the same class; as "cruel" and "kind," "zenith" and "nadir."

con'tra-ry-ly, adv.—con'tra-ri-ness, n.

con'tra-ry, n. [RHS, 1-riz; 2-ris, pl.] 1. One of two contrary things, as terms, qualities, or propositions, each considered in relation to the other.

A soldier may be at once prudent and bold, for there are opposites; he could not be at once prudent and rash, for these are contraries.

TANTRIC Words lect. vi. p. 197. [W. J. W. 1861.]

2. Something, as a circumstance, condition, or statement, contradicting or incompatible with another put forward in comparison; the opposite; as, these things have been alleged, but I will show the contrary. 3. [Rare.] A denial. 4. An opponent.—by contraries, by way of opposition to anticipated procedure.—on the contrary, contrariwise.—to the c., to the contrary effect.

con'tra-ry, adv. 1. In a contrary manner or direction; as, to run contrary. 2. Her. Oppositely.

con'tra-se-lee'tion, 1 ken'tra-se-lee'shan; 2 cōn'tra-se-lee'shon, n. Biol. The choice of parents with the smallest hereditary percentage; opposed to normal selection.

con'trast, 1 ken'trast; 2 cōn'trast, n. 1. To place in opposition, or represent in comparison, in order to show unlikeness; present extreme points of difference between; exhibit as marked by dissimilarity.

It was his great school to contrast the pleasures of home with the hardships of school.

MARIA EDGEMORTH *Moral Tales, Good Aunt* p. 54. [L. 1887.]

II. i. To stand in such position or mental association that wide differences present themselves more clearly by comparison; strike the mind with its divergence from something dissimilar or opposite; followed by with. [*< F. contraster, < LL. contrasto, < L. contra (see CONTRA) + sto, stand.*] Syn. compare, differentiate, discriminate, oppose. We contrast objects that have been already compared. We must compare them, at least momentarily, even to know that they are different. We contrast them when we observe their unlikeness in a general way; we differentiate them when we note the difference exactly and point by point. We distinguish objects when we note a difference that may fall short of contrast; we discriminate them when we classify or place them according to their differences.—Freq. contrast one object with another.—con'trast-ing-ly, adv.—con'trast-ment, n.

con'trast, 1 ken'trast; 2 cōn'trast, n. 1. The opposition between things similar in some respects which are yet strikingly different; also, the things thus opposed; as, there is a wonderful contrast between man and the brute; they are a contrast. 2. Rhet. (1) A figure of speech based on the differences of objects. Compare ANTI-THESIS.

Contrast has always this effect, to make each of the contrasted objects appear in the stronger light.

BLAIR *Rhetoric* lect. xvii. p. 167. [E. D. 1817.]

(2) The explanation of an object or theme through another and similar one by presenting the points of difference. 3. Art. The use of opposite effects in the same piece for the sake of heightening both, as bright light and deep shade, brilliant and somber colors, etc., or the presence of such effects. [*< F. contraste, < contraster, see CONTRAST, < con'trast-col'or, n. Psychol.* A color assumed by an object because of its contrasting environment. The color of the foreground is called "leading color"; and the contrast depends upon its saturation, nearness, and qualitative relations to the induced color, etc.—e. disk, n. Psychol. A party-colored disk so arranged as to exhibit the phenomena of brightness and color-contrast when placed upon the color-mixer.—c. feeling, n. Psychol. A feeling composed of diametrically opposite partial feelings which combine to constitute its characteristics, as in the sensation of tickling.—c. plane, n. The plane in which comparisons must be made in photometers.—c. stain, n. Same as CONTRAST.—c. marginal, c., the contrast shown by the adjacent ends of a pair of contrasting surfaces.

[*< L. conversatio(-n-), < conversatus, ppr. of conversor; see CONVERSE, v.*]

*Syn.*: chat, colloquy, communication, communion, confabulation, conference, converse, dialog, discourse, intercourse, talk. *Conversation* (Latin *con*, with) is, etymologically, an interchange of ideas with some other person or persons. *Talk* may be wholly one-sided. Many brilliant talkers have been incapable of conversation. There may be intercourse without conversation, as by looks, signs, etc. *Communication* is of hearts, with or without words; *communication* is often by writing, and may be uninvited and unreciprocated. *Talk* may denote the mere utterance of words with little thought; thus, we say idle talk, empty talk, rather than idle or empty conversation. *Discourse* is now applied chiefly to public addresses. A conference is more formal than a conversation. *Dialog* denotes ordinarily an artificial or imaginary conversation, generally of two persons, but sometimes of more. A colloquy is indefinite as to number and generally somewhat informal. Compare synonyms for *conversation*. — *Prep.*: conversative, *with* friends, *between* or *among* guests; about a matter. — *criminal conversation*, unlawful sexual intercourse; frequently abbreviated *crim. con.* — *con-ver'sa-tion-al*, a. *con'vert'it'*, 1 ken-vürt'it'; 1 cōn'vert'it', n. Having a *con'vert'it'* converting quality; tending to conversion.

*con'vert'it'*, 1 ken-vürt'it'; 2 cōn'vert'it', n. *Scot. Hist.* A due (originating as a burden on land) collected by a chief or a clan from his vassals, as entertainment for self and retinue at least one night four times a year; later, a contribution of food. [*L.* *convictio*, < *convincere*, to convince.]

*con'vex*, 1 ken'veks; 2 cōn'veks, a. 1. Curving like the segment of a globe, or of the surface of a circle, so as to form a rounded elevation; bulging out; rounded off. 2. *Math.* Arched or protruding; such of a curve on which the tangent line lies, or on which the normals diverge at neighboring points; in contradistinction to *concave*. [*F.* *convex*, < *L.* *convexus*, < *convexus*; see *CONVEX*.] — *convex polyhedron* (*Geom.*), a polyhedron without reentrant polyhedral angles. — *convexed*, n. Made convex. — *convex-ed-ly*, adv. In a convex form. *con'vex-ly*, < *con'vex-ty*, n. [*L.* *convexitas*, p. l. 1. The state of being convex; sphericality. 2. The protuberant surface of anything convex. *con'vex-ed-ness*; *con'vex-ness*.

*con'vex*, n. 1. A convex surface or body; protuberance; convexity. 2. A lens which is convex. 3. [*Slang.*] *Card-playing*. A card made somewhat convex on opposite edges, to facilitate cheating.

*con'vex'o'*, 1 ken-vēks'o'; 2 cōn-vēks'o'. From *convex*, a combining form, — *convexed*, *convexed*, a. *Con'vex* on one side and concave on the other, the curvature of the convex side being the greater; distinguished from *concavo-con'vex*, < *con-ve'o-con'vex*, a. *Con'vex* on both sides; doubly convex. — *con-ve'o-plane*, a. Same as *PLANO-CONVEY*.

*con'vert', pp.* *Converted*. S. S. *con'vert'*, 1 ken-vē'; 2 cōn-vē', et. 1. To transport from one place to another; carry; as, to convey coal by barges. 2. To furnish a medium or path for passage; transmit; ns, the telegraph conveys messages. 3. To be the means of imparting; communicate.

No language of man is destitute of words conveying the ideas of virtue and vice, of goodness and wickedness. R. PATTERSON *Tables of Infallibility, Is God Everlasting?* p. 14. [s. n. 1857.]

4. *Law.* To transfer the title to or of, as real estate. 5. To send. 6. To conduct, to manage. 7. To maintain; sustain. 8. To transmit, as to offspring; obtain by heredity; derive. 9. To convey. [*F.* *conveyer*, < *L.L.* *convoy*, a company on the way, < *L.* *convoy* (< *cum*), with, + *via*, way.] *con-vey'*, < *con-ve'*, n. *Syn.*: carry, change, give, move, remove, sell, shift, transfer, transmit, transport. *Convey*, *transmit*, and *transport* all imply delivery at a destination; as, I will convey the information to your friend; air conveys sound (to a listener); a man carries an appearance, conveys an impression, the appearance remaining his own, the impression being given to another; I will transmit the letter; transport the goods. A horse carries his mane and tail, but does not convey them. *Transfer* may or may not imply delivery to another. In law, real estate, which can not be moved, is conveyed by simply transferring title and possession. *Transport* usually refers to material, *transfer*, *transmit*, and *convey* may refer to immaterial objects; we transfer possession, transmit intelligence, convey ideas, but do not transport them. In the case of *convey* the figurative sense now predominates. See *CARRY*. — *Ant.*: cling to, hold, keep, possess, preserve, retain. — *Prep.*: convey to a friend, a purchaser, etc.; convey from the house to the station; convey by express, by hand, etc. *con-vey'a-ble*, a. That may be conveyed.

*con'vey'r*, n. 1. A conveyance. 2. A convey. [*ANCE*, 1. *con-vey'al*, 1 ken-vē'al; 2 cōn-vē'al, n. Same as *CONVEY*. — *con-vey'ance*, 1 ken-vē'ans; 2 cōn-vē'ans, et. *Organ-building*. To place apart by means of a conveyance. *Organ-pipes* are said to be conveyed off when wind is supplied to them at a distance from the soundboard.

*con-vey'ance*, n. 1. The act, process, or result of conveying, transporting, or carrying; carriage; also, the act of transmitting, as by tradition. 2. A robbery; removal by stealth. 3. That by which anything is conveyed or transported, or which serves as a means or way of carriage, as any vehicle; as, to hire a conveyance by the hour; an aqueduct is a conveyance for water. 4. *Law*. (1) The act of transferring title to property by a written instrument. (2) The instrument whereby the title is transferred, including deeds, leases, mortgages, and wills.

Conveyances once required publicity to render them effective, and then were known as notations; under the modern system of transfer they are secret and operate by delivery. In addition to the notorious c. there was formerly the tortious c., which frequently operated to transfer a greater estate than the conveyor himself possessed, as when a tenant for years or life assigns premises in fee simple. Where a conveyance made by deed is known as innocent; all conveyances are now of this kind.

The former (deeds) being principally such as serve to convey the property of lands and tenements from man to man, are... denominated conveyances. BLACKSTONE *Comm.* bk. ii, p. 306.

5. The imparting of thought by language or some means of expression; also, the means thus employed. 6. Removal. 7. A device; artifice; hence, underhand conduct. 8. A tube which carries the wind to an organ-pipe. — public conveyance, a vehicle licensed or held for the general use of the public. — *con-vey'ance-er*, n. One whose business is conveying. — *con-vey'ance-ing*, n. 1. The business of preparing conveyances of property, especially real estate, including the investigation of titles. 2. That branch of law which treats of transfers of title, especially to real estate. 3. Trickery or deceitful conduct.

*con-vey'd', pp.* *Conveyed*. S. S. *con-vey'er*, 1 ken-vē'er; 2 cōn-vē'er, n. 1. One who or that which conveys, transports, transmits, imparts, or transfers; specifically any mechanical contrivance for conveying material in the working of mills, elevators, etc., such as endless chains, etc. 2. One who conveys or transfers property. 3. A thief; truster. — *hoist conveyer*, a lifting apparatus consisting of a wire-rope tramway used in transferring loads from the ground to the tramway. — *push-plate c.*, a contrivance for conveying coal, sand, crushed stone, or other loose material, for short distances. The device consists of an endless chain to which plates are attached at fixed intervals; these plates, as they pass over a series of chains, push the material forward in the trough through which the chain revolves.

*con-vey'or*, 1 kon-vē'er or -er; 2 cōn-vē'er, n. Same as *CONVEYER*, 1 & 2.

*con-vey'in*, 1 kon-vē'im; 2 cōn-vē'in, n. *Chem.* A crystalline alkaloid (C<sub>21</sub>H<sub>23</sub>N<sub>5</sub>O<sub>4</sub> + H<sub>2</sub>O) derived from the seeds of the vetch (*Vicia sativa*), and a source of alloxantin. [*L.* *convex* + *vincin*.]

*con-vey'um*, 1 kon-vē'um; 2 cōn-vē'um, n. *Rom. Law*. A slanderous charge of an offense against public decency. [*L.*]

*con-vey't'*, 1 ken-vikt'; 2 cōn-vikt', et. 1. To prove guilty, as of an offense charged; especially, to find guilty after a judicial trial; as, the jury convicted him. 2. To awaken to consciousness of guilt or sin; as, his conscience convicted him. 3. To establish by evidence; convince; also, to prove false. 4. To defeat. [*L.* *convictus*, pp. of *convincere*; see *CONVINCE*.] — *con-vey't'*, n. *Syn.*: see CONDEMN; CONVINCE. — *Prep.*: convicted of the crime; upon the evidence; by the jury. — *con-vey't'-bl'* (et. a. *con-vey't'-bl'* (et. a. *con-vey't'-ment*, n. *con-vey't'*, a. 1. Proved guilty. 2. Conquered.

*con-vey't'*, 1 kon-vikt'; 2 cōn-vikt', n. 1. One who has been tried by process of law and found guilty. 2. One who is undergoing penal servitude; a criminal.

In Auburn prison during the year [1880] nearly seven per cent. of the convicts were graduates of colleges, academies, and high schools. W. F. CRAFT *Successful Men* p. 20. [s. p. n. 1871.]

[< *L.* *convictus*; see *CONVICT*, n.] — *convict system*, the system adopted by a nation or state in disposing of its convicts or their labor, as by penal colonies or by employment in mining or other industries.

*con-vice'tion*, 1 ken-vik'shən; 2 cōn-vik'shən, n. 1. The state of being convinced; firm belief founded on evidence; the act of producing mental conviction; also, a proposition which one firmly believes.

To open to conviction and information is the mark of a noble mind. NEWTON *Works*, *Ecl. Hist.* in vol. ii, p. 59. [s. n. 1831.]

Convincions are generally first impressions that are sealed with later prejudices. G. MEHERITH *Beauchamp's Career* p. 139. [s. n. 1883.]

2. The state of being religiously convicted; the awakening by conscience to the evil and heinousness of sin. 3. The act of establishing a mistake, or of forcing acknowledgment of the truth. 4. *Law*. The act of convicting or the state of being convicted by judicial process, especially by a jury; an adjudication that the person accused is guilty.

After an individual had suffered a certain number of convictions for crime, he should forfeit the freedom to roam abroad and curse his fellows. BOOTH *Darkest England* pt. ii, p. 206. [s. n. 1871.]

[< *L.L.* *convictio* (n.), < *L.* *convictus*; see *CONVICT*, n.] *Syn.*: see BELIEF; FAITH. — *under conviction*, in a state of compunction and repentance. — *con-vice'tion-al*, a. [*Rare.*]

*con-vice't-ism*, 1 ken-vikt'izm; 2 cōn-vikt'izm, n. The convict system; also, convicts as a class.

*con-vice't'it'*, 1 ken-vikt'it'; 2 cōn-vikt'it', a. [*Rare.*] Tending to conviction; tending or serving to convince or convict. — *con-vice't'it'-ly*, adv. — *con-vice't'it'-ness*, n.

*con-vice't'or*, 1 ken-vikt'or; 2 cōn-vikt'or, n. A messmate or table companion; also, a boarder. [*L.* *table companion*, < *con-* (< *cum*), with, + *vivo*, live.]

*con-vice't'*, 1 ken-vikt'; 2 cōn-vikt', et. [*CONVINCE*; *CONVINCE*.] 1. To satisfy by evidence in respect to truth or falsity; persuade by argument; make to believe; ns, I am convinced of the necessity of prudence. In order to persuade a man of sense, you must first convince him. BLAIR *Rhetoric* lect. xxv, p. 262. [s. n. 1850.]

2. [*Archaic.*] To prove guilty; convict. Which of you convinceth me of sin? John viii, 46.

3. To convince. 4. To confute; also, to conquer. 5. To prove or demonstrate as evil, bad, or false. [*L.* *convincere*, *convincere* (< *cum*), with, + *vincere*, conquer.]

*Syn.*: convince, persuade. One is convinced of a doctrine or a duty; convicted of a sin or crime. One is convinced by argument or evidence addressed to the intellect; he is persuaded by appeals addressed to the affections and the will. See *PERSUADE*. — *Ant.*: disturb, perplex, puzzle, unsettle. — *Prep.*: convince of truth or error. — *con-vice't'-ed*, adv. — *con-vice't'-ed-ness*, n. — *con-vice't'-ment*, n. — *con-vice't'-er*, n.

Lincoln trained himself to be the foremost convincer of his day. GRANTLEY in *Century Mag.* July, 1891, p. 377.

— *con-vice't'-bl'* (et. a. — *con-vice't'-ing-ly*, adv. In a convincing manner. — *con-vice't'-ness*, n. The quality or power of carrying conviction.

*con-vice't'*, 1 ken-vikt'; 2 cōn-vikt', n. [*Rare.*] A guest at a feast; boon companion. — *con-vice't'*, et. To feast.

*con-vice't'-al*, 1 ken-vikt'al; 2 cōn-vice't'al (adv.), a. 1. Of or pertaining to a feast, especially a drinking-feast; festive; social; as, a convivial gathering. 2. Devoted to feasting, or to good-fellowship in eating or drinking; jovial. [*L.* *convivialis*, < *con-* (< *cum*), together, + *vivo*, live.] *con-vice't'-al-ly*, < *con-vice't'-al-ly*, adv. A convivial person; a boon companion. — *con-vice't'-al-ize*, et. To become convivial; practice or promote conviviality. — *con-vice't'-al-iz-e'*, < *con-vice't'-al-iz-e'*, n.

*con-vice't'-al-ly*, 1 ken-vikt'al-ly; 2 cōn-vice't'al-ly, n. [*TYES*, 1 -tiz; 2 -tis, pl.] 1. The mirth and good-fellowship that naturally attend a feast; sometimes, good-fellowship in general.

There is a tone of solemn and sacred feeling that blends with our conviviality. IRVING *Sketch-Book*, *Christmas* p. 225. [s. p. n. 1861.]

2. A convivial disposition; as, a man of conviviality. — *con-vice't'-um*, 1 ken-vikt'um; 2 cōn-vice't'um, n. [*L.*] An entertainment accompanied by eating and drinking. — *con-vice't'-ant*, 1 ken-vikt-ant; 2 cōn-vice't-ant, n. [*Rare.*] One who convokes; a convoker. — *con-vice't'-cat'*, a.

*con-vice't'-cat'ion*, 1 ken-vikt'kashən; 2 cōn-vice't'kashən, n. 1. The act of convoking an assembly by summons. 2. The assembly thus convoked; especially, an assembly of clergymen. 3. [*C.*] *Ch. of Eng.* An ecclesiastical body similar to a synod, but meeting only at the call of some authority; as, the Convocation of Canterbury. The Convocation of Canterbury and the Convocation of York, each with an upper and a lower house, meet during every session of Parliament. They are summoned by the archbishops of Canterbury and York in pursuance of writs from the crown. 4. [*C.*] *Prot. Epis. Ch.* A voluntary convention of clergy and laymen from a division of a diocese, meeting unofficially to discuss and promote church measures; also, the district thus organized. 5. *Freemasonry*. A regular or special meeting of a Royal Arch chapter of Masons. 6. [*U. S.*] *Chicago Univ.* Same as *COMMENCEMENT*. 7. [*L.* *convocatio* (n.), < *convocare*; see *CONVOKE*.] *Syn.*: see ASSEMBLY; CONGRESS. — *convocative* (adv.), < *convocare*; see *CONVOKE*. — *convocative*, n. One who advocates the restitution of power formerly exercised by the convocations of the English Church; a supporter of a Convocation freed from parliamentary control.

*con-vok'e'*, 1 kon-vōk'; 2 cōn-vōk', et. [*CONVOKE*; *CONVOKE*.] 1. To call together by summons; summon to meet.

Xerxes convoked a meeting of the principal Persian counselors, and announced to them his resolution to invade Greece. GREEK *Geography* p. 20. [s. n. 1871.]

2. To attempt to secure by chiming. [*L.* *convocare*, < *con-* (< *cum*), together, + *voco*, call.] *con-vo-cate'*, n. *Syn.*: assemble, call, call together, collect, convene, gather, muster, summon. A convention is called by some officer or officers, as by its president, its executive committee, or some eminent leaders; the delegates are assembled or convened in a certain place, at a certain hour. *Convo-*

o-or'der, 1 kō-ōr'der; 2 cō-ōr'der, *rr.* [Itare.] To place or  
arrange coordinately.

**co-or-di-nal**, 1 ko-ör'-di-nal; 2 co-ör'-di-nal, a. 1. Belonging to the same order, as in botany or zoology. 2. *Math.* Having (a certain number of) coordinates. **co-or-di-nance**, etc. See **co-<sup>1</sup>**, *prefix*.  
**co-or-di-nate**, 1 ko-ör'-di-nät; 2 co-ör'-di-nät, r. [*NAT-EN; -NÄT-INO*]. 1. *t.* To put in the same rank, class, or order, or in classes of the same degree of generality or of importance; make coordinate; as, to coordinate species. 2. To place in harmonious or reciprocal relation; combine or adjust for action or for any end; as, to coordinate muscles.

**II. i.** 1. To be of the same order or rank or degree of classification. 2. To come into coordination; harmonize; as, this part does not coordinate with that. [*LL. coordinatus*, pp. of *coordino*, < *L. co-* (< *cum*), with; and see *ORINATE*, a.]

**co-or-di-nate**, 1 ko-ör'-di-nät; 2 co-ör'-di-nät, a. 1. Of the same order or rank; existing or occurring together in equal degree or similar relation; not subordinate; as, coordinate authority; coordinate terms.

Prayer and Almsgiving are seen to be coordinate. E. M. Goulburn *Thoughts on Personal Religion* pt. ii, p. 136. [A. 1867.] 2. *Math.* Of or pertaining to coordinations.

—**coordinate geometry** (*Math.*), same as **ANALYTIC GEOMETRY**. See under **GEOMETRY**.—**c. clauses**, propositions, terms (*Gram.*), clauses, propositions, or terms in the same sentence or statement that are of equal order or rank; opposed to *subordinate*. See *co-* at right angle. —**c. conjunctions** (*Gram.*), those conjunctions that join coordinate clauses, etc. See **CONJUNCTION**. —**Coordinate** (coordinating) conjunctions embrace (1) copulative, expressing addition or expansion (and, also, etc.); (2) adversative, expressing opposition (*but*, notwithstanding, etc.); (3) disjunctive, expressing exclusion (or, nor, etc.); (4) causal, expressing cause (*because*, etc.); (5) illative, or inferential, expressing consequence and inference (*hence*, *therefore*, etc.). —**co-or-di-nate-ly**, *adv.* —**co-or-di-nate-ness**, *n.*

**co-or-di-nate**, *n.* 1. One who or that which is of the same order, rank, power, etc. 2. *Math.* A member of a system of lines or angles by means of which, as elements of reference, position is determined in relation to certain fixed lines or planes.

The coordinates commonly used are as follows: (1) *The Cartesian*, the distances of the given point from each of two axes (measured parallel to the other) (see **AXIS**), or, in three-dimensional geometry, its distance from each of three intersecting planes parallel to the intersection of the other two. In case the axes or planes are at right angles, the coordinates are called *rectilinear*; otherwise they are *oblique*. (2) *The polar*, being the length of the line joining the given point with a fixed origin called the *pole*, and the angle made by this line with a fixed line passing through the origin. An extension makes this system applicable also to three-dimensional geometry.

3. *Phon.* A sound, as a stopped consonant having a formation similar to others of the same group.

—**areal coordinate** (*Math.*), this area of a triangle used to fix the position of a point. Three such are employed, having the point as their common vertex and the sides of a fundamental triangle as bases.—**barycentric c.**, a triangular or a tetrahedral coordinate; so called because the point whose position is to be determined is always the center of gravity of bodies located at the fixed vertices and having weights equal to the value of the coordinate.—**biangular c.**, one of the two angles at the base of a triangle whose base is a fixed line and whose vertex is the point whose position is to be determined.—**bicircular c.**, any coordinate in a system for determining the position of a point by the intersection of circles.—**bilinear c.**, the distance of a point whose position is to be determined, from either of two fixed points.—**vectorial c.**—**binary c.**, any coordinate in a system locating the position of a point on a plane, in which case only two independent quantities are required.—**bipunctal c.**, the segment between a line and either of two focal or fixed parallel rays; used to determine the position of a line.—**Cartesian coordinates**, coordinates with reference to axes. See **AXIS**.—**curve-c.**, a coordinate belonging to any system used for determining curves.—**curvilinear c.**, any coordinate for fixing the position of a point on a curved surface.—**elliptic c.**, either of two conic focals whose intersection determines this position of a point in a plane; also, any one of the three similarly fixing a point in space.—**external c.** (*Statist. Mech.*), in a given system, a coordinate of an external body upon which the potential energy of the system is partly dependent.—**generalized c.**, the value of a parameter in an equation of a set of surfaces, determining one surface of that set, and used with other parameters to determine the position of a point by intersection.—**geographical coordinates**, latitude or longitude.—**homogeneous c.**, a ratio of two coordinates, in a system where such ratios are used instead of the coordinates themselves. One more original coordinate is required than would otherwise be necessary, but the resulting equations are rendered homogeneous by the plan.—**isothermal c.**, one of two orthogonal curves whose intersection determines the position of a point in space.—**isotropic c.**, one of a system of six coordinates determining the position of a line in space.—**orthotomic c.**, one of three surfaces meeting at right angles, and determining the position of a point by such intersection.—**palpable c.**, any one of the generalized coordinates indicating the configuration of a system; so called because they are often the only coordinates that remain after certain substitutions in the Lagrangian equations.—**polar c.**, the distance of a point from a fixed point (pole) or the angle made by the line connecting these points with a fixed line, used together to determine the position of the point in a plane; also, any one of three quantities (radial distance, latitude, and longitude) used to fix a point in space.—**positional c.**, see under **POSITIONAL**.—**projective c.**, a coordinate in any system that defines a point or a plane by the considerations of projective or graphic geometry free from all metrical elements.—**quadrilateral c.**, the distance of a point from one of four fixed planes, measured in a fixed direction; used with the three other corresponding distances to fix the position of the point.—**Rodriguez's c.**, the cosine of the angle of rotation about one of the axes through a fixed (stationary) point in a solid body; used together with other coordinates to define the position of the body.—**spherical coordinates**, distances measured on a sphere from axes which are great circles.—**tangential c.**, one of a system of coordinates defining the position of a line in a plane or of a plane in space by points of tangency.—**tetrahedral c.**, triangular c., see **BARYCENTRIC COORDINATE**.—**trigonometrical c.**, a spherical coordinate.—**trilinear coordinates**, the distances from the sides of a fixed triangle of reference.—**vectorial c.**, same as **vector**.

**co-or-di-nal** (*Hom.*), 1 ko-ör'-di-nä'shän; 2 co-ör'-di-nä'shän, *n.* 1. The net of coordinating, or the state of being coordinate. 2. *Gram.* The part of syntax that treats of the combination of independent sentences into com-

pound sentences. [*< LL. coordinatus*; see **COORDINATE**, r.]

**co-or-di-nal-ity**, a. *Expressing coordination; coordinance.* —**co-or-di-nal-ity**, a. *Pertaining to coordination.*

**co-<sup>1</sup>**, *n.* Same as **co-**.

**Coorg**, 1 kūr; 2 cōōr; *n.* Same as **KURG**.

**coor'gee**, 1 kūr'gē; 2 cōōr'gē, *n.* [*E. Ind.*] A plow fitted with a drill for planting grain.

**coo'rie**, 1 kūr'ri; 2 cōōr'ri, *vi.* Same as **COWER**, r.

**Coorn'hert**, 1 kūr'n'hert; 2 cōōn'hert, *n.* Dirk Volkerts-zaan (1522-1590). A Dutch scholar, poet, and engraver. *Creation of the World* (7 plates). *Coorn'hert*; *Cue'ren-hert*.

**coo'rong**, 1 kūr'rong; 2 cōōr'rong, *n.* [*Anglo-Austral.*] An Australian tree (*Frenela robusta*) of the pine family.

**coo'rong-ite**, 1 kūr'rong-ite; 2 cōōr'rong-ite, *n.* A mineral caoutchouc (C<sub>10</sub>H<sub>10</sub>O), found in Coorong, South Australia.

**co-or-thog'o-nal**, 1 kō-ör-theg'o-nal; 2 cō-ör-theg'o-nal, a. Cutting each other at right angles, as meridians and the equator cut smaller circles on a sphere. **co-or-tho-thom-let**.

**Co's**, 1 kō's; 2 cō's. A county in northern New Hampshire; 1,812 sq. m.; county-seat, Lancaster. 2. 1 kūs; 2 cūs. A county in S. W. Oregon; 1,578 sq. m.; county-seat, Empire City.

**Co's**, 1 kō's; 2 cō's, *n.* *Bib.* Acts xxi, 1.

**Co's**, 1 kō's; 2 cō's, *n.* 1. A river in N. W. Georgia and E. Alabama; length, 25 m.; uniting with the Tallapoosa, forms the Alabama. 2. A county in E. central Alabama; 671 sq. m.; county-seat, Rockford.

**Coos Bay**, 1 kūs; 2 cō's. An inlet on the coast of Oregon; lat. 40° 21' N.

**coose**, 1 kūs; 2 cō's or cō's. [*Dial. Eng.*] 1. *cf.* To gossip; loiter. 2. *cf.* To gossip.

**coos'er**, 1 kūs'ar; 2 cō's'er, *n.* [*Scot.*] A stallion; a courser.

**co-os'si-ly**, 1 kō-os'si-fai; 2 cō-os'si-fy, *ri.* [*-FEN; -FY-ING*]. To grow together as one bone; said of two bones or parts of bones previously separate.—**co-os'si-fi-ca-tion**, *n.*

**coost**, 1 kūs; 2 cō'st [*Scot.*], *imp.* of **EAST**, *v.*

**coost**, 1 kūs; 2 cō'st, *n.* [*Scot.*] Physique; condition.

**coos'ten**, 1 kūs'n; 2 cō's'n, *pa.* [*Scot.*] Having been cast.

**coot**, 1 kūt; 2 cō't, *vt.* [*Eng.*] To provide with a hip-roof, as a house or haystack.

**coot**, 1 kūt; 2 cō't, *n.* 1. A fulicine rail-like aquatic bird having a shield-like extension over the forehead and lobate membrane to the toes. The plumage is of a uniform slaty color, with the edge of the wing whitish. *Fulica atra* is the European, *F. americana* the American coot. 2. [*U. S.*] A sea-duck, especially a scoter; as, the black coot (*Edemia perspicillata*). 3. The guillemot (*Uria troile*). 4. [*Brit. Guiana.*] The purple gallinule. 5. [*Colloq.*] A common or stupid fellow; as, a poor coot. 6. [*Scot. & N. Eng.*] (1) The ankle. (2) A fetlock. (3) A trifle; n. thing of little value. [*ME. coote*, prob. *Cel.*, *cp. W. cutiar*, < *cwta*, bobtailed, < *tar*, hen.] *cooter*; *cō't*.

**Coot'a-mun'dra**, 1 kūt'a-mun'dra; 2 cō't'a-mun'dra, *n.* A town in Harden county, New South Wales.

**Coote**, 1 kūt; 2 cō't, *sr. Eire* (1726-1783). A British general born in Ireland; governor of Calcutta; took Pondicherry. Defeated Hyder Ali. [*Ireland.*]

**Coote'hilly**, 1 kūt'hilly; 2 cō't'hilly, *n.* A town in Cavalier county, Co. Wick, Ireland.

**coot'er**, 1 kūt'er; 2 cō't'er, *n.* [*Local U. S.*] 1. The box tortoise (*Cistudo carolina*). 2. A Florida terrapin (*Pseudemys floridana*). 3. The snapping turtle.

**coot'foot**, 1 kūt'fut; 2 cō't'fut, *n.* The red phalarope.

**coot'grebe**, 1 kūt'grib; 2 cō't'grib, *n.* A finfoot or sun-grebe.

In English the copula, according to the most common view, is always the present tense indicative of the verb to be, either with or without the negative particle. In languages generally it is either fouled in the verb to be, in some cognate verb, as in Greek, in the verb signifying to come, to go, to be, etc., or is implicated in any other verbal form embracing also a predicate, as "the eagles fly," equivalent to "the eagles fly." The verb be, because of its connective use, has often been called the *copula*, ... linking the essential subject with the predicate nominative. ... It must not be forgotten, however, that the verb be when called the *copula* is still a verb, and is still the predicate verb. [*< C. LATIN Working Grammar of the Eng. Lang. p. 291. [w. l. & w. 08.]*]

**copy-right**, *n. Law.* The exclusive legal right of authors, composers, playwrights and artists to publish and dispose of their several works for a limited time.  
The copyright law of the United States was first passed May 31, 1790. The present law requires the author or artist, in order to secure copyright for works reproduced for sale, to publish his work with a written notice containing the name of the owner, and promptly after publication, to send to the Copyright Office, Library of Congress, Washington, D. C., two copies of the work, with an application for registration stating to which class it belongs, and a money-order for the statutory registration fee of \$1. For photographs, the fee, where a certificate of registration is not demanded, is 50 cents. The Copyright Act of England (1911) extends the right for the life of the author and for a period of seven years after his death. In the United States the Copyright Act passed July 1, 1909, makes the term of copyright 28 years with the right of renewal for 28 years on application within one year prior to the expiration of the existing term, with a corresponding renewal-right covering copyrights granted under previous statutes. By this act, a foreigner may obtain copyright in the United States; provided, (1) that in the case of a book, photograph, chromo, or lithograph the copies deposited shall be printed from type set in the United States, or from plates made therefrom; or from natives or drawings or designs made in the United States, or from transfers made therefrom; (2) when he shall be domiciled within the United States at the time of the first

publication of his work; or (3) when the nation or state of which he is a subject or citizen grants to citizens of the United States the benefit of copyright on substantially the same basis as to its own citizens, or copyright protection substantially equal to the protection secured to such foreign author under this act or by treaty; or when such foreign state or nation is a party to an international agreement which provides for reciprocity in the granting of copyright, by the terms of which agreement the United States may, at its pleasure, become a party thereto. Publication of the work with the notice of copyright required by this act initiates copyright. By an amendment to the copyright law, in effect March 3, 1921, an ad interim copyright which endures for four months may be obtained for a book first published abroad in the English language, provided that one complete copy of the foreign edition be deposited in the copyright office not later than sixty days after its publication abroad. The British copyright law of July 22, 1902, defines musical copyright as the exclusive right of the owner of such copyright under the copyright act in force for the time being to do or authorize another person to do all or any of the following things: (1) To make any kind of copies of such musical work. (2) To abridge such musical work. (3) To make any new adaptation, arrangement, or setting of such musical work, or of the melody thereof, in any new musical system, written, printed, or otherwise reproduced without the consent lawfully given by the owner of the copyright in such work. An act of Aug. 4, 1906, amending this law, imposes a fine upon a person convicted of knowingly violating it, and fine and imprisonment for a repetition of the offense. The Copyright Act of 1911 confirms the acts of 1902 and 1906. — **International copyright**, an arrangement whereby authors of those countries which are parties to it may copyright their works in any country included in the arrangement.

**cos-mog'no-sis**, 1 kēs-mog'no-sis; 2 cōs-mōg'nō-sis, n. The supposed world-knowledge or instinct of direction underlying the migratory and other movements of animals. [*Gr. kosmos, world, & gnōsis, knowledge.*]

**cos-mog'o-ny**, 1 kēs-mog'o-ny; 2 cōs-mōg'o-ny, n. [*YES, 1-niz; 2-nis, pl.*] 1. A theory or account of the origin or present constitution and order of the world; a branch of cosmology; as, the *Mosaic cosmogony*; the *cosmogony of Hesiod*. The early Greek cosmogonies were fanciful deductions of all things from combinations of a few elements, or even from some single element, such as earth, air, water, or fire.

There are three general classes of cosmogonies—those which represent (1) the world as having existed in its present form from eternity, (2) the matter but not the form of the world as having existed from eternity (*atomism, cosmism, evolutionism*, etc.), and (3) both the matter and form of the world as having a spiritual cause (*creationism*).

2. [*Rare.*] The creation or origin of the universe. [*Gr. kosmogonia, < kosmos, world; and see -GONY.*]

**cos'mo-gon'ic**, a. Of or pertaining to cosmogony. **cos'mo-gon'al**; **cos'mo-gon'tic** — **cos-mog'o-nist**, n. One who holds a theory respecting the origin of the universe. **cos-mog'o-ner** — **cos-mog'o-nize**, *vt.* [*Rare.*] To devise a cosmogony.

**cos-mog'ra-phy**, 1 kēs-mog'ra-fī; 2 cōs-mōg'ra-fy, n. 1. The science that describes the universe, including astronomy, geography, and geology.

*Cosmogony* treats of the birth, *cosmography* of the description, and *cosmology* of the theory of the world. [*Gr. kosmos, world, & graphō, write.*] — **cos'mo-graph'ic-ly**, *adv.*

**cos'mo-labe**, 1 kēs'mo-lāh; 2 cōs-mō-lāh, n. An astrology. **cos-mol'a-try**, 1 kēs-mol'a-trī; 2 cōs-mō-l'a-try, n. Worship of the cosmos.

**cos'mo-line**, 1 kēs'mo-līn; 2 cōs-mō-līn, n. A variety of **cos'mo-lin**, a petroleum. Compare *VASELINE*. [*Gr. kosmos, world, & oil.*]

**cos'mo-log'ic**, 1 kēs'mo-lōjī-kal; 2 cōs-mō-lōg'i-cal, n. Of or belonging to cosmology; the science of the universe; also, and more specifically, pertaining or relating to the nature and laws of the cosmos as an instituted and alterable order of things; as, the *cosmological argument*; *cosmological theory*. **cos'mo-log'ic**, -cosmological argument (*Theol.*), the inference of the existence of God as the only conceivable explanation of the origin and development of the material universe. In its many forms this argument has emphasized either the derived or changeable, or dependent, or finite and temporal, or relative and phenomenal, or merely potential, character of the existing system of things, as proving demonstratively the need of God as First Cause. — **c. proof**, proof of the

existence of God based on the principle of efficient causation: one of the three great scholastic proofs of theism. — **cos'mo-log'ic-al-ly**, *adv.* From the cosmological point of view.

**cos'mo-lō-gy**, 1 kēs'mo-lō-jī; 2 cōs-mō-lō-gy, n. [*YES, 1-jiz; 2-gis, pl.*] 1. The general science of the cosmos or universe, in all its parts, laws, and operations, so far as these can be known by observation and scientific inquiry and may be regarded as constituting a cosmos; opposed to *ontology*. 2. *Philos.* The philosophical theory, or philosophy, of the cosmos. Called also *rational cosmology*. See *PHILOSOPHY*. Cosmology, in this sense, embraces the theories of cosmogony, of cosmology proper, of the systems of nature and the supernatural, and of teleology. Cosmology proper, in philosophy, has its theories on the fact that the cosmos is apparently made up of matter and its phenomena and minds and their phenomena. The philosopher may accept (1) both facts entire (*realism, dualism*); (2) the distinct existence of matter alone (*materialism*); (3) that of mind alone (*idealism*); (4) the non-existence of both as substances (*phenomenalism*); (5) the unknowableness of both (*agnosticism*); (6) the practical non-existence of both, with reference of their phenomena to sensation (*idealistic phenomenalism*); (7) the identification of both (*monism, pantheism*, etc.); (8) the absolute non-existence of both (*nihilism*); (9) the identification of pure being, as idea, with non-existence (*Hegelianism*). [*Gr. kosmo- + -log'y.*] — **cos'mo-lō-gist**, n. An expert in cosmology.

#### CRANIOMETRIC INDEXES.

Crania may be compared by means of indexes. An index is the ratio between two dimensions or capacities supposed to have some natural relation, that which is normally the larger being used as a base and taken as 100. Thus:

Larger dimension : smaller dimension :: 100 : Index. Therefore, Index = smaller dimension  $\times$  100  $\div$  larger dimension.

The indexes in most common use are the following:

NAME.	How Obtained.
au-ric'u-lo-pa-r'i-e'	Biauricular diameter $\times$ 100 $\div$ greatest cranial breadth
au-ric'u-lo-ver'ti-cal	Auricular height $\times$ 100 $\div$ greatest cranial length
bas'i-lar	Basialveolar line $\times$ 100 $\div$ cranial length
ce-phal'ic	Greatest cranial breadth $\times$ 100 $\div$ greatest length (taken in various ways)
ceph'a-lo-fa'cial	Capacity of all cavities of face $\times$ 100 $\div$ capacity of cranium
ceph'a-lo-nn'sal	Capacity of nasal fossae and contiguous cavities $\times$ 100 $\div$ capacity of cranium
ceph'a-lo-or'bi-tal	Capacity of both orbits $\times$ 100 $\div$ capacity of cranium
cer'e-bral	One obtained by interior measurements of cranium
cor'o-noid	In mandible, distance between coronoid and condyloid processes $\times$ 100 $\div$ projection length
co-ro'no-pa-r'i-e-tal	Greatest frontal breadth $\times$ 100 $\div$ greatest cranial breadth
era'ni-o-fa'cial	Vertex to nasion $\times$ 100 $\div$ nasion to gnathion (both projections)
cu'bic	Length $\times$ breadth $\times$ height $\times$ 100 $\div$ 2 $\times$ capacity
den'tal	Dental length (space occupied by molar and premolar teeth) $\times$ 100 $\div$ basinasal line $\times$ 100 $\div$ transverse mid-facial diameter
fa'cial (French)*	Ophryon to gnathion $\times$ 100 $\div$ transverse mid-facial diameter
fa'cial (German)*	Nasion to gnathion $\times$ 100 $\div$ transverse mid-facial diameter
fa'cial (Kollmann)*	Nasion to gnathion $\times$ 100 $\div$ bizygomatic diameter
fa'cial, su-pe'ri-or (French)*	Ophryon to prosthion $\times$ 100 $\div$ transverse mid-facial diameter

NAME.	How Obtained.
fa'cial, su-pe'ri-or (German)*	Nasion to prosthion $\times$ 100 $\div$ transverse mid-facial diameter
fa'cial, su-pe'ri-or (Kollmann)*	Nasion to prosthion $\times$ 100 $\div$ bizygomatic diameter
fron'tal	Least frontal breadth $\times$ 100 $\div$ greatest frontal breadth
fron'to-pa-r'i-e-tal	Least frontal breadth $\times$ 100 $\div$ greatest cranial breadth
gnath'ic	Basialveolar line $\times$ 100 $\div$ basinasal line
man-dib'u-lar	In mandible, bicondylar diameter $\times$ 100 $\div$ projection length
max'i-la-ry (1)	Simcas superior facial (German)
max'i-la-ry (2)	Width of palate (at second molar, nuteside) $\times$ 100 $\div$ length from prosthion to posterior border of superior maxilla
na'sal (French)	Greatest width anterior nares $\times$ 100 $\div$ greatest height
na'sal (German)	Greatest width anterior nares $\times$ 100 $\div$ nasosubnasal line
na'so-ma'lar	Distance direct from nasion to maxilla $\times$ 100 $\div$ same distance between same measured on surface
oc-cip'i-tal-pa-r'i-e-tal	Blasteric diameter $\times$ 100 $\div$ greatest cranial breadth
or'bi-tal	Vertical orbital diameter $\times$ 100 $\div$ horizontal diameter
or'bi-to-ma'lar	Width between lateral fronto-malar points $\times$ 100 $\div$ bizygomatic diameter
pal'n-tal	Greatest breadth hard palate $\times$ 100 $\div$ greatest length
spbe'no-spbe'no-l'do	Distance from stenton to stenton $\times$ 100 $\div$ greatest frontal breadth
spbe'no-l'do	Same distance $\times$ 100 $\div$ least frontal breadth
spbe'no-l'do-a-uric'u-lar	Same distance $\times$ 100 $\div$ least auricular breadth
spbe'no-l'do-pa-r'i-e-tal	Same distance $\times$ 100 $\div$ greatest parietal diameter
spbe'no-pa-r'i-e-tal	Stenton to stenton $\times$ 100 $\div$ greatest breadth
stap'h-y-lin'ic	Inside width of palate (at second molar) $\times$ 100 $\div$ its length
step'h-a-no-zyg'o-o-mat'ic	Bistephanic diameter $\times$ 100 $\div$ bizygomatic diameter
trans-ver'ti-cal	Greatest cranial height $\times$ 100 $\div$ greatest breadth
ver'ti-cal	Greatest cranial height $\times$ 100 $\div$ greatest length

Syn: altitudinal, helobit, length-height, alveolar, breadth, latitudinal, length-breadth, breadth-height, malar, palato-maxillary, fronto-zygomatic.

**Cra'ni-o'mi, n. pl. Ich.** A suborder of acanthopterygians with the post-temporal forming an integral part of the cranium and the postero-temporal crowded out of place. [*Cra-ni-um*, *-ra-ni-ome*, *-ra-ni-o-mous*, *-ra-ni-opa-gus*, *-ra-ni-opi*.] **Tera.** A double monster with heads adherent; twins whose heads are joined together. — *cra'ni-o-pa-thy, n.* A disease of the head. **ceph'** — *a-lo-pa-thy; cra'ni-o-phore, n.* An apparatus for holding a skull in a required position, as for taking measurements or photographs of a skull. — *cra'ni-o-plas'ty, n. Surg.* An operation for restoring or supplying parts of the skull or the scalp. — *cra'ni-o-ra-chis-chi-sis, n.* A congenital longitudinal cleft or fissure in the vertebral column and skull. — *cra'ni-o-schi-sis, n.* Congenital fissure of the skull. — *cra'ni-o-sele-to-sis, n.* An abnormal condition of the skull characterized by thickening of the bones. — *cra'ni-o-co-py, n. [Rare.]* Scientific examination of the configuration of the skull also, formerly, phrenology. — *cra'ni-o-cep'tic, a.* — *cra'ni-o-co-plast, n.* — *cra'ni-o-spl'nal, a.* Of or pertaining to the skull and the spine. — *cra'ni-o-ver'te-bral; -cra'ni-o-ste-no'sis, n.* Cranial hyperostosis. — *cra'ni-o-to'sis, n.* Closure of the sutures of the cranium occurring prematurely. — *Cra'ni-o'ta, n. pl. Zool.* A section of vertebrates comprising all with a special skull: opposed to *Acrania*. — *cra'ni-o'te, a. & n.* — *cra'ni-o'ta'bes, n. Pathol.* A circumscribed softening of the bones of the skull, resulting in patches of thinness, especially of the occipital bone: a rachitic disease of infancy. — *cra'ni-o'to-mo, n.* An instrument for use in craniotomy. — *cra'ni-o'to-mo, n. Obst.* The operation of perforating the fetal skull, so that some of the brain may escape, to facilitate delivery in difficult parturition. — *Infant craniotomy (Surg.)*, the cutting through of the bones of the skull in order to make the cranial cavity more spacious. — *cra'ni-o-to-pog'-ra-phy, n.* The division of the surface of the skull into areas corresponding to cortical areas of known function. — *cra'ni-o-trac'tor, n.* A craniostat of special form. — *cra'ni-o-tym-pa'n'ic, a.* Of or pertaining to the skull and the tympanum.

**cra'ni'tis, 1 kra-nat'is or -nit'is; 2 cra-nit'is or -nit'is, n. Pathol.** Inflammation of the bones of the cranium.

**cra'ni-um, 1 kra-nu-m; 2 cra-ni-um, n. [Cra'ni-a, pl.]**

1. The skull of an animal, especially that part enclosing the brain; the brain-case or brainpan.

The cranium... is composed of eight bones—viz., the occipital, two parietal, frontal, two temporal, sphenoid and ethmoid. II. *Gray Anatomy. The Skull* p. 160. [L. *cranium*, *skull*.] *cra'ni-on't.*

The crania of the Inca race show a decided superiority over the other races of the land in intellectual power. *Paracorr Peru vol. i, bk. i, ch. 10 p. 39. In 1848.*

2. *Entom.* The investment of the head, exclusive of the antennae, the eyes, and the mechanism of the mouth. [L., *Gr. kranion, skull*.] *cra'ni-on't.*

**crank, 1 kran'k; 2 cran'k, v. l. t. 1.** To bend into the shape of a crank. 2. To furnish with a crank. 3. To move or operate by a crank. 4. [Scot.] To shakele. 5. [Prov. Eng.] To mark crosswise on (bread and butter) to please a child. II. *Dict.*

II. *f. 1.* To make a course with many turns and bends; wind. 2. To turn a crank, as in starting the engine of an automobile. 3. [Prov. Eng.] To eak. [*< CRANK, n.*] **crank, a. 1.** *Naut.* Delicately or ill balanced, so as to be easily capsized; unsteady; top-heavy.

Any one who has ever rowed an American skiff will remember that these little vessels are "crank" to an extreme degree. *MARYNE RUNN HUNTERS' Feast* ch. 16, p. 135. [G. W. D. 1889.]

2. Hence, in a shabby condition; disjointed; rickety. 3. Spirited and lively; hence, having a confident bearing; positive; sturdy. 4. [Scot.] (1) Out of shape; crooked; as crank fingers. (2) Difficult to deal with; as, a crank question. 5. Sick. [Ult. *< AS. crinan, yield; cp., in senses 2 and 5, D. G. crank, sick.*] **crank't; crank't, n.** — *crank'sld'ed, a.* — *crank'ty, adv.* Sturdily. — *crank'-ness, n.*

**crank, n. 1.** A device for causing rotation of an axis, as by the hand, or for converting rotary into reciprocating motion, or vice versa; usually consisting of an arm attached at one end at right angles to the axis and at the other end to a rod parallel to the axis, and either grasped by the hand or connecting with the reciprocating object; *p.* hole for crank-pin; *s.* hole for as, the crank of a steam crank-shaft. 2. Wheel crank. 3. engine or of a windlass; used Double crank, *cp.* crank-pin; *cp.* sometimes figuratively, connecting-rod; *cp.* crank-shaft.

And one there was, a dresmer born, Who, with a mission to fulfil, Had left the Muses' haunts to turn The crank of an opinion-mill.

WRITTEN *Under the Beech tree*, st. 9.

2. A device for altering the direction of reciprocating motion; an angular lever; as, a bell-crank. 3. A paddle-like wheel made to be turned by hand in a box filled with gravel; used as a punishment in prisons. 4. An iron brace or support. 5. *Auto.* A handle with which the shaft of a motor vehicle is turned until the pistons reach the highest point of compression, and motion-producing explosions are initiated. 6. [Scot.] A calk or creeper. 7. [Colloq.] One who lacks mental balance, has a mental twist, or is mentally awry; a person given to caprices, crochets, or vagaries; a mildly affected monomaniac.

A crank is a man who does his own thinking.

*HOLMES Over the Teacups* ch. 7, p. 161. [L. M. & Co. 1891.]

8. A twist or turn. (1) A bend; turn, as of a road. (2) A fantastic turn of speech; quip; conceit. (3) A twist or perversion of judgment; whim. 9. [Prov. Eng.] A top-heavy vessel. 10. [Scot.] A crenking or grating sound; anything inharmonious. 11. One who is sick. [*ME. cranke, < crank, a. 4; cp. D. kranke, a little bend.*] **crank't; cen'ter-crank, n.** A double crank having two solid disks instead of arms; the disks are joined by a crank-pin to which the connecting-rod is attached. — *crank's axle, n.* 1. A shaft turned by or turning a crank. 2. A wagon-axle resembling a crank in curve. — *crank'bird, n.* The lesser spotted woodpecker of Europe (*Dryobates minor*). — *c-brace, n.* The ordinary form of carpenter's brace, in which the bit is turned by a crank. See illus. under BRACE. — *c-check, n. Mech.* The arm of a crank, or the support to which a crank-pin is attached. — *c-circle, n.* Same as *c-check*. — *c-shaft, n.* The flat circular plate to which a crank-pin is attached. — *c-offort, n. Mech.* The torque of a crank: produced either by or on the crank. — *c-hook, n.* A rod hooked to a crank, usually connecting with a treadle. — *crank'man, n.* A man who directs the operations of a crank, as of a machine. — *c-motion, n.* A mechanical movement employing the principle of the crank. — *c-path, n.* The circle in which the crank-pin of a revolving crank travels. — *c-pin, n. 1.* A cylindrical pin parallel to a shaft, borne at the outer end of a crank. 2. [Rare.] The squared end of a winding arbor or of a shaft. — *c-planer, n. 1.* A metal-planing machine the bed or tool-support of which is operated by a crank. 2. A machine for planing off engine-cranks. — *c-shaft, n.* A shaft that bears a crank. — *c-wheel, n.* Same as *WHEEL*, 7 (4). — *c-wheel, n. 1.* A disk crank. — *c-wheel, n. 2.* That part of a double crank which serves as a crank-pin to carry the connecting-rod. — *dlp-c, n. Engin.* A crank formed by bending an iron or steel rod into the shape desired, and not forged so. — *disk or wheel c.* A disk or wheel substituted for a crank-arm in a crank motion. — *double c.* A crank formed by cutting a disk and joining again by means of two crank-arms and a pin, or by bending a portion of a shaft so as to form a crank. — *overhanging c.* A crank in which the shaft-bearing is on only one side of the crank-pin. This kind of crank is used on the ends of shafts. [*crank or bend*]

**cranked, 1 kran'k; 2 cran'k, a.** Having or formed with a crank'er-y, 1 kran'k-er-y; 2 cran'k-er-y, *n.* The habits or peculiarities of one deranged upon a certain subject; extreme eccentricity.

**crank'ing, 1 kran'k'ing; 2 cran'k'ing, n. 1.** The grinding or hollowing out of a cutting-tool just behind the cutting edge. This gives the tool a tendency to spring back, and so prevent it from digging into the work.

2. The process of using a crank; specifically, the act of turning a crank to start an internal-combustion engine of an automobile. [*crank, v. l. t. 1.*]

**cran'dle, 1 kran'dl; 2 cran'dl, r. & n.** Same as CRINOLE.

**cran'dle, a. [Prov. Eng.]** Broken; weak; shattered.

**crank'ous, 1 kran'k'us; 2 cran'k'us, a. [Scot.]** Irritable; cranky. **crank'um, 1 kran'kum; 2 cran'kum, n. [Colloq.]** A caprice; vagary.

**crank'y, 1 kran'k'y; 2 cran'k'y, a. [CRANK'-Y-ER; CRANK'-Y-EST.]** 1. Given to whims and caprices; mentally unbalanced. 2. Crooked; bent. 3. Loose and rickety; shaky; liable to upset. 4. [Prov. Eng.] Sickly. 5. [Prov. Eng.] Self-assertive; confident. 6. Sprightly; giddy. — *crank'-ness, n.*

**crank'y, n. [CRANK'-Y-ES, pl.]** (North Eng.) A pitman. **Cran'tey, 1 kran'ty; 2 cran'ty, n.** A village in Surrey, England.

**Cran'ter, 1 kran'ter; 2 cran'ter, n.** Thomas (7/1489-1/1556), an English Protestant divine and reformer; Archbishop of Canterbury; burnt by Mary I. introduced in Shakespeare's *Henry VIII*.

**cran'nage, 1 kran'nag; 2 cran'nag, n.** The total number of crans or barrels; used in herring-fishing.

**cran'nled, 1 kran'nld; 2 cran'nld, a.** Full of cranries, chinks, or fissures.

Flower in the crannied wall, I pluck you out of the cranries.

TEXTORSON Flower in the Crannied Wall I. 1.

**cran'nog, 1 kran'nog; 2 cran'nog, n.** An ancient lake-dwelling

*Asellus*, *Cambarus*, and *Astacopsis*; ns, the common European crawfish (*Astacus fluvialis*); the large Aus-

Greek Crater of Red-figure Pottery.

abstract of the Tridentine declarations, and, since 1877, an acceptance of the definitions of the Vatican council.—*creedal*, *a*. [*Rare*] Of or pertaining to a creed.—*creed'*

less, n.—creed/less-ness, n.—creed-n'l-o-ry, n. [Rare.] Knowledge of creeds.—creeds'man, n. A believer in a creed.  
Creede, 1 krid; 2 erēd, n. A silver-mining town, county-seat of Creedmoor, 1 krid'mūr; 2 erēd'mūr, n. A village in Nassau county, N. Y.; place of former international contests in rifle-shooting.  
creek, †. n. To creek.  
creek, 1 krik; 2 erēk, n. 1. A small inlet, bay, or cove; a recess in the shore of the sea or of a river.

*Crecks that bore the salted sea* To pleasant inland farms.  
Written *With of Wenham* pt. ii, st. 31.  
2. [U. S.] A tidal or valley stream between a brook and a river in size. 3. [Eng.] A small seaboard town. 4. A narrow strip of land, as between mountains, having the general outline of a creek. 5. A winding bend. 6. A trick; stratagem. [*< AS. cressa, orig. bend or turn; cp. Sw. dial. cressa, bend of the arm, Ice. krik, nook.*] creek, †. creek/ehin, n. The horned date. See *pact*.—c. duck, n. [Local, U. S.] The gadwall.—creek/fish, n. [Local, U. S.] The chub-sucker.—c. gum, n. Any one of several varieties of Australian eucalyptus, as *Eucalyptus tumida*, *E. rostrata*, etc.—c. maple, n. The silver maple. See *maple*.—c. nettle, n. A North-American Pacific coast nettle (*Urtica holosericea*), growing generally along streams.—c. sedge, n. Same as THATCH GRASS.—c. staff, n. A variety of marsh- or salt-grass (*Spartina polystachya*) found in the United States chiefly near inlets of salt water: used for thatching. c. thatch.—creeker, n. [Local, U. S.] The spotted sand-piper.—creeky, n. Full of, abounding in creeks; winding.

Creek, 1. *Am. Hist.* One of a powerful tribe of the Muskhogean stock of North-American Indians, who once occupied a great portion of the States of Georgia and Alabama. The Creeks are now among the most orderly citizens of Oklahoma. See *AMERICAN*. Musk'uk. 2. A county in Oklahoma.—Creek, n.

creel, 1 krid; 2 erēl, n. 1. A willow basket, especially a flat-sided one suspended from the back and used mostly by anglers for carrying fish. It receives its name from the great horse-panniers or back-borne baskets in which fish, peat, etc., used to be borne inland from the eastern coast of England. 2. A cage of wickerwork for catching lobsters. 3. [New Eng.] A frame on which sheep are slaughtered. 4. A frame in a spinning-machine which holds the bobbins containing slubbings or rovings. [*< Gael. cradhleach, cradle.*] crall, n. 1. [Scott.] To put in a creel; also, to submit to creeling. 2. To catch (a fish).  
creel'er, 1 krid'er; 2 erēl'er, n. A person who attends to spinning-creels, changing empty for full ones.

creel'ing, 1 krid'ing; 2 erēl'ing, n. [Scott.] An old-time festivity following a marriage, when the young men would each in turn carry round a creel or basket of stones while the girls pursued, the one who caught the fugitive being kissed by him.

creem, 1 krim; 2 erēm, v. I. 1. [North Eng.] To place stealthily; pass (something) secretly from one to another; hide. 2. [S. W. Eng.] To squeeze; hug. 3. To crush; break; shatter. II. 1. To feel chilly; shiver, as with cold or weakness. [*< AS. criman, press;—creem, n. A chill; shiver.—creem'y, a.*]  
creen, 1 krin; 2 erēn, n. [Local, U. S.] Same as CREEN.—on the creen (Dial., U. S., or Obs.), apt to be turned in any direction.

creep, 1 krip; 2 erēp, v. [CREEP; CREEP'INO.] 1. To move with the body close to or touching the ground, as a short-legged insect, a crouching beast, or a serpent. 2. Specifically, to crawl with slow movements; hence, figuratively, to move slowly or imperceptibly; as, the boat creeps along the shore; time creeps on. 3. To crawl on hands and knees, as an infant. 4. To move secretly or stealthily, as to escape detection or prevent suspicion; gain admission unobserved; as, errors creep in. Here will we sit, and let the sounds of music creep in our ears.  
SHAKESPEARE *Merchant of Venice* act v, sc. 1.

5. To act or move with abject humility; exhibit servility; cringe. 6. To have a sensation as of contact with creeping things; feel creepy; as, it made my flesh creep. 7. To grow along a surface or support; as, creeping plants. For specific botanical sense, see CREEPER. 8. To slip out of place; as, a sleeve creeps up the arm, or a belt creeps on a pulley, or quicksilver on a mirror creeps. 9. To effloresce, as a salt in a voltaic cell. 10. *Naut.* To drag with creepers. 11. *Railroad.* To move along the line of length: said of the rails of a track. 12. *Mach.* To slip on the pulley: said of a belt or rope. It is caused by contraction on the slack side. [*< AS. creopan.*] SYN: see LINOZE.—creep/shole, n. An animal's underground retreat or hiding-place; hence, figuratively, an eluding shift; subterfuge.—c. mouse, a. Quiet as a mouse; sly.

Here are *creep-mous* manners; and thievish manners.  
DENISON *Concord of Life*, p. 147. [N. M. & Co. 1888.]  
creep, 1. The act of creeping. 2. *pl.* A nervous sensation as of insects creeping on the flesh. 3. In mining, the rising of the floor of a gallery, due to the slow movement of rocks into the excavated space. 4. *Geol.* A slow downward gliding of loose pieces of rock, due to atmospheric changes or the action of ground-water. 5. [Rare.] A slow movement or slight stir. 6. Same as CREEPER, n., 5 (1). 7. An arch or tunnel-like opening; especially, one used by animals.—crnst'-creep, n. *Geol.* A gradual movement of the crust of the earth along the course of some fault under compressive strain.—tangential c. (*Geol.*), the movement of strata laterally, resulting from contraction and expansion.

creep'er, 1 krip'er; 2 erēp'er, n. 1. One who or that which creeps; any creeping thing. 2. *Bot.* A plant growing just upon or beneath the surface of the ground or up perpendicular surfaces by sending out short rootlets from the roots. Specific: (1) The Virginia creeper. (2) The hedge hindwood. (3) Wild balsam popple.  
The frost-touched creepers bleeding fall.

W. W. STORY *Autumn* pt. 6.  
3. One of a breed of domestic fowls having very short legs and therefore a slow movement in walking. 4. A small bird, adapted for creeping about the trunks and branches of trees. (1) A certhioid bird with stiff-pointed tail-feathers; as, a wall-creeper (*Tychodroma*). *Certhia familiaris* is the common European creeper, with several American varieties, as the brown-creeper (*americana*, etc.). (2) One of various slender-billed small American warblers; as, the black-and-white

creeper (*Mniotilta varia*), or the pine-creeper (*Dendroica rigor*). (3) A cerebid, the gnatcatcher or honeycreeper. (4) A South-American dendrocolapine, or tree-creeper. 5. *Mech.* (1) A grapple used for dragging the bottom of a pond, harbor, or the like: usually plural. (2) An iron with sharp points attached to the boot to avoid slipping (a) in climbing a tree or pole, or (b) in walking on ice. (3) The iron bar that connects a pair of andirons. (4) *pl.* Small fire-dogs placed between large andirons. (5) An apparatus for slowly conveying material in, or from a machine, as (a) an advancing spiral conveyor inside a cylindrical grain-screen, or (b) an apron for feeding wool fibers in a carding-machine; creeping-sheet. (6) [Local, U. S.] A low iron skillet with short legs; a spider. (7) [Priv. Eng.] A low clog, or patten. 6. *Angling.* The stonefly larva. 7. A creeper—creeper-chain, n. *Mining.* An endless chain fixed with trips or hooks for horizontal or oblique traction of cars.—Balañal c., a small climbing plant of the Rajasthan hills of India, the jetea (*Marsdenia tenacissima*), bowstring c.—[Specified fowl.]  
creep'el, 1 krip'el; 2 erēp'el, n. [Local, U. S.] A small creeper, n. [Scott.] A low stool. creep'el-chair, n. creep'l-ness, 1 krip'l-ness; 2 erēp'l-ness, n. A creepy sensation.

creep'ing, *pr.* 1. Growing along the surface of the ground or just beneath, as certain plants. 2. Moving along slowly and almost imperceptibly, as certain insects.—creep'ing-char'le, n. 1. Ground-ivy (*Nepeta glehoma*). 2. The mossy stonecrop (*Sedum acre*). c. Jack, n. 1. Moneywort (*Lysimachia nummularia*). 2. The wild balsam-apple (*Echinops lobata*). 3. The reflexed stonecrop (*Sedum reflexum*). 4. The club-moss, *Lycopodium datatum*.—c. sailor, n. *Bot.* 1. The stonecrop. 2. The strawberry or beefsteak saxifrage.—c. wheat-grass, same as COUCH GRASS.

creep'ing, 1 krip'ing; 2 erēp'ing, n. 1. The act of moving close to the ground or slowly. See CREEP, v. 2. Time-lag of magnetism. See under *time*. 3. Called also viscous hysterisis. 4. *Elec.* The sliding or vacillation of an unloaded meter or other instrument caused by some gradual change in its suspension or by inaccuracy in its adjustment. 4. *Geol.* Same as CREEP, v. 5. *Sport.* Same as STALKING. 6. *Meteor.* The sluggish adjustment of the index of an aneroid barometer to the correct reading. It results from abrupt changes of pressure.—creep'ing-disk, n. *Zool.* That part of the body upon which a mollusk or other ground-creeping invertebrate rests and moves; in other words, the foot.—c. insect, n. The creeper of a carding-machine.—c. sickness, n. See *ERGOTISM*.

creep'ing-ly, 1 krip'ing-ly; 2 erēp'ing-ly, *adv.* By creeping movements; slowly.

creep'y, 1 krip'y; 2 erēp'y, n. 1. Feeling as if something were creeping over the skin; shivering; especially, chilled with fright. 2. Characterized by creeping.

creepy, n. [Ir.] Same as CREEPIE.  
creese, 1 kris; 2 eris, n. [CREESIN; CREES'ING.] To wound with a creese.  
creese, n. Same as KRIS. [*< Malay kris, dagger.*] creese; creese's; kreese; kris.  
creesh, 1 kresh; 2 erish, n. [Scott.] Grease. creesh't, n. 1. *Ir.* To grease. 2. To grease one's loaf, to grease one's palm; bribe.—creesh'y, n. Greasy; fleshy.

Cre'fld, n. Same as CREFIELD.

Creigh (n.) 1 kraig or kraig'tan; 2 Craig or Craig'tan, n. Man-dell (7/1843-1/1901). An English divine and historian; bishop of London; *History of the Papacy*, etc.

Crell, 1 krel; 2 erēl, n. A town in Oise department, France.

A wire crossing another. 2. One of two fine threads or strands, as of a spider's web, crossed in the center of the focal point of an optical instrument to define the exact point to which the readings of the circle or micrometer refer. **CROSS**, 1 *kros*; 2 *crös*, *n.* 1. The emblem of Christianity, a symbolical representation of the instrument of punishment on which Christ died. The cross was used as a gibbet, but it is now the highest name we have, because He hung on it. **ROBERTSON** *Sermons* third series, ser. x, p. 521. **Inl.** 1870. 2. An ancient instrument of torture on which criminals were fastened and exposed until they died from exhaustion: generally made of two timbers, an upright set into the ground and a crosspiece. 3. A sacred or mystic symbol in many ancient religions, supposed to have been originally emblematic of the union of the active and passive elements in nature. By one of the many strange coincidences in this meeting of two grades of culture so widely sundered, the cross was not only a Christian but also a Mexican symbol. **FISKE** *Discovery of Am. vol.* ii, ch. 8, p. 250. **Inl.** x, a. co. 1892. The cross as a sacred or mystic symbol dates from remotest antiquity, and its use as an instrument of punishment is scarcely less ancient; but there was no connection between the two before Christianity. The symbolical cross, of many different shapes, may be resolved into four primitive forms: (1) The Greek cross found on Assyrian tablets, on Egyptian and Persian monuments, and on Etruscan pottery; (2) the crux decussata or oblique cross, vulgarly called St. Andrew's cross, no less common in ancient sculpture; (3) the Latin cross or crux immissa, found on monuments, coins, and medals before Christ; and (4) the tau cross, crux commissa, or patibulum, a mystic symbol of very ancient origin, probably a phallic emblem, thought by some archeologists to be the oldest form, the Greek cross being its double. (5) The crux onusta, the tau cross combined with a circle, as in the hands of Isis Osiris, and other Egyptian divinities, is the symbol of life and immortality. 4. That which resembles a cross or crucifix, as two lines crossing each other; as, he put n cross to his name. He can not write; but his cross is . . . bonered by Jews as well as Christians. **SCHILLER** *Piccolomini* tr. by Coleridge, act ii, sc. 13. 5. [C-] The crucifixion of Christ; the atonement. 6. [C-] The Christian religion; Christianity. 7. Something endured for Christ's sake; hence, any suffering; trial; tribulation; as, he bore his cross in silence. 8. *Arch.* A structure, often monumental and orate, in the form of or surmounted by a cross, erected in some public place for devotional or memorial purposes. The principal types are boundary, market, preaching, and memorial or monumental crosses. 9. A mixing of varieties or breeds of animals; as, Alderney and Jersey make a good cross. Many cases are on record showing that a race may be modified by occasional crosses if aided by . . . careful selection. **DARWIN** *Origin of Species* ch. i, p. 9. **Inl.** 1884. 10. The product of any crossing of strains; hence, humorously, anything that resembles or is intermediate between two other things; as, a cross between prose and poetry. 11. An old English coin stamped with a cross. 12. A pipe-fitting with two equal bores at right angles. 13. *Her.* (1) An ordinary produced by this

Cu-no'ni'-ce, 1 kiu'nīn-gē; 2 cū'nō-nī-sē, n. pl. Bot. A family of mostly tropical shrubs and trees of the order *Rosales*. There are 20 genera and several hundred species characterized by opposite (rarely whorled) leaves, simple or compound, and clustered flowers with perigynous stamens. Cu-no'ni'-a (t. g.).—cu-no'ni'-a-ceous, a.

cup, 1 kiu'p; 2 cūp, r. [CUPPEN, CUPPS; CUP'PING.] I. t. 1. To bleed by the cupping process. 2. Med. To hollow out like a cup; make concave. 3. To place in or as if in a cup.

She was still leaning on the gate with one foot on the lower rail and her chin cupped in the hollow of her hand. BART HARTZ *Cressch*, p. 3, p. 51. [H. M. & Co. 1889.]

4. [Rare.] To give wine or liquor to, especially to make drunk; as, to cup a person with wine. II. i. 1. To grow into or take cup-like form. 2. Golf. To indent the ground when aiming to hit the ball. 3. To extract blood by the cupping process. 4. To fit over the concave surface of a contiguous leaf, as of tobacco. 5. To drink.

cup, n. 1. A small drinking-vessel; especially, a vessel of chinaware or pottery, used with a saucer in serving common beverages, as coffee or tea; sometimes limited, in a vessel having a foot or base, to the bowl. Cups may be made of earthenware, metal, celluloid, or paper. 2. The contents of a cup; cupful; as, a cup of milk, etc. 3. The ornamented vessel used in administering the sacramental wine; also, the wine itself. 4. Figuratively, any unusual affliction or pleasure; lot; portion; as, "the cup which the Father hath given me, shall I not drink it?" John xviii, 11. 5. Intoxicating drink, or the habit of drinking; as, slaves of the cup. 6. A prize, usually a vase, or a cup-shaped vessel of gold or silver or other valuable plate, contended for in races; as, the Ascot cup.

So we have won the Goodwood cup. HOLMES *Autocrat* ch. 1, p. 37. [H. & Co. 1871.]

7. Med. A cupping-glass or -vessel; also, a vessel of definite size, generally four ounces, to receive and measure venous blood in bleeding. 8. A cup-shaped cavity, as in a boiler-plate, to increase its beating area. 9. Golf. A small hole or cup-like depression in a course; also, a hole especially made in the putting green into which the ball is played. 10. Bot. (1) In ascomycetous fungi, an apothecium or discocarp. (2) In gastromycetous fungi, the basal portion of fructification. 11. The encircling jacket-like portion of a telescopic gas-tank filled with water and acting as a joint between sections. 12. Any cup-shaped object; as, the cup of an acorn or a flower; an oil-cup, etc.

While the rough Bark, in circling mazes rolled,  
Forms the green cup with many a wrinkled fold.  
ERASMUS DAWSON *Botanic Garden*, Econ. of Veg. ch. 4, l. 474.

13. A beverage made with wine, generally iced, and with flavoring herbs, fruits, and vegetables, notably cucumbers, as, claret-cup, champagne-cup, etc. 14. [C] Astron. The constellation Crater. See CONSTELLATION. [*L. AS. cuppe, < LL. cupa, cup, L. cupa, tub.*] cupet.

anathema cup, a silver cup presented by the bishop of Winchester to Pembroke College, Cambridge, bearing the hall-mark of 1451 and the inscription *qui alternatim anathema*, "who sells (this cup) shall be accursed."—cup and ball, see BALL.—cup-and-ball joint, a ball-and-socket joint.—cup and cannon companion, from the close resemblance of the cup to the barrel of a cannon.—cup-and-bowl, Med. A device at the top of a blast-furnace to permit charging without undue escape of gases.—cup-and-gutter system, a method of cutting gutters in a rubber-tree to permit of the rubber flowing into cups at its base.—cup-and-ring, n. Same as CUP-MARKING.—cup-and-rill, n. A cup-shaped strengthened piece on the inside of a cartilage.—cup-and-rubber, n. 1. One who serves the wine-cup or other liquors to guests at a feast. 2. Formerly, an attendant, or officer of the household of a prince or noble, whose office it was to fill and hand the cups to his master and to guests. For I was the king's cupbearer. NEH. i. 11.

—cup-break, n. A fracture having the shape of a cup; sometimes produced when a metal test-piece is broken in a testing-machine while determining the tensile strength.—cup-breaker, a kind of planer cut; so named because, as originally made, most of the ingredients were measured by cupfuls.—cup coral, 1. A cyathophyllid. 2. Same as CORALLITE. 1.—cup-drum, n. A chain-shave provided with depressions into which the alternate links of a chain sink.—cup-escentheon, n. A metal door-plate, sunk in the door, provided with a cup-shaped socket for holding the keyhole, knob, etc.—cup-flower, n. A slender, annual, twining herb (*Grammatocera volubilis*) of the loasid family (*Loasaceae*) from Chile.—cup-ingus, n. Same as CUP-MUSHROOM.—cup-gall, n. A cup-shaped gall found on oak-leaves, containing the larva of a small fly (*Cecidomyia speciosa*).—cup-head, n. The head of a bolt or rivet of rounded shape.—cup-headed, a. cup-head, n. Low land skirting the rivers in British India; the banks of a river.—cup-leath-er, n. A cup-shaped leather washer, as on the bucket of a pump.—cup-lichen, n. A species of *Closteria*. cup-moss; cup-marking, n. A semispherical or cup-like marking sometimes surrounded by a ring, spiral, or series of concentric rings; found on the stones and burial-places of the stone and bronze ages.—cup-marker, n.—cup-mushroom, n. A fungus with its spore-bearing surfaces exposed, especially of the genus *Peziza*.—cup o' sneeze (Prov. Eng.), a pinch of snuff.—cup-plant, n. A stout herb (*Siphium perfoliatum*) of the aster family, from 2 to 8 feet high, of the western and southern United States; named from the cup formed around the stem by the upper pair of perfoliate leaves.—cup-plate, n. A glass or china plate into which a teacup after the tea was poured into a saucer to cool; formerly used.—cup-sculpture, n. Same as CUP-MARKING.—cup-shake, n. A division or opening between two concentric layers of timber.—cup-shot, a. [Slang.] Overcome by the cup; drunk.—cup-shrimp, n. [Local, Brit.] A grade of shrimp so small as to be sold by measure (a caps).—cup-sponge, n. One of various sponges, as the Turkey cup-sponge (*Spongia adriatica*); toilet-sponge.—cup-stone, n. Archaic. A stone in whose surface cup-shaped cavities have been wrought.—cup-tossing, n. [Ir.] Divination from tea-leaves turned on to a saucer from a teacup.—cup-washer, n. Med. A concave washer used to bind and secure one of softer material, as rubber or leather.—dorsal cup (*Echin.*), the crinoid calyx before the origin of the free arms.—Elijah's cup, in the Passover service, a cup filled with wine set ready for the Prophet Elijah when he appears on earth to herald the coming of the Messiah.—forefather's cup, n. Same as FITCHER-PLANT.—gemma-cup, n. Bot. A liverwort-capsule.—Hebe's cup, a sweetened punch made of brandy, soda, and wine, and flavored with cucumber and lemon.—In his cups, intoxicated; also, in the act of drinking.—Jugal cup (*Ornith.*), the socket which receives the articular facet of the jugal.—king's cup, lemon sherbet; lemonade.—polishing-cup, n. Dentistry. A soft rubber cup-shaped device having a corrugated cavity, used for polishing.—standing cup, see HANAP.—to drain the cup to the dregs, to experience any emotion, as sorrow or disappointment, or indulge any pursuit, as dissipation, to the utmost extent.—Vaphio cups, two golden vases discovered at Vaphio, Greece, cmased with rustic scenery, probably the work of Mycenaean artists.

Cu'par, 1 kiu'pār; 2 cū'pār, n. A manufacturing town; capital of Berkshire, Scotland.

Cu'par-an'gus, 1 kiu'pār-āng'us; 2 cū'pār-āng'ūs, n. A burgh in Perthshire and Forfarshire, Scotland.

cup'board, 1 kiu'bōrd; 2 cū'bōrd, n. [Rare.] To hoard in or gather into a cupboard.

cup'board, n. 1. A closet, usually with shelves, for keeping edibles; a larder. 2. A closet or cabinet with shelves for dishes and tableware. 3. The fine ware, as silver, glass, china, etc., kept in a cupboard. 4. A single shelf or board used for cups, dishes, and tableware; a buffet or sideboard. cup'bord',—cupboard love, selfish love.—to cry C. [Colloq.], to manifest one's hunger.—cup'board-y, a. Like a cupboard.

cup'break', cup-cake, etc. See under CUP, n.

cu'pel, 1 kiu'pel; 2 cū'pel, r. [CUPPEL or CUPPELLE; CUPPELING or CUPPELING.] To separate from base metals by cupellation. cu'pel-late',—cu'pel-er, n. One who refines by cupelling. cu'pel-let, r.

cu'pel, n. A shallow, absorbent vessel, usually of bone-dust, used in assaying by cupellation. [*< F. coupelle, < LL. cupella, dim. of cupo; see CUP; cup'pel; cu'pel-lu'la'tion, 1 kiu'pe-lē-shān; 2 cū'pe-lū-shōn, n.* The process of separating gold or silver from lead or other impurities by the use of a cupel, or in a cupelling-furnace. In assaying, the alloy containing lead is placed in the cupel and subjected to a high heat in a current of air, when the lead and metallic impurities are oxidized and allowed to sink into the absorbent cupel, leaving the unoxidizable gold and silver. In the cupelling-furnace the hearth is less absorbent, and the litharge that forms is skimmed off, or runs off, from the top.

cup'pel-etch'oon, n. See under CUP, n.

Cu'pes-i-dē, 1 kiu'pes-i-dē; 2 cū'pes-i-dē, n. pl. *Antom*. A family of sericornian insects with transverse from coxae, head constricted behind, and smooth eyes. Cu'pes, n. (t. g.) [Perhaps < *L. cupes, dainty.*]—eu'pes-id, o. & n.—cu'pes-old, a.

cup'flower', n. See under CUP, n.

cup'ful, 1 kiu'fūl; 2 cū'fūl, n. [-fūls, pl.] The contents of a cup, or the quantity held by a cup; as a measure, a half-pint.

cup'gall', n. See under CUP, n.

Cu'ph-e-a, 1 kiu'pē-a; 2 cū'pē-a, n. Bot. 1. A genus of mainly tropical herbs and shrubs of the loosestrife family, with opposite, sometimes whorled leaves and flowers characterized by an elongated, tubular calyx. 2. [c-] Any plant of this genus. [*< Gr. kyphe, hump.*]

cup'head', n. See under CUP, n.

Cup'hic, a. Same as CURIC.

eu-pl-a', 1 kiu-pl-ā; 2 cū-pl-ā, n. A species of yellow ants eaten by the Maravatano and Margueritare tribes of Brazil. HUMMELT. [Tupl.]

Cup Coral (*Diosmilitia lymant*)

Cuneiform Characters, from the inscriptions of Hammurabi.

A Dentist's Polishing-cup.

Curling-stone. The game of curling is played. It is rounded and flattened, with a smooth bottom and with a handle fixed in the upper surface. Its weight varies from 7 to 70 pounds, depending upon whether it is made of wood or iron. — *c. stones*, *n. pl.* A hinged form of curling-stone resembling a pair of pincers. — *curling-ly*, *adv.* In a curling manner.

curly, 1 kūr'l; 2 cūr'l; a. Having curls, coils, or eddies; pliable; kinky; wavy. — curly-grass, n. A small fern (*Schizaea pusilla*) with slender linear fronds, found in the pine-harrens of New Jersey, in Newfoundland, and Nova Scotia. — c-head, n. [U. S.] The silky elatias. — curly-pate, n. A curly-headed person, especially a child. — c-pated, a.

cur-mil, 1 kūr'm; 2 cūr'm; n. Same as curmion.  
cur-mudg'eon, 1 kār-mu'g; 2 cur-mudg'eon, n. One who misleads, grasping, or churlish; origin unknown, but perhaps derived from cur, a mean, ill-disposed person.

A rich old curmudgeon, who was noted for owning many houses and being a grumpy landlord. *Invited Alhambra, Adventure of the Mason p. 142, lo. p. 1865.*

— cur-mudg'eon-ly, a. Having the disposition of n curmudgeon; churlish; grasping.

cur-mur'ring, 1 kār-mur'ing; 2 cur-mur'ing, n. [Scot.] A low murmuring or grumbling sound; especially, the rumbling of the bowels caused by wind. [Imitative.]

curra, 1 kūr'n; 2 cūr'n, n. [Scot.] 1. A grain of corn; any grain. 2. A very small portion; an indefinite number. — cur'n-ey, a. cur'n-ey.

curra-berry, 1 kūr'n-ber'y; 2 cūr'n-ber'y, n. [Rus.] 1-iz; 2-iz, pl. [Prov. Eng.] A currant.

cur'nock, 1 kūr'nek; 2 cūr'nek, n. A variable dry measure formerly used in the west of England and in parts of south Wales. [*W. cynnog.*] car'nock.

cur'o, 1 kūr'o; 2 cūr'o, n. [E. Afr.] The water-buck.

cur'pin, 1 kūr'pin; 2 cūr'pin, n. [Scot.] A fowl's rump. — cur'pon, a.

cur'ple, 1 kūr'pl; 2 cūr'pl, n. [Scot.] Buttocks; crupper.

cur'ra, 1 kūr'ra; 2 cūr'ra, n. [Prov. Eng. & Scot.] To coo, or purr, or boot like an owl.

cur'ra, n. [Prov. Eng. & Scot.] To crouch.

cur'rack, 1 kūr'rah; 2 cūr'rah, n. [Scot.] 1. A coracle. 2. [Scot.] A wickerwork cart; also a pair of panniers made of wood, slung over a horse to carry bulky loads. 3. A small wickerwork boat covered with hides, formerly used in Scotland and Ireland. — car'rack; car'rag; cor'rag; cur'rack; cur'ragh; cur'rogh.

Cur'ragh, 1 kūr'rah; 2 cūr'rah, n. A plain in Kildare county, Ireland; a SSS acre; British military camp; race-course.

cur'ra-jong, 1 kūr'-jon; 2 cūr'-jon, n. [Austral.] Any one of various Australian and Tasmanian fibrous plants, as the brown curragal (*Commersonia echinata*), of the cola-nut family; green c. (*Hibiscus heterophyllus*), and Tasmanian c. (*Platanthus sidosides*), of the mallow family.

Cur'ran, 1 kūr'an; 2 cūr'an, John Philpot (1750-1817). An Irish barrister; orator and wit; member of the Irish House of Commons; master of the rolls in Ireland.

cur'ra-ne, 1 kūr'ne; 2 cūr'ne, n. A man's boat for use at sea. [*Sp. Ir. Gael. currahan, boat.*]

cur'rant, 1 kūr'ant; 2 cūr'ant, n. 1. A small round berry of any species of *Ribes*, a genus of the saxifrage family (*Saxifragaceae*), without prickles and growing in racemose clusters; also, a shrubby bush producing it.

The best-known species are (1) the red (*R. rubrum*), with its variety the white; (2) the wild (native) black (*R. fruticosum*); and (3) the cultivated black (*R. nigrum*); and (4) the golden, buffalo, flowering, or Missouri (*R. aureum*), cultivated for ornament.

2. A small seedless raisin imported from the Levant; called usually dried currant and Zante currant. 3. [U. S.] The fruit of any one of various shrubs or trees, as those of the genus *Cilicidia*; also, the shrub or tree bearing the fruit. 4. Same as NATIVE CURRANT. [*Gr. Corinthe, Corinth*, < *L. Corinthus*, < *Gr. Korinthos*, Corinth, whence they were brought.] currant.

— clove-cur'rant, n. The buffalo-currant. — cur'rant-bor'er, n. A larval insect that bores into the stem of currant-bushes, as a clearing moth (*Egretta tipuliformis*) or a cerambycid beetle (*Pseudocercus supernotatus*). — c-hush, n. [Austral.] The warrior-bush. — c-endropia, n. A moth (*Prionoxystus armatarius*), native of America, whose larvae feed on currant-leaves. — c-ly, n. A trypetid fly (*Egocera canadensis*) whose larva lives inside red and white currants and causes premature ripening and decay. — c-gall, n. [Brit.] A small globular gall of the European oak, formed by a cynipid (*Spathegaster baccharum*). — c-moth, n. A geometrid moth, *Abraxas or Euclithe ribearia* in the United States, *A. grossulariella* in England. — c-scale, n. A white hark-louse (*Pulvinaria ribearia*), native of Australia. — c-worm, n. A larval insect destructive to currants, as a European saw-fly (*Nematus ventricosus*) introduced into the United States, a currant-moth (*Abraxas or Euclithe ribearia*), and an American saw-fly (*Pristiphora grossularis*), all destructive to the leaves, and a fly, called the c. fruit fly (*Egocera canadensis*), destructive to the fruit. — Indian c., see INDIAN CURRANT. — c-Austral, any one of various trees or shrubs or their red currant-like fruits; as (1) any one of several species of *Coprosma*, especially *C. ballardii*; (2) any one of several species of *Leptomeria*, broom-like shrubs of the sandalwood family; (3) the cockatoo-bush or blueberry (*Myoporum serratum*); (4) a shrub (*Leucopogon richii*) of the epacrid family, common in most parts of Australia; — plain c. *A. Australis*, the fruit of *Greigia polygama*, a tree of the liliaceae family (*Tillandsia*), or the tree.

cur'ron-ey, 1 kūr'en-s; 2 cūr'en-sy, n. [Cres.] 1-iz; 2-iz, pl. 1. The accepted and current medium of exchange of values; that which is in general use and circulation, as money, as coin or bank-notes, or government notes; also, the total amount in circulation; properly not including bank-checks.

It was apparent that the volume of currency in the country was not sufficient for the enormous requirements of the public expenditure.

NICOLAY AND HAY Lincoln vol. vi, ch. 11, p. 230, 1c. co. 1890.

2. The state of being current; general circulation; as, the currency of paper money; the currency of a rumor.

3. Current value or estimation; general esteem or standing; as, to gain currency without desert.

Even the entire world of currency in the world, it would still be abundantly worth while to continue to enjoy it by oneself. MATTHEW ARNOLD *Essays in Criticism* second series, essay i, p. 55. [MACM. 1885.]

4. Formerly, natives collectively of the Australian colonies. 5. Continuous flow, as of a stream; glibness of speech. [*LL. currentia*, < *L. curren(-i)*; see CURR-ENT. SYN: see MONEY.

— asset currency (Finance), currency issued under the security of general assets, merchants' bills, etc., as distinguished from that secured by deposits, as of government bonds. — c. principle or doctrine (Finance), the principle that banks should be allowed to issue notes against only bullion or coin. It was made a feature of the act of Parliament of 1844 that regulated the note issue of the bank of England. This principle is opposed to the banking principle or doctrine under which bank-notes are held to be a form of credit and permit of an elasticity of currency. — divisional c. (Finance), currency including the small fractional coins. — emergency c. (Finance), currency devised for immediate relief in periods of financial panic or anxiety, and restricted to the payment requirements of the occasion, as the paper money or tokens in a besieged town. — flexible c. (Finance), currency which is regulated by existing business requirements, being made to increase or decrease in accordance with their demands. — elastic c., — fractional c., money or coins of any denomination less than the standard monetary unit; in the United States, less than a dollar. — paper c., paper issued on the authority of a state and designed to serve as money; government notes and bank-bills issued under authority of law.

cur'rent, 1 kūr'ent; 2 cūr'ent, a. 1. Passing from hand to hand or from mouth to mouth, as money or as news; circulating or circulated; generally accepted as valid, authentic, or true. 2. Said of gold's laid up in sunsets safe from thieves; And all our current silver's in the stars.

H. S. MORRIS *To Poverty* 1. 10.

2. In actual progress, or belonging to the time immediately passing; as, the current month; the current number of a periodical. 3. Math. Differing from point to point; as, current lines. 4. [Archae.] Moving; running; flowing. [*OF. currant*, < *L. curren(-i)*, ppr. of *curro*, run.]

SYN: see AUTHENTIC; POPULAR. — to pass current, to be generally accepted or recognized.

cur'rent, n. 1. A continuous movement in the same direction, as of a fluid; flow; stream; also, the fluid that is in motion; as, a current of air or water.

Currents of fragrance, from the anemones.

BRYANT *The Child's Funeral* st. 4.

Specific: (1) Such a movement in the midst of a great body of fluid at the same kind; as, ocean currents; atmospheric currents. (2) Elec. A molecular disturbance or activity assuming a directional form in a closed conductor or between bodies in different states of electrification connected by a conductor. It is due to the effort of nature to equilibrate the potential between adjacent bodies or of some of bodies. While popularly known as a current, it is rather a condition or a series of successive conditions into which material substances are thrown by disturbances of molecular equilibrium proceeding from chemical, physical, and mechanical causes. A charged particle placed in a field of force tends to move toward that end of the field which is oppositely charged, and, if a series of conducting particles or molecules are held in such a way as to be immovable, the charge tends to make its way through them in the direction they would take if at liberty, which tendency constitutes the current. The rate of current flow is measured in amperes, and is inversely as the resistance and directly as the difference of potential. The quantity of current delivered depends upon the intensity and the time in which it nets. Its unit of measurement is the coulomb. See AMPERE, COULOMB, and OHM'S LAW, under LAW.

2. Any connected onward movement; course; tendency; progression; a course of progress, especially as governed by a tendency; as, the current of time, events, opinion.

Isolated from the great currents of public life which flow through the telegraph and the press. HAMSTON *Intellectual Life* pt. x, letter viii, p. 377, in. anno. 1875.]

3. The degree of pitch given to a roof to make the water falling upon it run off in a certain direction.

SYN: course, drift, flow, flux, stream, tide.

— ne'lon cur'rent, n. *Physiol.* An electric current developed in a muscle or nerve under stimulation. — active c. (Elec.) That component of an alternating current which is in phase with the electromotive force: opposed to *reactive current*. — after-current, n. *Electrotherapeutics.* An electrical current produced in muscles and other animal tissue after they have been subjected to a galvanic current flowing in the opposite direction. — alternating c., see ALTERNATING. — c. alternative (Electrotherapeutics), n. An alternating current used in Germany; equivalent to 1.11 amperes. — average c. (Elec.), the time average strength of an alternating current. — axial c. (*Physiol.*), the central portion of the blood-stream in the small vessels, which is chiefly occupied by the red corpuscles, the leucocytes traveling near the walls. — Benguela (Oceanography), a cold current that flows northward along the west coast of South Africa. — black c. same as JAPAN CURRENT. — black c., n. *Physiol.* The positive electric current induced in living tissue in response to mechanical or electrical stimulation. — Brazil c. (Oceanography), a warm current flowing southward along the Brazilian coast. — cable c., n. *Elec.* The current formed in a broken submarine cable between the copper wire and the iron sheath, which acts as the positive terminal of a battery with the sea-water as the fluid. — celluliferous c., n. *Physiol.* A nerve-current which flows from the body of a neuron along its processes. — cellulipetal c. (*Neurophysiol.*), a nerve-current which flows toward the body of a neuron along its processes. — charge c., n. *Elec.* A current passing between the outside and inside coatings of a charged and uncharged

jar when they are placed in connection. — charging c., n. *Auto.* The current used to charge the accumulator of an electric vehicle. — Chilean c., same as PERUVIAN CURRENT. — commuted c. (Elec.), a current that at the point of generation is alternating, but is changed to a continuous current by a commutator. — connectifal c., a vertical current in gases and liquids resulting from the variation in temperature at the different levels. — constant c. (Elec.), a direct or alternating current whose effective intensity is constant. — continuans c. (Elec.), a direct current whose intensity is uniform. — c-bedding, n. Same as FALSE BEDDING. See BEDDING. — c-bottle, n. *Oceanography.* A bottle cast into the sea for the purpose of making observations on the direction and speed of currents. In such bottles is sealed a statement showing their purpose and requesting their return. — c-collector, n. *Elec.* Any mechanism, as a brush or a trolley, by means of which current is carried from moving to fixed portions of a circuit and reversely. — c-density, n. *Elec.* The quantity of current passing in any part of a circuit, as compared with the area of cross-section of the conductor at that point. — c-intensity, n. *Elec.* Current-density, as defined by the quantity of electricity passed by such current in a given time. Its practical unit is the ampere. — c-meter, n. 1. *Elec.* An instrument, as a galvanometer, for measuring the strength of an electric current. 2. A device for determining the velocity of flowing water, as in deep-sea currents. — c of Injury (Elec.), the current generated at the site of an injury to a muscle or nerve, which becomes negatively electrified in relation to the surrounding uninjured surface. — currents of motion (Electrotherapeutics), currents set up in living nerves or muscles after sudden contraction or relaxation. — currents of rest (Electrotherapeutics), the electric currents set up when two portions of an unstimulated nerve or muscle are placed in connection. Their existence is not universally accepted. — c-wire, n. *Hydraul.* A water-wheel driven by an open stream of water, as distinguished from one in a race or penstock. — derived c. (Elec.), a current flowing through a derived conductor; a shunt current. — dielectric c. (Elec.), same as DISPLACEMENT CURRENT. — direct c. (Elec.), a current that is constant in direction, as distinguished from an alternating current. — direct induced c. (Elec.), the extra current produced on opening a circuit. See EXTRA CURRENT. — direct induced c. (Elec.), the current induced in a charged condenser or storage-battery. — displacement c. (Elec.), the theoretical current which flows through an insulating material or dielectric when an electromotive force is impressed upon it, producing displacement and later stress. — earth currents (Physics), light electric currents apparently traversing the earth's surface, but which in reality only exist in a wire grounded at both ends, due to small potential differences between the two points at which the wire is grounded. — eddy c. (Elec.), a current produced in a solid conductor, such as the armature or pole-piece at a dynamo or motor, which is wasted by conversion into heat. To obviate this loss armature-cores are often laminated. — energy c. (Elec.), same as ACTIVE CURRENT. — extra c. (Elec.), a current of very brief duration but great intensity, produced by electromagnetic induction at the moment of opening or closing a circuit. In the former case it is in the same direction as the latter in the opposite direction to the ordinary current. — Faraday c. (Electrotherapeutics), an induced or secondary alternating current such as that derived from a magneto-generator: opposed to *voltaic current*. — Foucault c. (Elec.), same as Eddy CURRENT. — Franklin c. (Electrotherapeutics), the current generated by an electrostatic machine. — galvanic c. (Electrotherapeutics), same as VOLTAIC CURRENT. — Guinea c. (Oceanography), a strong eastward flowing current along the Guinea coast in a direction contrary to the equatorial Atlantic current. — Hermann's demarcation c. (Elec.), same as CURRENT OF INJURY. — Humboldt c., same as PERUVIAN CURRENT. — idle c. (Elec.), wattless current; former name. — induced c. *Elec.* 1. The current produced in a conductor by varying the conditions of the field of force in which it is situated, as by movement. 2. A current produced by induction. It is in the opposite direction to the causative or primary current. — induced currents are reversed by closing a circuit whose direction is opposite to that of the producing current. See INDUCTION. — intermittent c. (Elec.), an interrupted direct current. — Inverse c. (Elec.), same as INDUCTED CURRENT. 2. — Japan c. (Oceanography), a current flowing from a point near the Bashi Islands northward to latitude 26°, where it divides, the main part washing the eastern shores of Japan and then the Aleutian Islands. — leakage c. (Elec.), a term formerly used for the exciting current of a transformer, that is, the very slight current passing through the primary circuit when the secondary circuit is open, owing to the counter-electromotive force developed. — local c. (Elec.), same as Eddy CURRENT. — magnetic c. (Elec.), magnetic flux: the total amount of lines of force passing through a magnetic circuit. — make and break c. (Elec.), a series of short and long pulses of short duration separated by momentary intervals in which no current flows. — marking c. (Telegr.), the current recording dot and dash symbols on the paper ribbon in the polarized receiver of Wheatstone's automatic telegraph. — molecular c. (Elec.), same as AMERICAN CURRENT. See AMERICAN. — muscle c., n. *Neurophysiol.* Same as CURRENTS OF MOTION. — nerve c. (Elec.), a current the direction of whose flow is periodically reversed and whose opposite wave-lengths decrease successively in the same ratio. — Peruvian c. (Oceanography), a very cold current flowing northward along the coast of Peru. — planktonic c. (Biol.), a current or stream of floating or swimming organisms in water. — polyphase c. (Elec.), a system combining two or more alternating currents of constantly different time phase. — Prolifer c. (Hydraul.), a current of water whose dynamic energy represents one wavelet. — power c., n. *Elec.* Same as ACTIVE CURRENT. — primary c. (Elec.), the current passing through the primary coil of any inductive device and giving rise to an induced current: any originating, as opposed to a derived or secondary, current. — pulsating c. (Elec.), a current whose intensity changes at fixed intervals, but whose direction is constant. — pulsating c., n. *Telegr.* A current that component of an alternating current which is in quadrature with the electromotive force. — rectified c. (Elec.), same as COMMUTED CURRENT: so called because the undulations of the sine curve representing an alternating current, which normally

extend above and below the zero line, are represented in this type of current as rectified, appearing as a series of short convex curves on the same side of the zero line.—reverse c. (*Elec.*), same as INVERTED CURRENT. 2.—rhythmic c. (*Elec.*), same as POLYPHASE CURRENT, especially one of three phases. rotating c. 1.—secondary c. (*Elec.*), an induced current.—spacing c. (*Elec.*), the current running in opposite direction to the marking current in Wheatstone's automatic telegraph and providing for the spaces between dots and dashes on the paper ribbon.—terrestrial currents (*Physic.*), same as EARTH CURRENTS.—Tesla c. (*Elec.*), same as OSCILLATING CURRENT.—undulatory c., a current the strength and direction of which changes gradually; distinguished from a pulsatory current, which changes suddenly.—voltaic c. (*Electrotherapeutics*), a current derived from chemical action, as from a battery: opposed to Faradic current.—wattless c. (*Elec.*), same as REACTIVE CURRENT.—working c. (*Elec.*), same as ACTIVE CURRENT.

—current-ly, *adv.* In a current manner; flowingly; commonly.—current-ness, *n.* 1. The state of being current; currency; especially, circulation or acceptance. 2. The quality of being flowing or smooth, as verse.

gradually increasing the curvature while decreasing the shock caused by inertia.—*crinkly c.* (*Math.*), a curve, such as Weierstrass's curve, which includes all the points in a given unit square.—*curve-adder, n.* A device for the automatic drawing of the sum of any two curves having any relations of period, amplitude, and phase.—*c. of a complex* (*Math.*), the curve enveloped by the lines lying in the complex and also in a plane (hyperplane).—*c. of buoyancy*, same as CURVE OF CROSS-SECTIONAL AREAS.—*c. of Carus*, the imaginary curved line that represents the pelvic axis.—*c. of comfort*, in climatology, a line connecting points which equally correspond to the degrees of temperature and moisture in the air with the same degree of human comfort for a given wind velocity.—*c. of cosines*, same as COSINOSIN.—*c. of cross-sectional areas* (*Naval Arch.*), a curve whose ordinates represent the cross-sectional areas up to a certain water-line for each point of the length.—*c. of decay*, a curve indicating the decrease in radioactivity of a substance, time being represented by one coordinate, the loss of radioactivity by the other.—*c. of displacement*, a curve showing the displacement of a vessel, in fresh or salt water, as a function of the mean draft.—*c. of double curvature*, same as CATANALIAN CURVE.—*c. of double curvature*, a quick or slow curve, a curve traced in a plane.—*c. of equal approach* (*Math.*), a curve along which descent under the force of gravity, measured vertically, is proportional to the time.—*c. of extinction*, a graphic curve, used in naval construction, displaying the degree of subsidence of the angle of inclination of a boat coming to rest after having been set rocking in still water.—*c. of fatigue*, a curve representing the distortion of a body under continued stress.—*c. of flexure*, on an anticlastic surface, a curve produced by joining the successive elements of the inflexional tangents.—*c. of frequency*, in statistics, same as PROBABILITY CURVE.—*c. of loads*, in the construction of ships, a curve constructed from the difference between the ordinates of the curve of buoyancy and those of the curve of weights for any one displacement.—*c. of longitudinal shearing-stresses*, a curve derived from the curve of loads by integration: It is used to determine the required longitudinal strength of a ship.—*c. of metacenters* or *transverse metacenter*, a curve showing the height of the metacenter as a function of the water-line for a given displacement.—*c. of maxima and minima*, a quick or slow curve.—*c. of resistance* (*Naval Arch.*), a curve having the resistances to towing represented by the ordinate and the resulting speeds by the abscissa.—*c. of search*, a curve plotted from data such as the speed of a ship, time of departure from a given point, etc.—*c. of sensitiveness*, a diagrammatic curve showing the sensitiveness to mrys of varying wave-lengths, of a photographic plate.—*c. of stability*, in a floating ship or model, a curve indicating the relation between the angle of inclination and the value of a righting moment.—*c. of velocity*, a curve, in which the abscissa of each point represents the length of time occurring after a certain instant, and the ordinate the velocity attained at the end of that length of time.—*c. of weight*, a curve indicating the weight of a ship with its cargo for each foot or unit of the length.—*c. open, n.* A ruling-pen in which the pen-points rotate to coincide with the direction of movement during drawing.—*curves of ship calculations* (*Naval Arch.*), curves plotted from the data of a ship's progress, such as maxima and minima, etc.; they include: *curve of displacement*, *curve of centers of buoyancy*, *curve of loads*, etc.—*c. tracing, n.* *Math.* The operation of determining the points of a curve, and hence its form, location, etc., from its equation.—*cuspidal c.* (*Math.*), the locus, on a surface, of cusps formed by passing planes of intersection through any of its points.—*delimiting c.*, a curve forming a dividing line between two regions of the surface on which it is drawn.—*derived curve* (*Math.*), the curve produced by the derivation of a function.—*c. exterior* of a simple closed continuum, containing all sufficiently distant points, formed when a curve divides a plane.—*field of a c.* (*Math.*), in the calculus of variations, the part on either side of the curve in which the normals of nearby points in the curve do not meet.—*French c.*, a draftsman's curve. See *illus.* in next column.—*frequency c.*, same as PROBABILITY CURVE, under PROBABILITY.—*Galfonian* or *Galfon's c.*, a curve somewhat like the previous one, but with the points of inflection at the ends of the curve.—*geometrical c.*, same as ALGEBRAIC CURVE. See under ALGEBRA.—*Hessian c.* (*Geom.*), a curve formed of double points of another curve's first polar.—*lethylloid c.*, a curve which has a fish-like outline.—*inertial c.*, the imaginary path of a mass which moves on the surface of the earth, or other revolving body, with no resistance or influence from other forces.—*inflight line* at the pole, a point; and at all other places, a circle which varies with the latitude and velocity.—*integral c.*, a curve considered in relation to its derived curve.—*interior* of a simple closed c., the continuum, containing no sufficiently distant point, formed when a curve divides a plane.—*isacoustic c.* (*Arch.*), an imaginary line of curvature in an auditorium uniting all the points at which a sound from a given point reaches the ears of the audience.—*isocenter*, the point, in the curvature of a floor and the apparently symmetrical view of the lift of tiers of seats upon it.—*iseldomial c.*, in a theater, etc., an imaginary curve along which the views obtained of the stage are equally good.—*isentropic c.*, in a thermodynamic diagram, a curve of which all points correspond to states of equal entropy.—*isogyric c.*, an *isogyre*.—*isothermal c.*, a curve showing expansion of a gas as a function of time during a period when the temperature is uniform.—*isothermic c.* (*Math.*), a curve of a series of non-intersecting equivalent curves connecting two points on a simply united surface.—*liquidus c.* (*Phys. Chem.*), the freezing-point curve in a drawing illustrating the connection between concentration and temperature for a system including solid-solution and liquid-solution phases. In this system the melting-point curve is known as the *solidus c.* or *solidus liquidus*.—*liquidus c.*, a curve in a series of curves formed by compounding two simple harmonic motions, as those described by a double pendulum, or by a beam of light reflected successively from two tuning-forks.—*load-c.*, *n.* *Elec.* A curve showing the relation between the load-variations of a power system and certain variables which affect the load, such as the time of day, etc.—*magnetic c.*, one of the curved lines formed by sprinkling iron filings on a magnet placed in a field.—*in a magnetic field*, and tapping the effect to find them in arranging themselves in the direction of the lines of magnetic force.—*mixed c.*, a curve into the formation of which several curves enter.—*plane c.* (*Math.*), a curve every point of which is in the same plane: opposed to *tortuous* or *irregular curve*.—*polytropic c.*, in the thermodynamics of a perfect gas, in a process of expansion or contraction, the remains constant.—*quintic c.*, same as GALTON'S CURVE.—*quintic angular c.* (*Geom.*), a curve or meridian-line that makes a right

1. A son of Ham, lived about 2500 B. C. 2. A Benjamite in David's time. 3. The descendants of Cush; hence, the Ethiopians. 4. Ethiopia.

cut'ta-ne'go, 1 kut'a-ne'go; 2 kut'a-ne'go, n. An alloy of blismuth and tin in equal parts. When oxidized as white enamel.  
cut'ted, 1 kut'ed; 2 kut'ed, a. [Dial. or Obs.] Short or sharp-spoken; curt; querulous. See CUT, r.  
cut'ter, 1 kut'er; 2 kut'er, r. [Dial.] I. t. To fondle.  
II. t. To whisper; murmur, as a dove.

cut'ter, n. 1. One who cuts, or who shapes or fits anything by cutting; as, a leather-cutler; stone-cutler; velvet-cutler. 2. That which cuts, as a specially made tool or machine, or a cutting part or tooth of the same, as: (1) A machine used for cutting, named from the object cut, as, card-cutter, corn-e, forage-e, lead-e, mold-lug-e, paper-e, pipe-e, print-e. (Photo), rivet-e, screw-e, sod-e, etc. (2) A colter. (3) A wooden tool to which one of two diamonds in process of cutting is cemented and by which it is rubbed against the other. The cutter contains the stone furthest from completion. See CUTTER. (4) A cutting-tooth or incisor.  
3. Naut. (1) A sharp single-masted vessel (usually having a running-in bowsprit) with a fore-and-aft mainsail, gaff-rigged, forestaysail, and jib hanging with no liberty, by its halyards alone; by extension, any sloop of narrow beam and deep draft.  
Chaplains in a cutter of eight tons, with ten men, started on a voyage of exploration.

KINGSTON Canada b6. 1, p. 23. [a. & n. 1857.]  
(2) A small vessel, now commonly a steamer, in the revenue marine service. (3) A medium-sized, square-sterned, double-banked, 10- to 12-oared man-of-war's boat, rigged with either two sliding gunter-sails or two lugsails and a jib. [U. S.] A small sleigh, usually for one horse. 5. A yellow brick soft enough to be cut easily; used for face-work. 6. Mineral. A crack in a crystal, which diminishes or destroys its value for setting. 7. Mining. A crack or joint less developed than

Hull and Cabin-plan of a Cutter.

others which it crosses, or a system of such joints: usually in the plural. See BACK, n. 8. [Eng.] Formerly, an officer of the Exchequer, who provided the tallies and noted the amounts paid by cutting notches in them. 9f. A wild profligate fellow; a bravo; a cut-throat. Albany cutter, a sleigh first introduced by James Gould of Albany, N. Y. - cut'ter-bar', n. Moch. 1. The bar carrying the series of fixed triangular knives of a mowing- or reaping-machine. 2. The bar carrying the cutting-rod of a boring-machine. - c-block, n. Same as CUTTER-BAR. 2. - c-brig, a square-rigged vessel similar to a yawl, with a jigger and fore-and-aft mainsail. - c-bullit, a. Naut. Constructed on the lines of a cutter. - c-els, n. A ship's boat, of a size and shape between a gig and a cutter. - c-grinder, n. A grinding-machine, as an emery-wheel, for sharpening cutters. - c-head, n. A rotating piece, as in a mowing-machine, bearing bits or having cutting edges. - formed c. (Mech.) any cutter made for a special kind of work; as, a grooving c., volute c., etc. - lever c., a machine, consisting of a pivoted knife, worked by a hand-lever, against which hay or similar material to be cut is pushed from a feed-table.

cut'throat', 1 kut'thr6t'; 2 kut'thr6t', n. 1. A blood-thirsty ruffian. 2. [Scot.] A dark lantern having horn in place of glass. 3. A seed-eating spermiestine bird (*Amadina fasciata*) often seen in cages. 4. The mustang grape (*Vitis californica*) of Texas. 5. A trout (*Salmo clarkii*) frequenting the lakes and rivers of northwestern America. See TROUT - cut'throat', c. [Rare.] To cut the throat of. - cut'throat', o. 1. Villainous; murderous. 2. Played, as euchre, by three single players, two often combining against one.

cut'tle, 1 kut'; 2 kut', n. The black gullemon. [Scot.] A worthless woman.  
cut'tle, n. [Scot.] A hare - cut'tle-clap', n. A hare's form or resting-post. - cut'tle's fud, a hare's tail.  
cut'ting, 1 kut'ing; 2 kut'ing, n. 1. Adapted to cut; edged; as, the cutting edge of an instrument. 2. Disagreeably penetrating; sharp; biting; as, a cutting wind. In the western parts cold and cutting breezes descend from the rugged crags of Denham.

BATAVIA TAYLOR Lake Regions Cent. Afr. p. 23. [s. 1857.]  
3. Wounding the sensibility; sarcastic; caustic.  
Men are afraid of witty women, especially those who delight in making cutting speeches.

HOLLAND Tillem's Letters pt. ii, p. 136. [s. 1870.]  
4f. Swaggering; thieving. STYL see ACID; BLEAK; SHARP - cut'ting-ly, adv.

cut'ting, n. 1. The act of severing. 2. Something obtained or made by cutting; a piece cut off or out, as a newspaper clipping, a microscopic section, a young shoot cut off for rooting and development into an independent plant, an excavation made for the construction of some special object, as a canal, road-bed, tunnel, etc. All one has to do to make a tree grow in Bermuda is to stick it in the ground. J. C. R. DORR Bermuda p. 68. [s. 1854.]  
3. The act or habit of interfering; said of borses. 4. pl. Oats or other grain bruised for making gruel or porridge; groats. 5. pl. Mining. Cheap ore or refuse obtained from cleaning ore. 6. Coal-mining. The operation of making openings across a coal-seam so as to isolate a portion for subsequent blasting out. The cutting is made to cross the undercutting at right angles. 7. The reduction of color to the proper shade in calico fabrics. 8f. A curvet or caper. - clean cutting. Forestry. 1. The cutting down of the entire stand. clear c. 2. An area upon which the entire stand has been cut down. See PHRASES under FORESTRY. - clean-e. method, see METHOD. - cut'ting-al'moud, n. Same as FEWER-FEW. - c. angle (Mech.) see CLEARANCE. 3. - c. area (Forestry), the area over which cuttings have been made to be made. - c. height (Forestry), the height above the ground at which a tree is to be cut. See STUMP EIGHT. - c. horse, n. A horse especially trained to bring refractory animals out of a herd. - c. limit, see DIAMETER LIMIT. - c. series (Forestry), a block or a part of a block containing even-aged stands whose ages differ uniformly within given limits and which are to be cut in turn, the cuttings usually following a given direction. A perfect cutting series seldom exists, except under the clean-cutting method followed by artificial reproduction, or under the outside only, for horses that interfere. - final c. (Forestry), see STAND METHOD. - improvement c. (Forestry), see IMPROVEMENT THINNING.

- preparatory cuttings (Forestry), see STAND METHOD. - regeneration cutting (Forestry), reproduction cutting. - removal cuttings (Forestry), see STAND METHOD. - reproduction cutting (Forestry), any cutting intended to invite or assist reproduction. regeneration c. - seed cuttings (Forestry), see STAND METHOD. - severance cutting (Forestry), the cutting of all trees upon a narrow strip before natural pruning has advanced, in order that the trees bordering this strip may, as the result of partial exposure, become well-firm through the development of strong roots. Thus severance cuttings are made to strengthen the trees on the edge of a stand which will later be entirely exposed through the removal of the stand which now protects it.

Compound words with cutting as the first element are used to name things used in or for cutting; as, cutting, hit, c-board, c-box (for receiving cut material or for catching dust, as in diamond-cutting), c-compass, c-engine (for cutting refuse silk or for gear-teeth), c-fille, c-frame, c-gage (a scribbling-gage which cuts as well as measures), c-line, c-liquor (in calico-printing), c-nippers, c-plaque, c-pilers, c-press (for use on metal sheets), c-punch, c-room, c-shop, c-spade (for cutting timber from wharves), c-wire (in ceramics), etc.

cut'tle, 1 kut'; 2 kut', n. To fold (cloth) so that it will lie in cuttles or folds. - cut'tle, n. A layer of cloth so folded.

cut'tle, n. 1. A cuttlefish. 2. Cuttlebone. 3f. A foul-mouthed fellow. [Prop. cuttle, < AS. eudle; cp. G. kuttelisch, cuttlefish.] cut'tle, n. 1. A cuttlefish.

cut'tle-bone', 1 kut'b6n'; 2 kut'b6n', n. The internal calcareous plate of a cuttlefish, used as a relish for cage-birds and as a polish, etc. cut'tle-fish'bone', n. cut'tle-fish', 1 kut'fish'; 2 kut'fish', n. A di-

cut'tle-fish', n. 1. A branchiate cephalopodous mollusk with 8 to 10 sucker-bearing arms; specifically, a sepioid cephalopod having a depressed sac-like body with fins extending laterally for most of its length, 10 sucker-bearing arms around the mouth, and an internal calcareous shell or bone. Cuttlefish are marine, rapacious, and carnivorous, and swim forward by ejecting water from a funnel connected with the gills. They have also the power of ejecting an ink fluid, the sepia. The arms are used in walking and for seizing prey. - cut'tle-fish', n. 1. A large knife used formerly in New England. cut'toe; cut'toe, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate.

The Cuttlefish (*Sepia officinalis*). 1/11

cut'tle, 1 kut'; 2 kut', n. [Local, U. S.] A large knife used formerly in New England. cut'toe; cut'toe, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate.

cut'ty, 1 kut'; 2 kut', n. [Local, U. S.] A large knife used formerly in New England. cut'toe; cut'toe, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate.

cut'ty, 1 kut'; 2 kut', n. [Local, U. S.] A large knife used formerly in New England. cut'toe; cut'toe, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate.

cut'ty, 1 kut'; 2 kut', n. [Local, U. S.] A large knife used formerly in New England. cut'toe; cut'toe, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate. 1 kut'toe-plet; 2 kut'toe-plet, n. An inside cut for a plate.

— *c.* surface (*Geom.*), a bounded surface which can be reduced to a loop or network by contracting its boundaries

of rhipidoglossate gastropods having lateral cirriform appendages, ciliated tentacles, the median tooth wide, the four lateral teeth narrow, marginal teeth denticulated, and shell depressed and not nacreous. *Cy"clo-stre'ma*, n.

(t. g.) *Cy*-clo-stre-mat'l-dät; *cy*-clo-stre-mild, *n.*—*cy*-clo-stre-mold, *a.*  
*cy*-clo-style, *n.* 1. An apparatus for manifolding manu-  
script, etc., by means of a very thin wax-paper stencil and  
ink-roller. Originally the paper was pierced by a tiny  
rough-edged wheel at the end of a handle used like a style,  
but in more modern apparatus a typewriter is used, the  
blow of the type removing the wax locally from the paper  
and permitting the ink to pass through; superseded by the  
*neostyle*. 2. *Arch.* A circular range of columns without a  
core or building within; distinguished from a *peristyle*, which  
surrounds a building.—*cy*-clo-styl'ar, *o.*—*cy*-clo-thu-  
r'l'ma, *n.* *pl.* *Mom.* A subfamily of bradyptodids, with  
only two toes of the fore feet well developed; two-toed sloths.  
*Cy*-clo-thu'r'us, *n.* (t. g.) *Cy*-clo-thu'r'i-nat; *cy*-clo-  
thure, *n.*—*cy*-clo-thu'r'ine, *a.* & *n.*—*cy*-clo-tom'ic, *o.*  
Pertaining to the division of a circle into equal parts.  
*cy*-clo-t'omy, 1 sal-kist'omy; 2 *cy*-clo-t'omy, *n.* 1. *Math.*  
The division of a circle into a given number of equal parts.  
2. *Surg.* Separation of the ciliary muscle. [*cy*-clo- +  
-tom'y.]

*cy*-clo-tus, 1 sal-kil'us; 2 *cy*-clo-tus, *n.* Same as *STYNOTUS*.  
*cy*-clus, 1 sal-kil'us; 2 *cy*-clus, *n.* 1. [*cl.*] 1-kil; 2-cl, *pl.*  
Same as *CYCLES*, 6. 2. [*C.*] *Crust.* A genus typical  
of *Cycloidea*. [*LL.*, < *Gr.* *kyllos*, circle.]

*cy*-dar'4-form, 1 sal-dar'4-form; 2 *cy*-dar'4-form, *a.* *Entom.*  
Orbicular, but truncated at opposite ends, as a joint of  
a palpus. [*L.*] *Cydarum* (< *Gr.* *kydaros*), kind of  
ship. [*L.*]

*cy*-der, *n.* [*Archaeol.*] Cider.

*Cy*-dip'pl-dä, 1 sal-dip'pl-dä; 2 *cy*-dip'pl-dä, *n.* *pl.* *Zooph.* A  
family of sacate ctenophorans with the subglobular body  
rayed. *Cy*-dip'pe, *n.* (t. g.) [*LL.* < *Gr.* *kydippe*, mytho-  
logical character.]—*cy*-dip'pl'd, *n.*—*cy*-dip'pl'd, *a.*

*Cy*-dip'pl-dä, 1 sal-dip'pl-dä; 2 *cy*-dip'pl-dä, *n.* *pl.* *Entom.* A family  
of elincoldean bugs with body convex, wings well developed,  
fore legs fossorial, hind legs spingerous. *Cy*-dip'pl'd, *n.* (t. g.)  
[*Appar.* < *Gr.* *kydnos*, splendide.]—*cy*-dip'pl'd, *a.* & *n.*—*cy*-  
dip'pl'd, *a.*

*Cy*-dip'pl'd, 1 sal-dip'pl'd; 2 *cy*-dip'pl'd, *n.* A river in Adana vilayet,  
Ash Minor; 75 m. long to the Gulf of Iskanderun; its water  
is very cold. *Ky*-dip'pl'd, [*Gr.*]

*Cy*-do'nes, 1 sal-do'nes; 2 *cy*-do'nes, *n.* *pl.* An ancient Cretan  
*Cy*-do'nä, 1 sal-do'nä; 2 *cy*-do'nä, *n.* *Bot.* A genus of  
trees of the rose family, embracing the quince, etc.; now  
generally referred to *Pyrus*. [*LL.*, quince, < *Gr.* *kydonia*,  
< *Kydonia*, a town in Crete, now Khandia.]—*cy*-do'nä, *n.*  
The muliginous matter (*Cy*-do'nä) of quince-seeds,  
resembling tragacanth.—*cy*-do'nä-uin, *n.* Quince-seed.

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* An inhabitant  
of Cydonia, a city of northern Crete, now Khandia.  
*Cy*-do'nä-uin, *a.*

He (Strabo) thinks that both *Cydonians* and *Eteo-Cretans* are  
autochthonous, which is only another way of saying that both  
are pre-Dorian. R. M. BARNES, *Discoveries in Crete*, ch. 9, p.  
153, note, 14. (71)

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Med.*  
The diagnosis or discrimination as to the existence of  
pregnancy. [*Gr.* *kydēs*, *kydēs*, & *kydēs*, knowledge.]  
—*cy*-do'nä-uin, *n.* *Med.* A sign of pregnancy.

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Med.* Conception; the  
state of pregnancy. [*Gr.* *kydēs*, pregnancy, < *kydēs*,  
he pregnant.]—*cy*-do'nä-uin, *n.* *Med.* The science  
of medicine in its application to gestation.

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* In tohany, curved  
like a swan's neck.

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* A young swan. [*F.*  
*cygnus*, < *L.* *cygnus* (< *Gr.* *kygnos*), swan.]  
No, tis but the cygnus of the air. *Cygnus*, the silvery lake.

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A genus typical  
of *Cygnus*. [*LL.* < *Gr.* *kygnos*, swan.]

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

*Cy*-do'nä-uin, 1 sal-do'nä-uin; 2 *cy*-do'nä-uin, *n.* *pl.* *Ornith.* A sub-  
family of anatoid birds; swans.—*cy*-do'nä-uin, *a.* & *n.*

lirery-c. (for delivering the printed sheets). Impression-c.,  
ink-c., plate-c. (for holding curved stereotype plates),  
type-c., etc.; and (2) from their form; as, drum c.,

3. A strawboard tube used as a protective covering,  
as for pictures, photographs, etc., sent by mail. 4.

*Archaeol.* (1) A cylindrical stone with a cuneiform or  
hieroglyphic inscription, used as a seal or amulet. (2)

A commemorative tablet of clay with a cuneiform in-  
scription, found buried under the corners of edifices in  
Babylonia and Assyria. 5. *Bot.* A plant-stem bound-  
ary established by a different tissue.

In angiosperms, pith, wood, and bark are regarded as  
representing, respectively, a central, a cortical, and a dermal  
cylinder.

6. A portable timepiece on the sun-dial principle.  
[< *F.* *cylindrus*, < *L.* *cylindrus*, < *Gr.* *kylindros*,  
< *kylindros*, roll.]

—*cm*-b'cy'l'in-der, *n.* *Mech.* A revolving cylinder which  
is one of the parts of a cotton-combing machine.—*cy*-  
linder-band', *n.* In the spectrum analysis of certain metals,  
a band representing a half-spectrum lighted on one side.

7. *Engin.* 1. The bore of a cylinder, as of a steam-  
engine. 2. A gun with a bore of uniform diameter.—*c.*  
hore, *ti.*—*c.* cake, *n.* Sodium sulfate molded by making  
common salt and sulfuric acid in cylindrical retorts and beat-  
ing the mixture.—*c.* cock, *n.* A cock attached to a steam-  
cylinder, through which water may be blown out.—*c.*  
condensation, *n.* *Steam-engin.* The partial condensation of  
steam on entering a cylinder, owing to contact with walls  
covered by the previous exhaust.—*c.* cover, *n.* 1.

Usually, in a steam-engine, the steam-tight cover at that  
corner of a cylinder through which the piston-rod passes. 2.

[Rare.] The lagging or jacket about a steam-cylinder to  
lessen radiation.—*c.* face, *n.* In a steam-cylinder, the  
inner bore in which the piston moves.—*c.* feed, *n.* The  
amount of steam per stroke that passes through an engine's  
cylinder.—*c.* gage, *n.* 1. A tool by which the opening in  
the cylinder of an escapement is measured. 2. A steam-  
gage which is attached to the cylinder of a steam-engine.

3. A hollow cast-iron cylinder for testing the accuracy of  
the finished bore of a gun.—*c.* gate, *n.* A cylindrical valve  
controlling the water-supply to a turbine.—*c.* girder, *n.*

A grinding-machine having an automatic crossfeed for  
finishing cylindrical pieces.—*c.* head, *n.* The metal plate  
or cover closing the end of a cylinder.—*c.* lock, *n.* A lock  
fitted with a rotating cylinder which revolves after the  
tumblers with which it is fitted have been sprung and thus  
permits of its being opened with a key.—*c.* machine, *n.*

An alloy of cast-iron and manganese, used chiefly for engine  
cylinders.—*c.* mill, *n.* A grinding-mill fitted with rollers  
in place of stones.—*c.* oil, *n.* A lubricating oil, or  
mixture of oils, used especially for the piston moving in an  
engine's cylinder.—*c.* passage, *n.* A steam-pore.—*c.* port, *n.*

An opening for the passage of motive fluid to or from a  
cylinder.—*c.* powder, *n.* Gunpowder of which charcoal  
carbonized in cylindrical iron retorts is an ingredient.—*c.*  
press, see *PRINTING-PRESS*.—*c.* pressure, *n.* The  
pressure exerted upon a piston by the tension of the  
propelling fluid.—*c.* printing, the process by which pat-  
terns are printed upon cloth, a large and several smaller  
cylinders being used, the latter having the patterns en-  
graved upon them.—*c.* relief, *n.* A pipe through which  
water collecting in a steam-cylinder is drained away; a  
relief-valve.—*c.* small, *n.* A cylindroid gastropod of the  
West Indies, etc.—*c.* snake, *n.* A harmless cylindroid  
pholid snake, as *Cylindrophis rufa* of Java, or the Guiana  
coral-snake (*Hydrocybele*).—*c.* staff, *n.* An implement  
for measuring the length of a gun-bore, watch, a watch  
bar, or a cylinder escapement.—*c.* stretch, *n.* A pipe-  
wrench.—*c.* displacement, *n.* *Engin.* An extra cylinder  
in a gas-engine which receives the charge, whence it is trans-  
ferred into the main or working cylinder.—*c.* low-pressure  
c., the largest and last of the cylinders of a multiple-ex-  
pansion engine.—*c.* outside c., same as *OVERHANGING CYLINDER*.—*c.* overhanging c., a locomotive-cylinder which  
projects beyond the frame.—*c.* porcelain c., same as *PORCE-  
LAIN CYLINDER*.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

Nearly cylindrical.

*Cy*-lin'dra'ceous, 1 sal'in-drä'ceous; 2 *cy*-lin'dra'ceous, *o.*  
Nearly cylindrical.

level intersects one of larger span and height.—*cy*-lin'dro-  
graph, *n.* *Photog.* A camera with a panoramic range of  
about 180°.—*cy*-lin'droid, *i. o.* 1. Like a cylindroid. 2.

Of or pertaining to the *Cylindroidae*. *cy*-lin'dro'id'it.  
II. *n.* 1. A solid body resembling a cylinder, but having its  
equal parallel ends elliptical. 2. A conoidal cubic surface  
used to illustrate the motions of a rigid body. 3. *Pathol.*

A mucous cast of cylindrical or twisted form sometimes  
found in the urine. 4. *Anthrop.* A skull characterized by  
an elongated norma verticalis, rounded lateral aspect,  
and flattened occiput and forehead.—*cy*-lin'dro'ma, *n.*

SYN.: black, dim, dismal, dull, dusky, gloomy, mysterious, obscure, opaque, sable, shadowy, shady, smoky, swart, swarthy. Strictly, that which is black is absolutely destitute of color; that which is dark is absolutely destitute of light. In common speech, however, a coat is black, tho not optically colorless; the night is dark, tho the stars shine. That is obscure, shadowy, or shady from which the light is more or less cut off. Dusky is applied to objects which appear as if viewed in fading light; the word is often used, as are *swart* and *swarthy*, of the human skin when tanned, or even verging toward black. Dim refers to imperfection of outline, from distance, darkness, mist, etc., or from some defect of vision. Opaque objects, as smoked glass, are impervious to light. Murky is said of that which is at once dark, obscure, and gloomy; as, a murky den; a murky sky. Figuratively, dark is emblematic of sadness, agreeing with *somber*, *dismal*, *gloomy*, also of moral evil; as, a dark deed. Of intellectual matters, dark is now rarely used in the old sense of a dark saying, etc. See MYSTICISM; OBSCURE.—Ant: bright, brilliant, clear, crystalline, dazzling, gleaming, glowing, illumined, light, lucid, luminous, radiant, transparent, white.—Dark and Bloody Ground, Kentucky, so called from the numerous Indian wars that occurred in the region now embraced by the State.—dark's areh'es, n. **de-clin'er**, 1 di-klin'-er; 2 de-clin'-er, n. 1. One who declines. 2. A declining dial. *See* DIAL.

**de-clin'o-graph**, 1 di-kloin'-o-graf; 2 de-clin'-o-graf, n. An apparatus for automatically registering astronomical declinations observed by aid of a filar micrometer. [*< L. declino (see DECLINATION) + Gr. graphō, write.*]

**de-clin'o-m'e-ter**, 1 dek'-li-nsm'-i-ter; 2 dek'-li-nom'-e-ter, n. 1. An instrument, often self-registering, for measuring or recording the declination of the magnetic needle. 2. *Astron.* An instrument for recording declinations. [*< L. declino (see DECLINATION) + Gr. metron, measure.*]

**de-clive**, 1 di-kliniv'; 2 de-cliv', n. 1. A sloping downward; in surgery, lowest; as, the declive part of a tumor. II. *n. Anal.* An inclined area on the upper surface of the middle portion of the cerebellum. [*< F. déclive, < L. declivus; see DECLIVITY.*]

**de-cliv'ant**, a. Declinant. 2. *de-cliv'ate, a. *Entom.* Having a grade of an automobile.*

**de-cliv'ent**, a. Sloping downward.

**de-cliv'ty**, 1 di-kliniv'-ti; 2 de-cliv'-i-ty, n. [*-TIES, 1 -tiz; 2 -tis, pl.*] 1. A downward slope, or a place or surface having such a slope, as the descending surface between the crest and base on one side of a range of hills; opposed to *acclivity*, when the slope is regarded as ascending.

They beheld the bright arms and banners of their countrymen, gleaming along the declivities of the mountains.

*Prescott Ferdinand and Isabella* vol. 1, ch. 9, p. 334. [*A. S. 1849.*]

2. *Entom.* Any part sloping downward. [*< F. de-clivité, < L. declivitas; < declivus, sloping, < de, down, + clivus, hill.*]

**de-cliv'ous**, a. *de-cliv'ous*, a. Of, pertaining to, or like a declivity; sloping downward. *de-cliv'ous*, a. *Entom.* Having a grade of an automobile.

**de-coct**, 1 di-kokt'; 2 de-coct', v. 1. To prepare for use by boiling. 2. To extract the medicinal properties of by means of boiling. 3. [*Arch.*] To assimilate or digest, as food. 4. [*Arch.*] To warm or heat, as by boiling. 5. [*Arch.*] To devise, as by concocting. [*< L. decoquo (pp. decoctus), < de, down, + coquo, cook.*]

**de-coct'ible**, a. *de-coct'ible*, a. Having a tendency or power to decoct. *de-coct'ure, n. A decoction.*

**de-coct**, *abbr.* *Decoction* = decoction.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

**de-coct'ion**, 1 di-kok'-shon; 2 de-coct'-shon, n. 1. The liquid produced by boiling a substance until its soluble properties are extracted; specif., such a solution of vegetable principles in water; distinguished from *infusion*.

The general formula for ordinary decoctions (not including powerful substances) requires that 10 parts by weight of the compound substance should be put into 100 parts of cold water in a covered vessel, and boiled fifteen minutes.

2. The act or process of boiling anything, especially in water, to extract its soluble properties. 3. Preparation or development by heat. [*OF., < L. decoctio(n)-, < decoctus; see DECOCT.*]

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*L. Rom. Law.* A spendthrift; bankrupt; specif., one who has squandered public funds. [*To decipher (a code).*]

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*IN-CON-EN; NE-CON-ING.*]

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*-HEREN; -HERING.*] *Wireless Tele.* To cause to cease cohering; separate; disconnect; used in wireless telegraphy. *See COHERER.* [*< NE + COHERE.*]

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*-HEREN; -HERING.*] *Wireless Tele.* To cause to cease cohering; separate; disconnect; used in wireless telegraphy. *See COHERER.* [*< NE + COHERE.*]

The particles of metal cohere, the Morse instrument prints a dot, and the tapper strikes its little hammer against the glass tube. That blow *decoheres* the particles of metal, and stamps the current. *McClure's Magazine* June, 1899, p. 106.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Elec.* A mechanical contrivance used in restoring a coherer to its normal state of high resistance after it has been made conductive, as by the impact of an electromagnetic wave; used especially in wireless telegraphy, where it acts by tapping or jarring. Compare *COHERER*.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Elec.* The act of restoring a coherer to its normal state of high resistance, as by the action of a decoherer; the normal state of a coherer; decoherence. [*< NE + COHERION.*]

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

**de-coct'or**, 1 di-kok'-tor; 2 de-coct'-tor, n. [*Chem.* Of or derived from decane—decolic acid, same as CAPRIC ACID.

Decollet and Decorated Shells. 1/1

1. Decollet shell of a pond-snail (*Gastropoda*). 2. Decorated shell of *Corbicula cuneata*.

**de-col'la-tion**, 1 dek'-a-lé-shon; 2 dek'-a-lé-shon (xm), n. 1. The act of beheading, or the state of being beheaded; decapitation; specif., in surgery, the severing of the head of the child in difficult parturition. 2. A picture representing a beheading, or a festival commemorating the beheading of a martyr; as, the decollation of St. John the Baptist (Aug. 29). [*OF., < L. decollatio(n)-, < decollo, to behead, < de, from, + collare, to collar.*]

**de-col'le-té**, 1 dek'-a-lé-té; 2 dek'-a-lé-té, n. [*F.*] 1. The outline of the bodice of a dress cut low in the neck. 2. The part of the neck and shoulders which is exposed. 3. The act of cutting a bodice low in the neck; also, the state of being decolleté.

**de-col'le-té**, 1 dek'-a-lé-té; 2 dek'-a-lé-té, n. [*F.*] 1. Cut low in the neck; low-necked, as the waist of a dress, so as to leave the neck and shoulders exposed. 2. [*Fem. de-colleté.*] Wearing a low-necked dress; having the neck and shoulders bare.

The ladies ride in full dress, *decolletées*, without hats. *R. H. Dana, Jr. To Cuba and Back* ch. 5, p. 48. [*A. S. 1859.*]

**de-col'or**, 1 di-kol'-or; 2 de-col'-or, v. To deprive of color; to bleach; whiten; decolorize. [*< L. decolorare, < de, from, + color, color.*]

**de-col'or'ant**, 1 di-kol'-or-ant; 2 de-col'-or-ant, n. A bleaching agent. 2. A bleaching substance. *de-col'or'ate*, a. Bleached. *de-col'or'ation*, n. 1. The act of bleaching. 2. Absence of color.

**de-col'or'im'e-ter**, 1 di-kol'-or-im'-i-ter; 2 de-col'-or-im'-e-ter, n. An instrument or apparatus for testing the decolorizing or bleaching power of a substance, as of bleaching powder. [*< L. decolor, colorless (< de-priv. + color), + Gr. metron, measure.*]

**de-col'or-ize**, 1 di-kol'-or-iz; 2 de-col'-or-iz, v. [*-IZEN; -IZING.*] To free from color; bleach.

**de-col'or-ize**, 1 di-kol'-or-iz; 2 de-col'-or-iz, v. [*-IZEN; -IZING.*] To free from color; bleach.

An Italic divinity identified by the Romans with the Greek Artemis. Her principal shrine was in the Alban mountains by a lake, "The Mirror of Diana" (Lago di Nemi), near Aricia, where she was worshipped as a sylvan goddess, and as the presiding divinity of childbirth. Her high priestess, the King of the Woods, obtained his position by the slaughter of his predecessor and held office until killed by an aspirant to his dignity. As a goddess of light she represented the moon, as Dianus (Janus) did the sun. In art she is generally represented as the virgin goddess of hunting, attended by maidens and hunting-dogs. Compare ARTEMIS.

Neither is a dictionary a bad book to read. There is no cant in it, no excess of explanation, and it is full of suggestion. Emerson *Spirit and Solitude*, Books p. 169. [H. M. A. C. 1890.]

Richard Huloet was the first to produce an English dictionary. This work, which he issued in 1552, was the first in which the meanings of English words were explained in English.

*di-guan'id*, 1 di-*gwan'id*; 2 di-*gwan'id*, n. *Chem.* A derivative of guanidine (C<sub>3</sub>H<sub>5</sub>N<sub>3</sub>). *di-guan'idet*, n. A dike; bank.

*di-gyn'*, 1 di-*gyn'*; 2 di-*gyn'*, n. *Bot.* A plant of the obsolete Linnean order *Dygyna*.

*di-gyn'-at*, 1 di-*gyn'-at*; 2 di-*gyn'-at*, n. *pl.* *Bot.* An order (now obsolete) in the Linnean artificial system of plants, characterized by the flowers having two pistils. [*di-gyn'* + Gr. *gynē*, woman.] - *di-gyn'-ous*, o. *Bot.* Having two pistils, or flowers with two pistils. *di-gyn'-ant*.

*di-hal'-n*, gen, 1 di-*hal'-o*-jen; 2 di-*hal'-o*-gēn, a. *Chem.* Containing two halogen atoms.

*di-hē'dral*, 1 di-*hē'dral*; 2 di-*hē'dral*, a. 1. Two-sided; formed by or having two plane faces; as a *dihedral* angle, or a *dihedral* plane, as the first V-shaped Santos Dumont flying-machine. 2. *Math.* Denoting a group of substitutions, either 2n nonhomogeneous or 4n homogeneous, which correspond to the rotations that make a figure extend on the equator between two hemispheres and consists of two-sided regular polygons which are coincident, coincide with itself without being identical.

*di-hē'dron*, 1 di-*hē'dron*; 2 di-*hē'drōn*, n. A figure with two sides or surfaces. [*di* + Gr. *hedra*, seat, < *hezomai*, sit.]

*di-hē'li-um*, 1 di-*hē'li'-um*; 2 di-*hē'li'-um*, n. *Astron.* The parameter of an elliptic orbit which passes through the sun. [*di* + Gr. *hēlios*, sun.] *di-hē'li-ost*; *di-hē'ly*.

*di-hex-ag'o-nal*, 1 di-*hēks-ag'o-nal*; 2 di-*hēks-āg'o-nal*, a. Twelve-sided in cross-section, as a simple form of the hexagonal system; also, consisting of two hexagonal parts united.

*di-hex-a'hē'dral*, 1 di-*hēks-a-hē'dral*; 2 di-*hēks-n-hē'dral*, n. Having the form of or pertaining to a *dihexahedron*.

*di-hex-a'hē'dron*, 1 di-*hēks-a-hē'dron*; 2 di-*hēks-a-hē'drōn*, n. *Crystal.* A six-sided prism having three planes on the extremities.

*Di-hing'*, 1 di-*hng'*; 2 di-*hng'*, n. A branch of the Brahmaputra river, India.

*di-hy'dric*, 1 di-*hōi'-drik*; 2 di-*hōi'-drik*, n. *Chem.* A cross-breed from individuals differing in two characters. - *di-hy'dri-sm*, n.

*di-hy'drate*, 1 di-*hōi'-dret*; 2 di-*hōi'-drit*, n. *Chem.* A compound containing two molecules of water.

*di-hy'dra-zone*, 1 di-*hōi'-drazōn*; 2 di-*hōi'-drazōn*, n. *Chem.* A hydrazone in which the oxygen of two carboxyl groups has been replaced.

*di-hy'dric*, 1 di-*hōi'-drik*; 2 di-*hōi'-drik*, n. *Chem.* 1. Having two hydroxyl groups. 2. [Rare.] Having two acid hydrogen atoms.

*di-hy'dri-o-did*, 1 di-*hōi'-dri-o-did*; 2 di-*hōi'-dri-o-did*, n. *Chem.* A compound containing the elements of two hydriodic acid molecules. *di-hy'dri-o-dide*.

*di-hy'dro*, 1 di-*hōi'-droit*; 2 di-*hōi'-drit*, n. *Mineral.* A green hydrous copper phosphate (H<sub>2</sub>CuP<sub>2</sub>O<sub>7</sub>) crystallizing in the monoclinic or triclinic system. [*di* + Gr. *hydōr* (hydr-), water.]

*di-hy'dro*, 1 di-*hōi'-dro*; 2 di-*hōi'-dro*. Designating a combination with two hydrogen atoms: a combining form. *di-hy'dr-*.

*di-hy'dro-brō'mid*, 1 di-*hōi'-dro-hrō'mid*; 2 di-*hōi'-dro-hrō'mid*, n. *Chem.* A compound containing the elements of two hydrogen bromide acid molecules. *di-hy'dro-brō'midic*, *di-hy'dro-chlo'rid*, 1 di-*hōi'-dro-klo'rid*; 2 di-*hōi'-dro-klo'rid*, n. *Chem.* A compound containing the elements of two hydrochloric acid molecules. *di-hy'dro-chlo'ridet*.

*di-hy'droxy'-y*, 1 di-*hōi'-droskē*; 2 di-*hōi'-droskē*-y. Same as *monox* + a combining form and adjective. - *dihydroxy* acid (*Chem.*), an acid, as tartaric, that contains two hydroxyl groups which are not carboxyl group constituents.

*di-hy'droxyl*, 1 di-*hōi'-droskē*; 2 di-*hōi'-droskē*, o. *Chem.* Same as *monox* + a combining form and adjective.

*di-hy'drox'y-far-tar'ic*, 1 di-*hōi'-droskē-far-tar'ik*; 2 di-*hōi'-droskē-far-tar'ic*, o. *Chem.* Designating the colorless, crystalline, tetrahydroxy acid, [C(OH)<sub>4</sub>COOH], resulting from the oxidation of dihydroxyacetic acid.

*di-i'-amh'*, 1 di-*oi'-amh'*, -*nm'hns*; 2 di-*i'-amh'*, 1 di-*am'hns*, 1 di-*am'hns*, n. -[*amns* or -*am'h*] - 1 *ambz* or -*am'boi*; 2 -*ambz* or -*am'h*, *pl.* *Anc. Pros.* A double iambus, or iambic dipody used as a compound foot, forming a meter in iambic verse (— — —). [*di* + L. *diambus*, < Gr. *diambos*, < *di*, nr- + *iambos*, iamna.]

*di-i'-o-did*, 1 di-*oi'-o-did*; 2 di-*oi'-o-did*, n. *Chem.* A compound having two atoms of iodine with an element or radical.

*di-i'-o-dro-car'ba-zol*, 1 di-*oi'-o-dro-kār'ba-zōl* or -*zōl*; 2 di-*oi'-o-dro-kār'ba-zōl* or -*zōl*, n. *Chem.* A yellow, odorless, crystalline antiseptic (C<sub>12</sub>H<sub>8</sub>NI<sub>2</sub>) formed by the action of iodine on carbazol.

*di-i'-o-do-form*, 1 di-*oi'-o-do-fōrm*; 2 di-*oi'-o-do-fōrm*, n. *Chem.* A yellow, crystalline antiseptic (C<sub>12</sub>H<sub>8</sub>I<sub>2</sub>) formed by the action of iodine on acetylindole.

*di-i'-o-do-sal'til*, 1 di-*oi'-o-do-sāl'til* or -*zōl*; 2 di-*oi'-o-do-sāl'til* or -*zōl*, n. *Chem.* A colorless, tasteless, crystalline antiseptic (HO(C<sub>6</sub>H<sub>4</sub>)<sub>2</sub>COOC<sub>2</sub>H<sub>5</sub>) formed by the condensation of phenol and diiodoacetic acid.

*di-i'-o-nic*, 1 di-*oi'-o-nik*; 2 di-*oi'-o-nic*, o. *Phys. Chem.* Designating the formation of two ions by electrolytic dissociation. [same as *DIIONIC*.]

*di-i'-pol'i-a*, 1 di-*oi'-pol-i-a*; 2 di-*oi'-pol-i-o*, n. [*di* + Gr.]

*di-i'-pol'o-gen*, 1 di-*oi'-sāl'o-jen*; 2 di-*oi'-sāl'o-rēn*, n. *Chem.* A red crystalline compound (C<sub>12</sub>H<sub>8</sub>N<sub>2</sub>O<sub>4</sub>) readily convertible into indigo, as by reduction with ammonium sulfide. [*di* + Gr. *polios*, gray.]

*di-i'-so-am'y*, 1 di-*oi'-sō-am'i*; 2 di-*oi'-sō-am'y*, *Chem.* I. a. Indicating that two isomyl radicals are present in a compound: n emnifm form. II. n. One of the isomeric decanes.

*di-i'-so-hu'tyl*, 1 di-*oi'-sō-hū'til*; 2 di-*oi'-sō-hū'tyl*, *Chem.* I. a. Indicating that two isobutyl radicals are present in a compound: as, *dihydroxyisobutyl* acid, (C<sub>4</sub>H<sub>9</sub>O)<sub>2</sub>. [*di* + Gr.]

*di-i'-so-nm'yl*, 1 di-*oi'-sō-nm'i*; 2 di-*oi'-sō-prō'yl*, n. [*di* + Gr.]

The best known genera have been found in the  
western United States as fossils of  
great size in good state of preserva-  
tion. A complete skeleton of one of  
them is now in Yale University Mu-  
seum at New Haven, Conn. In some  
of the genera the pelvis and hind legs  
were birdlike, and the mode  
of progression  
was bipedal.  
The earlier rep-  
tiles were car-  
nivorous but in the later epoch massive forms of herbi-  
vorous appeared in all places except in New Zealand and  
Australia and were said to have attained from 55 to 80 feet  
in length. Compare *CRETACEOUS*; *TRIASSIC*.

Some dinosaurs had the outward configuration of lizards or  
alligators with four small limbs supporting an elongated body  
which terminated in a long pointed tail. In others the legs were  
large and strong, while the fore limbs were small. . . . They  
must have been somewhat like a kangaroo or even a bird. . . .  
The dinosaurs include some of the most gigantic animals that  
have inhabited the globe. Many of them were 30 ft. in length,  
and not less than 12 ft. high. *Nelson's Perpetual Encyc.* iv, 63.

pendent clause *directly* becomes, through the omission of *when* or *as soon as*, a quasi-conjunction; as, *directly* he comes, send him to me: an incorrect English usage.

Many English novelists use this word as the equivalent of 'as soon as'; thus, *directly* he arrived, he called for ale. 'I gave him the letter directly I saw him' (18th c.), this use of the word has not gained currency in the United States; and as it has been used in England since the days of Pelham, that is, for nearly forty years, we may hope to escape it altogether. E. S. GOSNOLD *Good English, Misused Words* p. 107. [*< L. dīr'e, direct.*]
